COMPLETELY FREE OF CONSTIPATION

Tried for Years to Find Relief

"FRUIT-A-TIVES" GAVE IT

Chronic Constipation or insufficient action of the bowels, is one of the great causes of disease. Some authorities even claim that Constipation cannot be permanently corrected. This is a great mistake, because here is the proof that constipation can be cured and the bowels made to act regularly and naturally.

YARMOUTH, N.S.

"For years, I was troubled with Constipation, and had to take laxatives and purgatives all the time. If I neglected to take these, the bowels would refuse to do their work.

About two years ago, *a friend advised me to try "Fruit-a-tives"*, which I did. The first box helped me so much that I obtained further supplies of the remedy and continued the treatment. After using about eight boxes, my bowels were able to perform their particular function without aid.

The relief in my case has been lasting, as up to date, I have never had any further trouble. I can recommend "Fruit-a-tives" to all suffering as I did and I am sure they will derive equal benefit".

A. W. FRANKLIN.

"Fruit-a-tives" are sold by all dealers at 50c a box, 6 for $2.50, trial size 25c., or sent postpaid by Fruit-a-tives Limited, Ottawa, Ont.

What Happens to Old Railroad Ties

The railway passenger who sees piles of worn-out cross ties piled up and set on fire by repair gangs along the right of way sometimes wonders why this is done and asks why people are not allowed to use them for fuel. The Pennsylvania Railroad has issued an information pamphlet dealing with this subject which states:—

"In the first place, it is far from true that all the old ties are burned. A considerable number are constantly being sold to persons living on or near the right of way, who buy them at nominal prices, usually ten or fifteen cents apiece, and use them for firewood.

"That is about as far as the railroad company has been able to go, thus far, in finding an outlet for worn-out ties. Such a method of disposal is practicable only in those cases where the ties can be delivered at a public crossing, or other point where they can be obtained safely by the users, and where the cost of so delivering them is not greater than the nominal prices obtainable.

"The Company cannot sanction the public going promiscuously over tracks and through yards to gather up old ties. To do so would be practically letting down the bars against trespassing on the tracks, an evil which has been the cause of about half of all the fatal accidents on railroads in the United States.

"Efforts have been made to interest dealers in firewood in buying the old ties, but not thus far with much success. The causes appear to be that the old ties are often dirty; that they contain more or less stone, grit and slag wedged in the cracks, which might injure the saws used in cutting them; that in many cases they are partly decayed; that they are dried out, and that their fibre is more or less crushed, so that they burn out too quickly. These are among the reasons assigned by dealers who have not been willing to pay the railroad company enough to cover the cost of collecting the ties and delivering them to a point at which they could be removed.

"Efforts have also been made to dispose of old ties in a number of other ways, including sale for wood-pulp purposes, for the extraction of chemicals, for burning and sale of the ashes for fertilizer, and for manufacture into charcoal, but without success in interesting parties engaged in these occupations.

"The Company will be glad to continue, and wherever feasible to extend, the present practice of selling old ties to individual consumers for nominal prices at points where they can be delivered without danger to the purchasers and without costing, for collection and transportation, more than they are worth as fuel. The management will welcome any other suggestions by which more of the old ties can be usefully disposed of or made available for commercial or industrial purposes."

The Canadian Pacific Railway goes further than the Pennsylvania Railroad and gives away ties to any who will take them, such giving being surrounded with the necessary safeguards as to trespassing. The experience of the Canadian Pacific is that ties are taken only where there is no standing timber in the vicinity, and that in many cases the farmers taking the ties do not use them for firewood but for general purposes around the farm, indicating that the value of old ties as firewood in this country is extremely small.

REVENGE IS SWEET

She was sitting out at a village dance in the parish hall, when a well-meaning but rather rustic youth saw a spider running over her lace collar. "Permit me," he murmured, as he bent to remove it.

"How dare you speak to me without an introduction, sir?" she blurted out.

Here the spider reached her neck, and cried out: "Oh, take it off! Oh, please do take it off!"

The young man only said—

"I couldn't think of it, miss; I haven't been introduced to the spider."

Got No Sleep

But now the neuritis has gone, the pains have ceased, the nervous system is restored and the writer of this letter pays a grateful tribute to the medicine which made him well.

Mr. John Woodward, P.T.O., Lucan, Ont., writes:

"It gives me much pleasure to recommend Dr. Chase's medicines, especially the Nerve Food. I was a sufferer from neuritis for several years, and tried all kinds of remedies, yet never seemed to get any better. At last my nerves and whole system seemed to give way through not being able to get any rest or sleep at nights for pain, which mostly used to take me in all parts of the limbs and feet. My nerves would twitch till my whole body would seem to jerk right up as I lay in bed. Almost at the point of despair, I decided I would get Dr. Chase's Nerve Food, which I did, and after taking twenty boxes I believe myself almost normal again. I also keep a box of Dr. Chase's Kidney-Liver Pills on hand, and for the past year I seem to enjoy my usual health."
