THE FISHERIES.

On Saturday last, a Requisition to the Sheriff appeared in the *Courier*, requesting him to call a Public Meeting to consider the propriety of memorializing her Majesty's Government on the subject of the Fisheries, and to protest against any negociations being completed with the United States without the concurrence and approval of the Colo-

at noon, in the Court House, and the subjoined Resolutions brought forward by the Hon. John Robertson; to which the Hon. Charles Simonds moved the succeeding amendments. The other speakers on the occasion were F. A. Wiggins, Geo. G. Gilbert, Wm. Jack, Esquires; Capt. Coughlan, and Mr. B. O'Brien. The Sheriff was called to the chair; and at the close, the Chairman announced that the amendments were lost—47 to 43.—It was our decided impression, and in which several others concurred who were present, that if the number of votes had been carefully taken, the decision would have been the reverse to that which has been announced.—For ourselves we will reiterate, that Reciprocal Trade, and our Fisheries, are entirely different matters, and should be treated as such. The latter are clearly our own, and we are in some hope that the Government of our gracious Sovereign will yet see the propriety of allowing those inexhaustible sources of wealth to the Colonies, to remain as they are, and strictly adhere to the convention with the United States of 1818.

Moved by the Hon. John Robertson, seconded by F. A. Wiggins, Esq.—

Resolved, That this Meeting consider the Coast Fisheries of the North American Colonies the natural right and property of the inhabitants thereof, and that they should not be alienated, conceded, or affected, *without* their consent, in any negociation with the United States Government, or any other Foreign Power, without their consent—inasmuch as the value of the fisheries to the British Provinces, with an increased and increasing population, cannot be estimated aright at the present time.

Resolved, That the Meeting view with deep anxiety and concern the announcement in her Majesty's Speech to the Imperial Parliament, that negociations are now pending between Her Majesty's Government and that of the United States relative to the Fisheries of the North American Provinces; and also the recommendation of the President of the United States, in his official Message to Congress, to negociate a Treaty for a participation by the Citizens of the United States in the said Fisheries, irrespective of any question of Reciprocal Intercourse between the United States and the North American Colonies.

Resolved, That a Committee be now appointed to prepare an humble Address praying that Her Majesty will be graciously pleased to refuse to entertain any proposition from the United States Government, for any modification or alteration of the Treaty of 1818, unless such a proposition embraces the full and entire question of Reciprocal Intercourse in Commerce and Navigation, upon terms that will be just and reasonable, inasmuch as the value of a participation in our Fisheries by the Citizens of the United States, would greatly exceed any concessions that the United States Government can offer to the Inhabitants of the British Colonies, and that before any Treaty affecting the Fisheries is agreed upon, Her Majesty will be graciously pleased to afford Her Majesty's Loyal and Faithful Subjects in the Provinces, an opportunity of becoming acquainted with the terms proposed in said Treaty, and of laying their case at the foot of the Throne.

HON. MR. SIMONDS' AMENDMENT.

Whereas, It has been recently announced from the Throne, that negociations are pending between Her Majesty's Government and the Government of the United States, for the regulation of Trade and the settlement of what is termed the Fishery Question, about which no question ought to be raised; and whereas, it is to be feared that in the progress of those negociations, Colonial interests will be lost sight of, and Imperial interests alone regarded. And whereas it is manifest that the North American Colonies cannot receive by any Commercial regulations, any equivalent for the cession of their invaluable in-shore Fisheries.

Therefore Resolved, as the opinion of this meeting that considerations of Free Trade or Reciprocal Trade, ought not in any way to interfere with the all important rights of the Colonists to the Fisheries on their coasts, which Fisheries being a great branch of Colonial industry and not of Trade, are with our increasing population, daily becoming more important and essential to our prosperity; and this meeting believing that if those rights are conceded, they will never under any circumstances be restored, therefore protest against any such concession, as one which the Imperial Government, or Parliament, have no right to make.

Resolved, That Free Trade or Reciprocal Trade between British subjects at home or abroad, and the citizens of the United States, will be as advantageous to the Citizens of those States, as to British Subjects, and probably more so, therefore, to obtain this Free Trade, or Reciprocity, no sacrifice of Colonial rights unconnected therewith, ought to be made; and further this meeting are of opinion that high considerations of national policy call loudly upon the Imperial Government to preserve to British subjects inviolate all the rights to the Fisheries on the coasts of British North America which they now possess, and if any doubts existed upon this part of the subject they will be dispelled by reference to a negotiation which was pending between the Governments of Great Britain and the United States in the year 1845; at this time the American Minister in London urged as a reason to British Statesmen why they should concede the right of fishing on all Coasts and Bays of British North America, to the Citizens of the United States, that if this right was conceded to them, it would greatly facilitate their means of increasing their Mercantile and Public Marine, the truth of which is obvious to all who think upon the subject, and should have opened the eyes of Her Majesty's Government to the vast magnitude of the concession sought for, which if made, would assuredly at no distant period enable the Great Republic to become the first Naval Power and Great Britain of consequence only the second, if not still lower.

