Poetry.

Fulness of Christ.

What the heart is at the birth,
What the soul is to the earth,
What the gem is to the mine,
What the grape is to the vine,
What the bloom is to the tree,
That is Jesus Christ to me.

What the string is to the lute,
What the breath is to the flute,
What the spring is to the watch,
What the nerve is to the touch,
What the breeze is to the sea,
That is Jesus Christ to me.

What the estate is to the heir,
What the autumn's to the year,
What the seed is to the farm,
What the sunbeam's to the corn,
What the flower is to the bee,
That is Jesus Christ to me.

What the light is to the eye,
What the sun is to the sky,
What the sun is to the river,
What the hand is to the giver,
What a friend is to the poor,
That is Jesus Christ for me.

What culture is unto the waste,
What honey is unto the taste,
What fragrance is unto the smell,
Or springs of water to a well,
What beauty is in all I see,
All this and more is Christ to me.

What Christ did for Me.

For me he left his home on high;
For me to earth he came to die;
For me he slumbered in a manger;
For me to Egypt fled, a stranger;
For me he dwelt with fishermen;
For me he slept in cave and glen;
For me those he meekly bless;
For me a crown of thorns he wore;
For me he braved Gethsemane;
For me he hung upon the tree;
For me his final feast was made;
For me by Judas was betrayed;
For me by Peter was denied;
For me by Pilate crucified;
For me his precious blood was shed;
For me he slept among the dead;
For me he rose with night at last;
For me beyond the skies he passed;
For me he came at God's command;
For me he sits at his right hand!

The Amount and Cost of Tobacco!

It is well for the common peace that the enormous tax paid for this article is self-imposed. If its victims were compelled to use it, and pay for it, the world would be filled with rebellion forthwith.

Many a young man in fashionable life pays more for this than for his board-bill. Many a mechanic will die, and leave his family without a cent, who pays more for this than the cost of a Life Assurance of Two Thousand Dollars.

Reader, you pay, for example, six cents a day for cigars. Commencing this forty years with interest, amounts to $3,373.22. Or, you real, twelve cents a day,—this amounts to $6,746.44.

Says Professor Fowler: "A young man from ——— wished to purchase books on Physiology and Health, but said that he was not really able. I asked him about his habits—if he chewed. No. Do you smoke?—Yes. How much? He said that formerly he smoked ten cigars a day, at about two cents for each, which made eighty dollars per year, but that his health was so much deranged that he had reduced his allowance to seven. I told him this cost him forty dollars per year, which he expended not only uselessly, but in those things that tended to shorten life as well as to destroy his usefulness while he lived."

Says Dr. Alcott: "I have known many a poor family that consumed, in smoking and chewing, at least twenty-five cents a week. This in forty years would amount to $530; or, if placed at compound interest, from year to year, to more than $2,100.

An editor of a public Journal observes:—"When we consider the universality of the use of tobacco, and the fact that some men spend $10, $60, or $100 yearly for cigars—if this town uses twenty per cent less than the average, $9,000 is devoted to the weed yearly; about twice what we raise by tax for Schools; about enough to build the High School house, about which we tobacco-chewers have quarrelled so much; enough to buy a twenty five cent delaine dress for each adult female in town, a pair of boots for each lad, and a five dollar bonnet for each lass in town; so pay the salary of all our ministers, and cover all our contributions for benevolent purposes."

The city of New York, according to the authority of McGregor, consumes $10,000 a day on cigars, and but about $8,500 on bread.

NATIONAL COST.

