A FARM UP NORTH.—The farm of D. Fraser, Esq., Metapedia River, is an extensive one, comprising about two thousand acres. One thousand of these are under cultivation. On the farm are at present about eighty head of cattle, 25 horses, between 100 and 200 sheep, a large supply of poultry, and some fine porkers preparing for the barrel. There are also two splendid oxen, the dimensions of which I noted down. One of them, a six year old, girths 8 feet, and is certainly a noble looking animal; the other, a three year old, girths 6 feet 11 inches. Mr. F. was offered $100 for the large one by a St. John Butcher who was scouring the North for cattle, but refused the offer. Under the escort of our old and esteemed friend Alex. F., I had a very pleasant drive up the Metapedia a short distance on Wednesday. He has such a knowledge of the country and is possessed of such a fund of information, that a drive with him is both agreeable and instructive.—*Newcastle Advocate.*

BRITISH AND FOREIGN.

The *Times* has another long article on the Treaty recently concluded between the United States and China. The writer reviews the course of British policy in China, which he characterizes as one of peace, subject to frequent aggressions, the disregard of treaties, fraud, ill faith and evasion. Until leniency is interpreted at Pekin as fear, Chinese diplomacy is seemingly master of the situation; they laugh the English treaties to scorn, and jockey them into quelling the Taepings. Now they give her the go by as the principal leading power in foreign policy. They send a mission to defer indefinitely the clause of the treaty of Tien Tzin, opening the Empire and admitting civilization. They must be told if they want war, that while England desires peace, actual treaties must be enforced, and no step further will be taken until that is done. China will not be the theatre of war between foreign powers, unless as a result of American policy. The article ends with the assertion that only the rulers of China cling to exclusion, the people want free intercourse, and it is the duty of England to sustain this wish of the people against the rulers.

The Queen arrived at Windsor Castle from the continent on the 12th Sept.

The Archbishop of Armagh at a visitation in his diocese predicted that dis-establishment of the Irish Church would cause a dissolution of the Union, and would make Ireland a separate State.

Mr. Johnson, American Minister, formally waited on Lord Stanley on the 9th.

The differences between the cabmen and railways have been accommodated, and the strike is ended.

LONDON, Sept. 14.—It is generally considered that the events of the last fortnight have made little change in the political condition on the Continent, either to lessen or increase the chances of war. While on the one hand the press of Germany have assumed a quieter tone and profess to be more confident of peace; on the other hand it is known that France has refused a formal demand made by Chevalier Negra, the Italian Ambassador, for the recal of the French troops from Rome; and at the same time Prince Girgenti has brought to Paris proposals from Spain to cement an alliance with France by sending 30,000 soldiers to Rome. This proposition, and the approaching interview shortly to take place at Bayonne between the Emperor Napoleon and the Queen Spain, are looked upon as foreshadowing an alliance, the object of which is to rid France of the care of the Holy See in case she should be plunged into war; so that by this means France if without any other ally could make Spain useful.

Rumors, too, that several fighting regiments have been recalled from Africa; that Gen. Lobouf has been sent on a special mission to Germany; and that Prussia has determined to annex the Grand Duchy of Baden, add to the feeling of distrust in the permanence of the existing peace. This feeling is faithfully mirrored in Paris by the depression on the Bourse and consequent decline of rentes, and in diplomatic circles here the situation is pithily summed up in these words "No fear of war though it may begin to-morrow."

LIVERPOOL, Sept. 15.—The London *Times* has a lengthy article on American affairs. The writer believes that Mr. Johnson, U. S. Minister, has a *carte blanche* from his Government to settle the Alabama case. The case of itself, presents little trouble. The only difficulty is the reluctance of the American Government to settle a difficulty growing out of war resentment. No American Statesman ever believed that the Alabama escaped with the connivance of Great Britain. There might be a question of inadequate laws making England answerable, but this could be easily settled. The real grievances of the United States was the indifference of England in a cruel war and her willingness to see the Union dissolved. Of this the Americans were conscious at the time and remember keenly now. They think we should have an active sympathy with the North. That a Confederacy based upon American Slavery should have been at once condemned. That the Republican party was the true friend of England. That it was wrong to even doubt the success of the Federal arms. After all the anger of the Americans was due to their consciousness of England's want of sympathy in their hour of peril; but the anger, if right, has been enough indulged. Mr. Seward has refused the handsome offer of arbitration which should be credited to England. He now cuts the past adrift, and the thing is as good as settled. Legal points will not stand in the way. The only thing to ascertain is the responsibility of England, and to fix the proper indemnity.

