Waterford, Sept. 12.—The Mountaineer, steamer, for St. John, has taken down her funnel; there are some carpenters at work to enable her to go out the more safely under canvas.

SHIPWRECKS.—*The following Marine Disasters bespeak the extent of the gale on Thursday last elsewhere referred to by us. It is a matter of thankfulness to God, that, so far as yet known beyond the sad occurence noted to-day, no lives have been lost. We give the accounts of those several wrecks, as accurately as is possible, from the information received at this distance from the different places where they took place:—*
Barque Isabella Stewart, Norton, Master, of St. Andrew's wrecked at Bridgeport Bay.
Barque Ortolan, Russel, Master, of London, wrecked at Cranberry head.
Barque Maidstone, Mathersill, Master, of Rochester, laden with railroad iron, and bound for Quebec, wrecked at Glace Bay.
Barque Devope, Williams, Master, of London, wrecked at the same place.
Brig Cyrus or Sarah, from Pugwash bound to Liverpool, timber laden, wrecked in Mira Bay.
Schr. Royal Tar, Nearing, drove on shore in Main-a-dieu harbour, and became a total wreck.
Brig Paragon, hence for Newfoundland, dismasted off the harbour and put into port.
A Schr. belonging to Arichat damaged whilst lying at the Loading Ground, North Sydney.
We learn that during the recent heavy gale, over a hundred boats, belonging to Main-a-dieu, were out fishing for dogfish, named by fishermen of that place; but most gratifying to relate, without an exception the boats reached the harbour in safety, with their respective crews unharmed. These fishermen had been particularly successful on that day, but were obliged to throw overboard all their catch, amounting in value, it is computed, to upwards of two hundred pounds.—*Cape Breton News.*

NOTICE TO MARINERS.

THE Commissioners of Light Houses hereby give notice, that an Iron BELL BUOY, painted Red (similar in all respects to the one off the Port of Liverpool, England,) was placed off this Harbour on the 28th September last.—The following are the Bearings by Compass and distances from the Buoy to the several points named, as given to them by Commander Shortland, of H. M. steamer Columbia.

Bearings nearly.	*Distance.*
	miles.
Cape Spencer, S. 59 E. or S.E. by E. ½ E.	—
Cape Mispeck, S. 62 E. " S.E. by E. ½ E.	3.8
Partridge Island Light House, N 21 E. " N.N.E.	1.5
Sheldon's Point, N. 49 W. " N.W. ½ W.	1.8
Mahogany Island, S. E. Point, N. 76 W. " W. by N. ½ N.	2.1
Cape Negro, (Negro Head,) S. 81 W. " W. ½ S.	4.4
Cape Split, (Split Rock, Musquash.) S. 18 W. " W. by S.	—

The Buoy is anchored in 7½ fathoms, Low Water Spring Tides. The Bell is 19 feet above the water.
By Order of the Commissioners.
I. WOODWARD, *Sup't.*

GEORGE THOMAS,
Oct. 8. South Market Wharf.

Prospectus of Volume VIII., of the SCIENTIFIC AMERICAN.

THE Eighth Volume of the SCIENTIFIC AMERICAN commences on the 18th September, and as a great proportion of our readers usually commence their subscriptions at this point, we take occasion to extend them our gratitude for the encouraging and liberal support heretofore bestowed on our humble efforts, and to re assure them of our determination to advance it still higher in the scale of utility, and, if possible, in their own estimation. We aim at an honorable independence in discussion upon all subjects, and, in some instances no doubt, our readers may have been surprised at our determined opposition to highly lauded discoveries in the Arts and Sciences.
Time tries all things, and it is with some degree of pride that we revert to the efforts made through the columns of the Scientific American, to establish sound views respecting several conspicuous miscalled discoveries. Since the commencement of this Volume, that peerless Exhibition of the Industry of all Nations closed its gorgeous display, affording a delightful episode in the stern page of the world's history. Above and beyond all criticism it has passed away, leaving a world-wide influence, beneficial to every branch of industry and although not profusely represented by gew-gaws and tinsel,—the character of our country shone forth with magnificence in all the elements of substantial utility. Acting under the stimulus suggested by the success of the Great Exhibition, the enterprizing citizens of New York have determined to construct a Crystal Palace of no mean dimensions, and as this is likely to become an important feature in our history, we shall endeavour to present our readers with descriptions and illustrations of such novelties as may be deserving attention.
The present form of the Scientific American will be preserved as most suitable for binding and preservation. The paper will be of the best texture, and we shall aim to store its pages with practical knowledge in every branch of the Arts and Sciences. Invention claims important attention, as one of the fundamental agencies in the world's advancement; hitherto we hope to have satisfied our readers by our weekly summary of "New Inventions." The Weekly List of Patent Claims, officially reported for our columns, is a distinguishing feature, which must commend itself to every one interested in Patents.
We need the co-operation of our readers to enable us to publish a journal, worthy of their support, at two dollars per annum. We have never appealed to them in vain, and the Premiums offered for the largest list of subscribers will, we presume encourage new efforts. All subscriptions are payable in advance.
We repeat our warning against Travelling Agents, as none are accredited from this office.
Letters should be directed (post-paid) to
Munn & Co.,
128 Fulton street, New York.

THIRD DIVISION OF PROFITS

MINERVA
LIFE INSURANCE COMPANY
OF LONDON,
ESTABLISHED, 1806.

AT the Third Quinquennial Meeting of this Company, held in London, 24th June, 1852, a Surplus of £42,200 Sterling, (being four-fifths of the Profits) was declared to be the Divisible Surplus among the Policy holders entitled to participate. This sum allows of a reduction of Premium for the next five years, of £19,633 10s. 3d. Sterling, per annum, or an equivalent reversionary Bonus payable at Death, of £68,949 10s. 7d.
The reduction of Premium averages 35,22 per cent. on the Premiums payable during the next five years.
The reversionary Bonus averages 60 per cent. on the Premiums received during the last five years, or 3 per cent. on the sums Assured.
Upon the Policies which had been full five years in existence, the reversionary Bonus averages 2 1-2 per cent. Premium on the sum assured, a result which has been seldom equalled, and will bear comparison with that of any Office.
The following Table illustrates the Bonuses declared:

		Average Reduction of Premium.	Average Reversionary Bonus
1st Division—	1812	16.833 per cent.	21 per cent
2d, "	1817	21.333 "	33½ "
3d, "	1852	35.22 "	60 "

On the 31st December last, the Existing Assurances were	£1,699,843	10	2
The Capital Funds of the Company were	230,262	15	6
The Annual Income was	47,721	2	6
The Divisible Surplus was	53,000	0	0

The Directors consider, and trust the Policy holders will agree with them, that the position of the Company is highly satisfactory, and hope that, taking into account the continually increasing competition they have to encounter, the progress of the Company has equalled their expectations, as the benefits actually realized equal, and in most cases surpass, those afforded by the largest established Offices.
Prospectuses, Forms of Proposal, and every information may be obtained from