Cost of Cigars. It is estimated that there are 14,000 cigar manufactories in this country, employing 7,000 hands. Assuming that each manufactor makes 2,500 cigars in a week, which is as low as he can live by, the total per week, is 17,500,000; and, in a year of forty-eight weeks, the number amounts to 840,000,000. At seven dollars per thousand, the valuation of this quantity is $5,040,000, and adding fifty per cent profit of Jobber and retailer, the total is $7,560,000. Adding the sum paid for imported cigars, $6,184,364 (which is much below the mark), and the whole is $13,744,364. Putting the smokers at five millions, and giving each consumer but 225 cigars a year, it is safe to say that the annual expenditure in this country for this luxury is thirty millions of dollars! Add to this the amount spent for chewing and smoking tobacco, and snuff five millions, and we see that there is an enormous expense in this line. This sum total would support more than one hundred of the American Board of Commissioners for Foreign Missions. Says Dr. Coles, the American Churches pay five million dollars annually, for this poison, in all its forms, and less than one million for the Gospel in foreign lands. Article rate, how soon will the Millennium come and bless our race?

The amount on the globe. The present annual production of tobacco has been estimated by an English writer at 4,000,000,000 pounds! This is smoked, chewed and snuffed. Suppose it all made into cigars, one hundred to the pound, it would produce 400,000,000,000. Four hundred billions of cigars!

Allowing this wherein, as manufactured, to cost, on the average, ten cents a pound, and we have $400,000,000 expended every year, in producing a noxious deleterious weed. At least one and a half times as much more is required to manufacture it into a marketable form, and dispose of it to the consumer. If this be so, then the human family expend, every year, one thousand millions of dollars, in the gratification of an acquired habit, or one dollar for every man, woman and child upon the earth!

This sum would build two railroads around the earth, at a cost of twenty thousand dollars per mile, or sixteen railroads from the Atlantic to the Pacific! It would build one hundred thousand churches, costing $10,000 each; or half a million of school houses, costing $2,000, each; or one million of dwellings, costing $1,000 each! It would employ one million of preachers, and one million teachers, giving each a salary of $500! It would support three and one third millions of young men at college, giving each $300 per annum for expenses!

Friendly reader consider the above basis of this calculation in some measure imaginary—call it conjecture, extravagance, just what you please! Cut these figures down one half—cut them down to suit your own notions. Even then, if you are a Christian or Patriot, a friend of God or Man, you will not trifle with this stupendous iniquity; but in some manly way do your part to arrest its destructive power around you.—[Anti-Tobacco Tract Depository, Fitchburg.

Love Your Parents.

A father once said playfully to his little daughter, a child five years old, "Mary, you are good for nothing."

"Yes I am, dear father," replied she, looking thoughtfully and tenderly into his face.

"Why, what are you good for, pray tell me, my dear?"

"I am good to love you, father," replied she, at the same time throwing her tiny arms around his neck, and giving him a kiss of unutterable affection.

So with our young friends who are more advanced in life; there is but little they can do in return for their parents' kindness, except it be to love them; and oh, how tenderly and constantly they should do so! Never, children, by any unkind word or look, never by a single act of disobedience, never by any ingratitude, grieve their hearts or cause a tear to fall from their eye.

Little, ah, how little, do you know of the extent of their affections, and much less do you think of the great anxiety with which they watch over all your words and actions. If you did but know how it grieves and pains their heart to see you doing what is wrong and sinful, you would in future at least be more careful how you act. Perhaps we can teach you something of the depth of their love by giving you two sad illustrations.

"A gentleman who was visiting one of our insane asylums, not long ago, noticed a woman, with a very sad expression of countenance, looking intently into a little pool in the garden of the institution. On inquiring who she was, the doctor informed him that she was the wife of an industrious man living in an adjacent town. They had a family of three boys, two of whom had died suddenly of scarlet fever at about the same time.

"Within a week of their burial, the mother proceeded to a pond near by for some water. As she was dipping her pail, she saw something just beneath the surface which attracted her attention, and taking a wooden rake she drew it to the bank: it proved to be the body of her only remaining child. A walnut shell with a piece of paper stuck in the centre, was floating upon the water, and the boy was probably playing with this when he fell into the pond.

"Before sunset the mother was crazy—raving crazy. She was sent to the asylum, and it was her daily practice to look into the pond in the garden, just as the hour she discovered the body of her child. If she was not allowed to go to the water, she would fall into violent fits and convulsion. And thus did she pass year after year, in patient watching for her lost boy. No smile was ever seen upon her pale, thin face,—there was nothing there but hopeless grief."