The press of London comments variously upon the recent speech of Napoleon at Chalons. The following words were made use of by the Emperor on the occasion: "I will say nothing more, as the public prints are sure to draw prophecies of war, however moderate my words are."

An International Convention of the Workingmen of Europe has been in session in Brussels recently, the attendance has been large, the proceedings harmonious and orderly. The objects of the meeting and the conclusion obtained may be best summed up in the resolution which was adopted to-day. It was resolved that workingmen cannot attain complete emancipation from the oppressions of employers through the means merely of local strikes. That all strikes should be subject to a code of uniform rules and regulations, that councils of arbitration be formed to settle differences between the employer and employed, and finally that trade societies be established in those countries where they do not now exist, and that all such societies be organized so as to be able to act in close connection with one another for the general improvement of the status of the workingmen throughout Europe.

The Emperor reviewed the troops at the camp of Chalons on the 10th. The whole army, including cavalry, infantry, engineer corps, pontoon and baggage trains were drawn up on the plain. After going through a series of evolutions, all the corps marched by the Emperor in review, each regiment as it passed cheering with great enthusiasm for the Emperor, Empress and Prince Imperial. An immense multitude of spectators covered the neighboring hills.

The *Gazette de France* publishes a despatch from the Prussian Under Secretary of Foreign Affairs, announcing that King William of Prussia has issued an order for the reduction of the Prussian army by 120,000 men. The despatch states that the King by this act wishes to give a new pledge of moderation, and to show his confidence in the prospect of peace, and adds that he thinks nothing menaces it. The *Patrie* thinks the report that the Prussian army is to be reduced is false.

The Emperor Napoleon, the Empress, and the Prince Imperial have gone to Biarritz.

It is reported that Gen. Garibaldi has left Caprera for Naples to attend the Congress of Democrats to be held in that city. The General is said to be disgusted with the attention recently shown the Pope by Admiral Farragut.

It is reported that the Italian Government has requested France to withdraw her troops from Rome; also that Spain has offered 30,000 troops to garrison Rome in the event of a European war.

King William of Prussia, with a large staff of officers, has left Berlin on a tour of military inspection through the North German States. On his arrival at Dresden he was received by the King of Saxony and conducted to the Royal Palace.

Despatches state that the Press of Bombay and of Calcutta and of all parts of India as far as heard from, without exception, condemn the reported appointment of the Earl of Mayo as Governor General of India.

LONDON, Sept. 15.—Reverdy Johnson had his first interview with the Queen at Windsor Castle, on the day after her return from abroad. Mr. Johnson was introduced by Lord Stanley, and presented his credentials as Minister of the United States at the Court of St. James.

The Queen and Court left yesterday on a special train for Scotland.

The telegraphic accounts of the terrible earthquake in the western coast of South America have created much excitement here. The commmercial world is eager for full details of the loss of life, property, shipping, and the arrival of the mail reports is looked for with deep interest.

The *Pall Mall Gazette* this afternoon has a leading article on the prospects of peace or war. It says that in every capital in Europe the belief that a great and immediate war is impending grows day by day, that the best informed men expect it to break out before the end of the year.

BRUSSELS, Sept. 15.—The International Congress of working men yesterday adjourned *sine die.* Among the resolutions adopted is one advising all workingmen to abstain from following their trades in the event of war in their respective countries. The Congress adopted an address to the working-men of Europe. It calls on the working men to oppose war, to refuse to countenance assassination, and use every effort to promote the education of the poor.

LONDON, Sept. 16.—The importation of Hay from the United States, will hereafter be allowed only under a license from the Privy Council. The prevalance of the cattle disease in various parts of America is the cause of this step on the part of the Government.

Mr. Quizot has an article in the last *Revue Des Deux Monde* on the state of Europe. While he has no doubt of the desire of Napoleon for the preservation of the peace of Europe, he urges on him the reduction of the army as the only effective pledge of peace.

BERLIN, Sept. 16.—Count Von Bismarck has been ordered by his physician to go to England for his health.

