receive as his right that elementary instruction which will fit him for an intelligent discharge of his duties as a citizen of a great and growing Dominion. You have proclaimed the opening of the school-house doors and a free education to 20,000 schoolless children, who would otherwise have grown up in comparative ignorance. In the name and on the behalf of those 20,000 children I thank you. In the name and on the behalf of hundreds of poor parents whose children will now be taught at the expense of the property of the country, I thank you. And in the name of hundreds of devoted and laborious teachers, whose position and remuneration will be far more satisfactory than heretofore, I thank you. In the interests of our youth, who are provided with as good a share of natural endowments as any others in the world, I ask you to do all in your power, in your respective spheres, to give effect to the measure, and most sincerely do I hope that under its operation we may soon see in every part of the Province children of all denominations of Christians gathered into the same schools, sitting on the same forms, bravely competing for the same prizes, and forming youthful friendships to be continued in after years when the real life work is entered upon, and when all denominations inevitably gathered into the world's great school, and side by side competing for its rewards, no statesman could be found who could successfully resolve this great school with its denominational elements. For carrying on the business of the world the mutual relations of commerce and industry constitute the certripetal force which necessitates their coherence, and therefore you have acted wisely and well in providing that all who are growing up to take their part in such an inseparable union, shall be educated for it side by side in early life.

Again I thank you for your diligent attention to the public business, and I feel assured that in your respective walks of life you will not fail to inculcate those principles of loyalty to our Sovereign and our country which have hitherto been so warmly cherished by the people of New Brunswick.

BRITISH AND FOREIGN.

LONDON, May 12.—The *Times* of to-day is convinced that the basis and essential provisions of Treaty at Washington will be adopted by the American Senate, and therefore believes the Treaty is virtually concluded. As for the Treaty itself, it is the result of mutual concessions, and the *Times* finds in it nothing inconsistent with national honor, or that England was now ready to make a sacrifice to restore amity between two branches of the Anglo-Saxon family.

The health of the Emperor Napoleon is much better.

BERLIN, May 12.—In the German Parliament Bismarck said that the treaty concluded hastens the payment of the indemnity; half a milliard is to be paid in thirty days after the Versailles army enter Paris, and a milliard more before the end of December next. Then only will the Germans evacuate the Paris forts.

Ratifications are to be exchanged on the 20th instant.

LONDON, May 11.—In Paris Committee of Public safety, in proclamation, say Republic and Commune has escaped mortal peril. Treason has entered our ranks. Rossell's surrender of Issy was the first step, and opening of the gates of Paris was to follow.

Most of guilty are arrested and their punishment will be exemplary.

VERSAILLES, May 14.—Favre communicated to Assembly on Saturday the Treaty of peace with Germany, negotiated at Frankfort. The hardness of the terms occasioned much emotion among the members.

Commune troops attempted a sortie on Saturday, but the column was annihilated.

Commune has begun a thorough search of the city for arms and ammunition.

Government troops have occupied Vauvres, the garrison having fled. Fifty guns fell into their hands.

A despatch from Paris to-day reports the death of Auber, the musical composer, aged 89.

ST. PETERSBURG, May 14.—Active preparations are being made for campaign against Rhiva, a portion of Turkistan, the people of which country commenced war against Russia.

LONDON, May 15.—French advices of to-day show no change of affairs.

Yesterday a grand procession of woman headed by buglers and drummers, marched to the Hotel de Ville, and demanded arms.

A proclamation has been issued authorizing a female battalion to be organized immediately, to stimulate the men. All cowardly males are to be led to prison by females.

The women are to march against the Versaillists.

PARIS, May 15.—There is indubitable evidence that there is a wide-spread conspiracy in Paris for the overthrow of the Commune. The gardens of Luxembourg are closed to the public and occupied by the military, in anticipation of a rising.

LONDON, May 15.—In the Commons Viscount Enfield said Government was not prepared to state the exact terms of the treaty of Washington. Disraeli, therefore, postponed his question in relation thereto. Gladstone promised to instantly submit it on its arrival.