We have read also of a father, who lost a little boy.

"The child was playing with a paper balloon, which lodged in a tree, and in his attempting to rescue it he fell from a limb and was killed. The father loved the little boy very much, and he took his loss so much to heart, that it made him insane. One day soon after the occurrence, he went out with his axe and cut down the tree from which the lad had fallen, and after he had felled it, he searched carefully among all the branches, calling out the name of his son, as though he expected to find his lost boy.

It is said indeed to be a father's or a mother's heart broken by the death of a beloved child; but oh, how much worse to see the parent's heart broken and their happiness destroyed by the wicked life of a favourite child! Think of it, dear young friends; it is in your power to cheer, to comfort, and make glad your parent's heart; or you may by your conduct bring their gray hairs in sorrow to the grave, as well as deprive them of all their peace and happiness on earth.—*Episcopal Recorder.*

Photographs.

A New and Valuable Discovery.—Hamilton L. Smith, Professor of Chemistry in Kenyon College, Gambier, Ohio, has made one of the most important discoveries of the age in Photographic art. It consists in coating a glass-plate with a limpid preservative liquid, which, after being dried is as sensitive (or nearly so) as the wet collodion process, and will remain sensitive for any length of time, if kept from the light. After exposure in the camera the latent picture will also remain for months before being developed, and will then come out as intense as if developed the same hour it was taken. Prof. Wharton late of Philadelphia, has gone to the Far West, and taken with him four dozen plates and a camera with which to take views of the most picturesque scenery to be found, and overhow the plates after his return to the States. How valuable this would have been to Col. Fremont, and to Com. Perry, in his Japan expedition. How valuable for taking views in any part of the world. The Government should purchase the secrets and give it to the world as France did the Daguerreotype. The great advantages which will result from this discovery to travelers, explorers and topographical companies will be evident at once. Fac similes of any locality could be taken in a few moments time with nothing but the camera and the plate, and these can be repeated to infinity. This is the great desideratum which has so long baffled the ingenuity and science of experimentalists in this art, and which it was feared could not be attained. Its discovery is the result of long-continued study and experiment, and may be put down as a new and decided step in the march of science, as developed in the beautiful Photographic art. As this process will greatly interest all practical and amateur photographers in this country and Europe, we will here state for the information of any and all who wish to make inquiries relative to the process, or purchase of the same, that such information will be imparted by W. C. Norton & Co., Cleveland, Ohio.—*Cleveland Leader.*

CARD.

THE undersigned would take this method of thanking his numerous friends and customers for the very liberal support which he has received since he commenced business, and flattering himself that he has a thorough knowledge of the Saddle and Harness Business, to give warranted satisfaction to those who may favour him with a call; and with a disposition to accommodate all those who may favour with their support, he feels confident that he will give satisfaction. And having a general assortment of SADDLES, BRIDLES, WHIPS, HARNESS, &c., &c., at his Establishment Chubbs's Buildings, 183 Union Street, where he would be happy to wait upon all those who may favour him with a call.

ROBERT COLLINS,

UNION HOTEL, Union Street,

Between Charlotte and Sydney Streets, (South side.)
THE Proprietor of this Establishment, thankful for favours received during the period he occupied the New Brunswick Hotel, and continued of the necessity of more and better accommodation for the public, has erected a large and substantial Building in Union Street, capable of accommodating from 70 to 80 Boarders. This House is well ventilated, the sleeping rooms are large, and every thing is well supplied with water, and also lighted with gas. The proprietor is determined to leave no means untried to merit the patronage of the community. Travellers arriving late at night will find the house always open, and ready to receive them; while the convenient and moderate charges will render it emphatically the house of the stranger. The tables of the house will be supplied with the best the market affords, and the Proprietor is determined to adhere strictly to the Total Abstinence principle. ☞ Two large Stables have been erected on the premises, capable of accommodating 60 or 70 horses. Good hostlers always in attendance.
ELIAS S. FLAGLER.