And further Resolved, That if the right of fishing on the coasts of British North America are conceded to the Americans for the supposed advantages of Free or Reciprocal Trade, it will be another instance, added to many more within the past two hundred years, in which Colonial interests have been sacrificed to benefit the Manufacturers and Merchants of England.

Moved by Dr. Botsford, seconded by R. Bayard, Esq.—

Resolved, That the Chairman, the Hon. John Robertson, John Wishart, Wm. Jack, and F. A. Wiggins, Esqrs. be a Committee to prepare the Address to be signed by the Chairman on behalf of the Meeting, and forwarded to His Excellency the Lieutenant Governor for transmission through the regular official channel.

The Chairman on motion left the Chair, and the Hon. John Robertson was called thereto, whereupon

Resolved, That the thanks of this Meeting are due and be tendered to Charles Johnston, Esq., for his able and impartial conduct in the chair.

D. B. STEVENS, *Secretary*.

FIRE.—Yesterday morning, about 5 o'clock, a fire was discovered in the kitchen in the rear of the premises occupied by G. F. Rouse, Esq., and owned by Mr. John Doherty, formerly known as the Commercial Hotel, King street. The Engines were promptly on the ground, and speedily put a stop to what appeared at first sight the commencement of a most alarming fire. We learn the fire originated from ashes being put in a barrel within the premises.

PHRENOLOGY, &c.—We beg leave to direct the attention of our readers to the advertisement of Mr. Emory Newton, who comes to this Province well recommended as a scientific and popular lecturer, and whose attainments justly entitle him to a large share of public patronage.

MECHANICS' INSTITUTE.—George Hatch, Esq., delivered an excellent lecture on Monday evening last, to a large and respectable audience. We understand there will be no lecture on next Monday evening.

BARBAROUS MURDER OF DR. MCGREGOR IN CALIFORNIA.—It will be remembered, that this unfortunate gentleman left the Island in the fall of 1851, for the above place, where he arrived in safety. He commenced practice as a medical man in Sonora, shortly after his arrival, and was successful in business. On the night of the 20th Sept. he was induced to leave his home, in consequence of a requisition from three persons, calling on him to visit a woman sick in the city. After

in an alley, he received, a wound, by a stab, in the breast, which must have caused instant death. The body was found the next morning. The perpetrators of this brutal murder, and the inducement to commit it, are unknown; but it was conjectured that jealousy at Dr. McGregor's having obtained the situation of medical attendant to the hospital led to the commission of the crime. Dr. McGregor was well known and much respected on this Island. He had been a member of the Provincial Parliament. As a medical man, he gave much of his time and services gratuitously.—*Prince Edward's Island Gazette.*

HYMN FOR CHRISTMAS.

Again we hear the Church's voice
Summon her children to rejoice,
And with triumphant songs proclaim,
Her bridegroom's ever blessed name.

Again, in thought, we speed our flight,
To Bethlehem, where silent night
Re-echoes with the joyful strain,
Immanuel begins to reign.

Angelic hosts to shepherds bring,
Glad tidings of their Heavenly King,
Good will to men, and peace on earth,
Announce the long expected birth.

The promised Day-spring from on high,
For fallen man descends to die;
Seed of the Woman, who should tread,
Triumphant o'er the Serpent's head.

With grateful hearts your voices raise,
To sing the great Redeemer's praise;
Let the glad earth, from shore to shore,
His Name exalt, 'till Time's no more.

Harvey, A. C. RUSTICUS.

Lectures on the Mind.

EMORY NEWTON, a Practical Phrenologist from Massachusetts, respectfully informs the Citizens of St. John, that he intends to give a Course of Lectures upon the *Nature of Man*, in the *Hall of the Mechanics' Institute*, commencing on TUESDAY EVENING, Dec. 28.

On the first evening after a short lecture upon Physiognomy, many Phrenological examinations will be given, and the leading traits of character described to any Ladies or Gentlemen who may be pleased to come forward for that purpose, or of any well-known individual that may be selected by the audience to test the truth of Phrenology.

Mr. N. will use the utmost endeavours to make the lectures both beneficial and interesting. ☞ Price of admission, 7½d. Dec. 23.

Soap & Candle Manufactory.

THE Subscriber deems it necessary to apprise his Customers and the Public generally, that in consequence of a late decision of the Police Magistrate, he is compelled to erect a temporary fence for the present, in front of his Warehouse, in Water Street, between the Ferry Landing and the Fish Market, until a building is got ready, and that there will be an entrance gate in front, and also one to the South, next the Store of Messrs. McMorran & Dunn.

He also considers it necessary to apologize to the Public for the inconvenience they will necessarily suffer, as well as himself, at the same time most respectfully begs to call their attention to the fact, that all Laws are enacted for the good of the people; (?) (or rather intended to be so,) but when administered tyrannically, or from ignorance, they create jealousy and distrust, and people become subservient to the Laws, more from dread and fear, than love and respect, so pre-eminently due to Law and order by every well regulated mind.

And that a change rests with the Citizens themselves. GEO. WOODS.
