NEW FLAVORINGS.

THE great success of fine cookery of all kinds consists in the delicate and careful use of seasonings—in the mingling of tastes well joined.

A generation ago almost the only flavorings known in sweet cookery were Vanilla, Lemon, Almond, Nutmeg and Cinnamon. Today there are many dainty new flavorings, and the coarser spices are little used in delicate cookery. but are reserved for rich puddings and for savory dishes of meats and other places where they more properly belong.

The juices of various fruits, such as Apricot, Banana, Cherry, Limes, Orange, Pineapple, Pear, Peach, Raspberry, Strawberry, also Coffee and Rose have been added to the list of flavors in the last few years. Vanilla remains in use, as it has been for over a century. Lemon flavoring is not so much used as formerly, although there is always something of a popular fancy in this matter, and it will always remain a delicate and refreshing flavor for ice creams and cold desserts, but is not so well adapted for hot desserts as some of the above flavors. Coffee is one of the most delicious of the new flavorings; it may be used in custards, ice cream and charlotte russe. Essence of Limes makes a delicious flavoring for the icing of cake, as does also our Water-White Vanilla, for which it is especially adapted on account of its being perfectly pure and colorless.

Below we give a list of our Flavoring Extracts, all of which possess in a remarkable degree the true flavor of the fruits and spices from which they are compounded and are so highly concentrated that a very small quantity need only be used, and housekeepers will consult their own interests by insisting that their grocers furnish them with