M. N. POWERS, UNDERTAKER

Respectfully gives notice that he will attend to all the duties connected with the management of Funerals at the shortest notice; also keeps at his Warerooms a large assortment of Coffins, of every size and description, consisting of Mahogany Walnut, and covered, at all prices.

Coffin Mounting of all descriptions—English and American—Japanned and Plated. Plates Engraved and Lettered. Grave Clothes of all sizes and Qualities.

Orders left at Warerooms or Residence over Warerooms, thankfully received and promptly attended to, day or night. M. N. P.

P. S.—Two superior Hearses, with quiet horse, and careful drivers. Palls, &c., furnished.

PROFESSOR WOOD'S HAIR RESTORATIVE.
IT HAS WORKED MIRACLES!

THAT ALL THE PALE AND GRAY CAN BE RESTORED PERFECTLY to original growth and color so far as their locks are concerned does not admit of doubt; besides it will cure every possible disease of the scalp, whether developed in deadly itching or in the shape of tetanoides, ringworm—even scald head—and in no possible case will it fail in curing an ill by single, nervous or parboiled head-ache, and if used twice a week by the young regularly, it will preserve the color, and keep the hair from falling, to any imaginable age. Read and judge.

Milford, Worcester Co., Mass., Nov. 1855.
PROF. O. J. WOOD—Dear Sir; I take pleasure in bearing testimony to the magic effects of your wonderful Hair Restorative. As far back as 1836, my hair commenced falling off, and the top of my scalp became bald and smooth as glass, and it has continued to fall for a great many years, notwithstanding I have used many celebrated preparations for restoration. Seeing your advertisement I was induced to give your article a trial, and to my great astonishment, found, after a few applications, that my hair became firmly set, and assumed a glossy and healthy appearance; and by the time I had used a quart bottle, my bald head was covered over with a strong and vigorous growth of hair, which is now from one to two inches in length, and growing fast.
Yours, truly, HENRY GOODRICH.

Charlestown, Mass., Aug. 9, 1855.
Gents:—Nothing but a duty and sympathy that I feel to communicate to others who are afflicted as I have been, would induce me to give this public acknowledgment of the benefit I have received from Prof. Wood's Hair Restorative. When I first commenced using it, my hair was quite gray, and so spare rudely bald. I have now used the Restorative about five months, and my hair is entirely changed to its original color, brown, and the new hair is over three inches in length on the spots where it was bald. I have also been much gratified at the healthy appearance and vigor of the hair, which before was dry, and it has ceased to come out as formerly. Respectfully yours, &c., MRS. E. A. STODDARD.

From Mrs. Ingalls, a well known nurse in Boston.
Boston, Oct. 18th, 1855.
Gents:—At your request, and being so highly pleased with the effects of the Restorative, I am free to state that my hair has become quite thick, and entirely white. I have for the last five years been in the habit of using dye, but leaving of the extraordinary effects of this article, I was induced to try it. My hair has been restored to its original thickness, and also to its dark color, which is light brown.
Yours respectfully, MRS. INGALLS.

The following is from the Pastor of the Orthodox Church, Brookfield.
Brookfield, Mass., Jan. 12, 1856.
Prof. Wood—Dear Sir—Hearing much talk of your Hair Restorative, it gives me pleasure to say, that its effects have been excellent in removing dandruff, and, and a constant tendency to disease, with which I have been afflicted from my childhood, and has also restored the hair which was becoming gray, to its original color. I have used no other article, which anything like the same diseases and results.
Yours, truly, J. E. SEAGRAVE.

(From the Jersey City Telegraph.)
What is it for—This Wonderfully Hair Restorative?—is a question asked daily by hundreds. We answer without hesitation or fear of contradiction, that it is the only article known which will do all it promises for the human hair. It will renew its growth—it will stop its falling—and will restore its natural color! It is not a dear dye, but a speedy and efficacious Restorative.