KIEL, Sept. 16.—King William will review the Prussian fleet here to-day. The King to-day visited the ancient University of Kiel, where he was received with appropriate ceremonies. The Faculty presented an address to His Majesty, in which they referred to the tranquility which now existed throughout Europe, and expressed hopes that it would remain unbroken.

The King, in his reply to this portion of the address, said: "I do not see any cause for the disturbance of the peace of Europe. In the army and navy I behold the vigor of the Fatherland. They have proved that they do not shun the combat, and if compelled to enter into the conflict they will fight it out."

SOUTH AMERICA.

Advices from South America announce a terrible earthquake on Southern coast. They occurred 16th of August.

The citizens of Arica, Arequipa, Iniqui, Chola, and Chincha have been utterly destroyed.

From 25,000 to 30,000 lives were lost.

The loss of property between Tacha and Arica is estimated at fourteen million dollars.

The water rose to such a height that a tidal wave 40 feet high rolled with resistless fury upon the ships in the harbor and precipitated them on the main land.

The U. S. store ship *Freedonia* was capsized and all on board were lost.

The *Freedonia* had on board $1,800,000 worth of naval stores. The vessel was rolled over and smashed to atoms by the advancing tidal waves.

The U. S. steamer *Wateree* was carried half a mile inland and left high and dry, only one sailor of her crew being drowned.

It will be impossible to ever get her afloat again.

The Peruvian corvette *America* was also carried ashore in the same position as the *Wateree.* Her loss was three officers and thirty sailors and marines.

The American merchantman, *Rosa Rivera,* the English ship *Chancellor,* and the French bark *Edwardo,* were all lost.

The surviving inhabitants of the cities destroyed are in a terrible destitute condition.

UNITED STATES.

A New York dispatch of Sept. 12th, says that the steamer Hippocampus capsized on Lake Michigan on Tuesday night in a severe gale, and of sixty persons on board, only fourteen were saved. She was bound from St. Joseph's, Michigan, for Chicago.

The sculling race of five miles for $2,000 between Walter Brown and Henry Coulter at Pittsburg, on the 9th inst., was won by Brown who came in 2 minutes ahead. Time 32 minutes 45 seconds.

Hydock an English pedistrian walked one hundred miles in 22 hours, 45 minutes, near Troy, N. Y., ann Payne his competitor did the same in 23 hours and 37 minutes.

The amount of expenditure per head on the whole population of the United States is about $34 25 per head, man, woman and child. The expenditure of France amount to $22 per head; that of Austria to $16; of Great Britain, $11,28 per head; of Canada, $3.76 per head.

The yield of Gold from the mines of California is valued at $25,000,000 this year, and the wheat crop *at the same amount.* The grass crop is very great.

NEW YORK, Sept. 15.—The Print Works of the Washington Manufacturing Company at Gloucester, New Jersey, were burned yesterday. Loss half a million dollars.

Advices from South America state that a strange phenomena occurred on the night preceding the earthquake in the appearance of a brilliant light in the north-east, which was supposed to be a conflagration or a volcanic eruption. An enormous development of the electric fluid filled the air. In Brazil during the latter part of July a meteor was observed which disturbed magnetic instruments generally, the compass oscillating 15 degrees from north to west.

NEW YORK, 16th.—An application for a new trial of Whalen will be made to the Judge at Toronto in November on the ground that the challenge of Jurors was not allowed.

Fifteen thousand men of the Volunteer Canadian Rifle Brigades are encamped at Laprairie, Montreal, They will have a ten days shooting tournament.

Gold closed at 144½.

Missionaries and others sojourning in foreign lands should not fail to take with them a good supply of "Johnson's Anodyne Liniment." It is the most reliable medicine for all purposes there is in the world.

Contagious diseases, such as horse-ail glander, &c., may be prevented by the use of "Sheridan's Cavalry Condition Powders." Persons travelling with horses should take note of this.

RADWAYS' READY RELIEF is a household medicine, which no prudent family, that understands its value, will ever be without. It instantly arrests pain, and its effects, as a diffusive stimulant, anodyne, nervine in cholera, cholera morbus, bilious colic, spasms, fits, malarious diseases, &c., transcend those of any other preparation known. As an external application for burns, wounds, scalds, bruises, &c., it has no equal. Pass on.