In the Lords, Russell notified that he would move an address to the Queen against the ratification of the Alabama Treaty, if the arbitrators are bound by rules other than the law of nations and English municipal law.

LONDON, May 16.—A telegram of to-day says, Government troops have entered Paris through the breaches at Porte Maillott and Auteuil. The entry of the troops at Port du Jour is imminent. Paris returns a feeble fire. The sounds heard are similar to those of a street fight.

The Berlin Royal Guards have been ordered to return from France, and make a triumphal entry into Berlin within a mouth.

LONDON, May 16.—In the House of Commons O'Connor Don motioned that it is inexpedient to continue force act in Ireland after date of its limitation, and Martin, member for Meath, denounced English tyranny in Ireland and claimed right of self-government for the Irish.

Gathorne Hardy and Chichester Fortescue, in consideration of the continued lawlessness in Ireland, opposed the motion.

In the House of Lords, bill making drafts and notes maturing on holidays and Sundays payable on following day was read twice.

PARIS, May 17.—The Communists made a sortie last night in the Bois de Boulogne but were forced to retreat with heavy loss.

Communists to-day split into factions. Each one is at open war with the other.

The column Vendome was levied at six o'clock this evening. It fell lengthwise into Rue de la Paix.

UNITED STATES.

NEW YORK, May 15.—Washington correspondents agree that the new Treaty will be adopted by the Senate without amendment. It comes before that body to-day, but the discussion will probably last a week.

NEW YORK, May 16.—The Senate to-day is in secret session, discussing the Washington Treaty. It is generally believed it will pass without amendment.

NEW YORK, May 17.—The new Treaty was considered in the Senate yesterday, the session being occupied in investigating the manner in which the Treaty was surreptitiously made public in the *Tribune*. White and Romsdell, *Tribune* reporters, refused to explain, and are to be proceeded against for contempt.

The Homestead bill has passed the Assembly at Fort Garry. Its provisions are very liberal, one clause protecting debtors going from Ontario against their creditors for five years.

Foreign exchange firm.

Cable advices to-day detail destruction of the column Vendome. It fell in three pieces in the square in which it stood. It will henceforth be known as the Place Internationale.

Anarchy prevails through Paris.

Gold 111¼. Sight Exchange 110¼.

The most serious subject on which man can meditate is the maintenance of good health in himself and family. In this changeable climate of ours it is of the utmost importance at once to banish the slightest cold. The confirmed consumptive patient knows now that when he was assailed with his first cough, if he had made use of Dr. Wilson's Pulmonary Cherry Balsam, he would now have been well. Subdue at once, then, that cough which is getting more and more confirmed every day you neglect using this remedy. Pain, Discomfort, and danger will then be arrested.

SPEIGHT'S

PATENT DESIDERATUM GLUE POT.

IT has hitherto been found in using any of the Domestic Glue Pots now before the public, that they have generally caused disappointment, for the Glue as soon as sufficiently heated, as speedily becomes chilled, owing to the cooling of the small quantity of water which can be used in melting the Glue. This inconvenience is avoided in the use of "SPEIGHT'S PATENT DESIDERATUM GLUE POT," where the Family Night Light not only dissolves the Glue, but will keep it in a hot and liquid state for several hours, and the necessity and manifest inconvenience is therefore obviated of having to place the Glue Pot on the bars of a hot grate or over a gas jet, as has been usually recommended, and is absolutely necessary in the use of any other Glue Pot. Another great improvement is the inner cup of porcelain which can be at any time removed for cleaning, and will be found equally useful for dissolving Gum, Isinglass, Gelatine, or any other adhesive agent.

The advantage of having a Glue Pot, the separate parts of which can be removed and cleaned, and when necessary renewed, is sufficient alone to recommend the article to public use, and altogether will be found of a character immensely superior to any other of the Domestic Glue Pots hitherto supplied, and will be admitted as a DESIDERATUM IN EVERY HOUSEHOLD, SHOP, OR COUNTING HOUSE.