O. J. WOOD & CO., Proprietors, 312 Broadway, N. Y., and Agents for New Brunswick—Chandler & Hall, Kingstreet, St. John, and Queen-street, Fredericton, and T. Walker & Son, Market-square, St. John. dec. 22.

Agents are requested, and in particular cautioned to relieve the Whooping Cough, and all complaints tending to Consumption.

Above we present you with a likeness of DR. HORSE—the inventor of Horse's Indian Root Pills. This gentleman has spent the greater part of his life in travelling, having visited Europe, Asia, and Africa, as well as North America—has spent three years among the Indians of our Western country—it was in this way that the Indian Root Pills were discovered. Dr. Horse was the first man to establish the fact, and all doubt was removed from inquiring minds—that our strength, health, and life depended upon the wise Book.

When the various passages become clogged and do not act in perfect harmony with the different functions of the body, the blood loses its nutrition, becomes thick, corrupted and diseased; thus causing all pains, we know and decrease of every name; our strength is exhausted, our health we are impaired of, and it matters in and hastened in throwing off the accumulated humors, the blood will become clogged and cease to act, and then our light of life will forever be blown out. How important then that we should keep the various passages of the body free and open. And how pleasant to be able we have it at our power to put a medicine in your reach, namely, Horse's Indian Root Pills, manufactured from plants and roots which grow around the mountainous cliffs in Nature's garden, for the health and recovery of diseases. One of the roots from which these Pills are made is a Secret, which opens the pores of the skin, and assists Nature in throwing off the impurities of the constitution within. The second is a plant which is so Excellent, that opens and unclogs the passages to the lungs, and thus, in a soothing manner, performs its duty by throwing off phlegm, and other humors from the lungs, by copious spitting. The third is a Root which is so powerful, that it doubles strength to the kidneys, thus encouraged, they throw off impurities of impurity from the blood, which is then thrown out beneficially by the urinary or water passage, and which could not have been discharged in any other way. The fourth is a Cathartic, and accompanies the other properties of the Pills which engaged in purifying the blood, the coarser particles of impurity which cannot pass by the other outlets, are then taken up and conveyed off in great quantities by the bowels.

Therefore, we, as a showing, Dr. Horse's Indian Root Pills not only enter the stomach, but become united with the blood, for they find way to every part, and completely cast out and cleanse the system from all impurity, and the life of the body, which is the blood, becomes perfectly healthy; consequently we find pain is driven from the system by the cheerfulness which the body becomes so pure and clear.

The reason why people are so distressed when sick, and why so many die, is because they do not get a medicine which will pass to the different parts, and completely cast out the natural passages for the diseases to be cast out; only some, a large quantity of food and other matter is lodged, and the stomach and intestines are literally overflowing with the corrupted mass; thus undergoing fermentation, consequently giving rise to the blood, which throws the corrupted matter through every vein and artery, and life is taken from the body by disease. Dr. Horse's PILLS are added to the medicine taken upon victory, by restoring million of people to the blessings health and happiness. Yet, thousands who have been racked or tormented with sickness, pain and anguish, and whose feeble frames have been stretched by the burning elements of raging fever, and who have been brought, as it were, within a step of the silent grave, now stand ready to testify that they would have been numbered with the dead, had it not been for this great and wonderful medicine, Horse's Indian Root Pills. After one or two doses and been taken, they were astonished, and absolutely astonished, in witnessing their charming effects. Not only do they immediate rise all strength, and take away all sickness, pain and anguish, but they at once go to work at the foundation of the disease, which is the blood. Therefore, it will be shown, especially by those who use these Pills, that they will cleanse and purify the blood—that they will cleanse and purify the blood—that they will give strength, and the pursuit of a long happy life will cheerful and brighten every day.

Get one of Dr. Horse's father at long notice, showing how this medicine was introduced.

Jas. P. Parsons, sole Agent for St. John. Also sold by J. Coleman, S. Reed, J. Chandler, and Druggists generally.

NEW HARDWARE STORE.

