SUSSEX VALE RACES.

The annual Races came off on the 13th inst., over the usual course, the attendance numerous and the day fine, except an occasional shower to lay the dust.

The following entries were made for the Purse :—

William Lawrence's b. f. Jane Foggerty 5 years	1 1
John McLean's b. g. Fearnought, aged	2 2
Xenophan Caugle's b. f. ——— 4 years	3 3

Fearnought took the lead and was never headed until near the winning post, when Jane Foggerty drew gradually up and won by a few lengths. Second heat a repetition of the first. Time not taken.

Second Race for Colts 3 and 4 years old—heat.

Isaac Foshaw's b. c. Sultan 4 years	1 1
A. C. Evanson's b. f. ——— 4 years	2 2
James Scovil's b. c. ——— 4 years	3 3
F. Buckhannon b. c. ——— 2 years	4

This was an easy affair throughout, Sultan had it all his own way, he is a well bred Colt got by Prizefighter, out of a thorough bred mare.

The remainder of the day was occupied in running Sweepstake Matches, with untrained horses, and a great deal of amusement was the result. The large assemblage of persons present, expressed themselves highly pleased with the sports of the day.

MECHANICS' INSTITUTE.—We learn that the Lecture Session of this popular institution will be opened on the 10th inst., with an address by the Rev. Edwin Jacob, D.D., Principal of King's College. Several gentlemen of this City and Fredericton, distinguished for their talents and scientific acquirements, have also accepted the invitation of the Board of Directors to deliver lectures during the ensuing winter; and, from what we can learn, the course will be unusually attractive. The Institute has, very wisely, not confined its lectures to those branches of physical science alone which are of practical application in the arts and manufactures, but admit prelections of a lighter and more attractive kind upon subjects of popular interest, and by this means instruction is afforded to all its members. It gives us much pleasure to learn that all the Institute is now in a very prosperous state, and that its members are rapidly increasing. It has already exerted a highly beneficial influence upon this community in its ordinary operations, through its library, reading room, lectures, &c.; but should it see fit to pursue the course it has so successfully adopted during the present year, and establish a periodical exhibition of domestic manufactures, to encourage the development of native industrial talent, it is yet destined to become more permanently and exclusively useful.—*Witness.*

[From the Boston Chronotype.]

Consumption is the great curse of our Nothern latitudes and the blight of domestic felicity and the despoiler of beauty. It robs the cheek of its healthful bloom, the mind of its serenity, and the eye of its brilliancy. It wastes the form, dims the intellect, and plunges its victim into an early grave. The young and the old, the serious and the gay, the city belle, the country lass, are alike its prey and its victims. Blessings on the man, then, whose genius and research furnished us weapons to bid defiance to this "Dweller of the Threshold!" He merits the applause and gratitude of ages;—he shall have ours, at least.

One of the most important discoveries of modern science, for the cure of pulmonary affections, is the BALSAM OF WILD CHERRY, and the credit of its discovery is due to the celebrated Dr. Wistar.—This valuable compound has restored thousands of sufferers to health. It is expectorant, tonic and demulcent, and is said to be a purely vegetable preparation. Under its magic influence the most obstinate coughs, colds, and bronchial irritations disappear. We have used it, and can recommend it, particularly at this season, when the great cause of disease, east winds are so prevalent.

None genuine without the written signiture of I. BUTTS on the wrapper.