Dr. McLANE'S
CELEBRATED
VERMIFUGE
AND
LIVER PILLS.
Two of the best Preparations of the Age

They are not recommended as Universal Cure-alls, but simply for what their name purports.

The Vermifuge, for expelling Worms from the human system, has also been administered with the most satisfactory results to various animals subject to Worms.

The Liver Pills, for the cure of Liver Complaint, all Bilious Derangements, Sick Headache, &c.

Purchasers will please be particular to ask for Dr. C. McLane's Celebrated Vermifuge and Liver Pills, prepared by

Fleming Bro's

SOLE PROPRIETORS, Pittsburgh, Pa., and take no other, as there are various other preparations now before the public, purporting to be Vermifuge and Liver Pills. All others, in comparison with Dr. McLane's, are worthless.

The genuine McLane's Vermifuge and Liver Pills can now be had at all respectable Drug Stores.

FLEMING BRO'S,
60 Wood St., Pittsburgh, Pa.
Sole Proprietors.

THE GREATEST MEDICAL DISCOVERY OF THE AGE.

DR. KENNEDY, of Roxbury, Mass., has discovered in one of our common pasture weeds, a remedy that cures EVERY KIND OF HUMOUR, from the worst scrofula down to a common Pimple. He has tested it in over eleven hundred cases and never failed except in two, and those cases he relinquished. He has now in his possession hundred certificates of the various, all within twenty miles of Boston.

Two bottles are warranted to cure a running ear.
One to three bottles will cure the worst kind of pimples on the face.
Two to three bottles will clear the system of biles.
Two bottles are warranted to cure the worst canker in the mouth and stomach.
Three to five bottles are warranted to cure the worst case of erysipelas.
One to two bottles are warranted to cure all humors in the eyes.
Two bottles are warranted to cure running of the ears and deafness among the aged.
Four to six bottles are warranted to cure scrofula in the worst cases.
One bottle will cure scaly eruption of the skin.
Two to three bottles warranted to cure the worst case of ringworm.
Two to three bottles are warranted to cure the most inveterate case of rheumatism.
Three to four bottles are warranted to cure the so called Fever and Ague.
Five to six bottles will cure the worst case of scrofula.

A bottle is always experienced from the first bottle a perfect cure is warranted when the above quantity is taken.

Reader, I profited over a thousand bottles of this invaluable medicine, and I know the effect of it in every case. I never sell a bottle of it but that will neither be a total or always speaks for itself. There are two things about this herb that appears to me surprising; first, the power in our pastures, in some places quite plentiful, and its value has never been known until I discovered it; second, that it should cure all kinds of humor.

In order to give some idea of the sudden rise and popularity of the discovery, I will state that in April I published it, and sold over two hundred bottles per day; in April, I sold over one thousand bottles per day for 30 days.

None of the wholesale Druggists who have been in business twenty and twenty years, say that nothing in the shape of patent medicines was ever sold so rapidly.

In my own practice I always kept it entirely for home but since its introduction as a general family medicine, its and wonderful virtues have been found in it that I never could.

Several cases of epileptic fits—a disease which was considered incurable, have been cured in a few days, and what a mercy it will prove effectual in all cases of the awful malady—there are but few who have seen more than I have.

I know of several cases of Dropsy, all of them aged persons, cured by it. For the various diseases of the Liver, Headache, Dyspepsia, Asthma, Fever and Ague, Pain in the Side, Diseases of the Spine, and particularly in diseases of the Kidneys, &c., the discovery has done more good than any medicine ever known.

My charge at first was extremely. But the best proof of its value and example of it.

Directions for Use.—Adults, one table spoonful per day; children over ten years a dessert spoonful. Children from five to eight years, a tea spoonful. As no directions can be applicable to all constitutions, take sufficient to operate on the bowels twice a day.

The Principal Office for the State of Maine and the Eastern Provinces is at the Drug and Medicine Establishment of E. E. Hay, 15 and 17 Market Square, Portland, to whom all orders should be addressed. Sold by resp
