other crew continued over the course, and won the race, in a little over 39 minutes. The death of Renforth hes excited the sympathy of all classes, and cast a gloom over the whole community. Flags were hung at half-mast on all the staffs in the city during the afternoon. An inquest is now being held at the Court House on the body of the deceased.

There were 9,000 Railway tickets sold at the St. John office for the boat race Wednesday. Taking into consideration the number who came by rail from the east, those on steamers and woodboats, and those who rode and walked to the scene, it is a fair estimate to put the number of spectators of the race at 15,000. The 9,000 persons were carried to and from the Course without the slightest accident.—*Tel.*

ARRESTS.—Two men were arrested on Wednesday on suspicion of robbing Mr. Geo. Ford of $1000 on the cars Tuesday. They are now known to be professional thieves. On the person of one was found $1000 in greenbacks. One of the two contrived to slip a gold watch into the pocket of a policeman's coat that was hanging against the wall before his person was searched. The watch has been identified by Mr. Rainie, of Fredericton, as having been stolen from him at Riverside Station yesterday morning. On the person of one of them was found a gold watch, which has not yet been identified.

On the arrival of one of the trains from Riverside yesterday, a person who seemed to be endeavouring to escape in the crowd was pointed out to a policeman as a thief. The policeman followed him and effected his arrest. A gold watch, found on his person, was identified as belonging to a Moncton gentleman from whom it was stolen in the cars Wednesday. The prisoner is also charged with having snatched a $5 bill from a person's hand at the Kennebeccasis, and is known to be a thief.—*Tel.*

CROPS IN KING'S COUNTY.—Bro. G. W. Sharp, writing from Springfield, under date Aug. 17th, says:

The weather is unfavorable for hay-making; it is raining very hard to-day. Yet hay is full more than an average crop in this part of the Province. Crops of all kinds have grown well this season, and bid fair to yield accordingly. I see in some places that the rust is coming on the potatoes."

THE FINANCE MINISTER'S visit to St. John has produced a most favorable impression in mercantile, banking, political and social circles. Sir Francis' arrangements were marked by the utmost courtesy and consideration. He showed an intelligent disposition to meet all reasonable demands upon the government. He left by the Digby steamer on Monday for Halifax, and the government may well congratulate themselves on the fact of Sir Francis having made an official visit to the city.—*Tel.*

DANGEROUS BRIDGE.—The draw-bridge at Musquash is in a dangerous state of rottenness, and is very unsafe in the opinion of the inhabitants. The supervisor proposes to put in new sleepers and planking, over the rotten abutments, regardless of the remonstrances of the people, who are most indignant at the risk of life to which they are to be subject. The Board of Works should have the abutments inspected by a practical man immediately, and ascertain the true state of the structure before the expenditure of any money on it.—*Tel.*

SERIOUS ACCIDENT.—We learn that on Monday, as Mr. William Pugsley, of Sussex, accompanied by his son, Mr. W. Pugsley, Attorney, of this city, and Miss Pugsley, was driving to Sussex Station to catch the train for St. John, the horse stepped on an old tin pan that was lying in the road; the pan flew up and struck the animal, which frightened, ran away, breaking the shafts and throwing the occupants of the carriage to the ground. Miss Pugsley escaped without injury; Mr. W. Pugsley had his clothing torn and received slight injuries to his hands and knees; Mr. Pugsley, senr., was more seriously injured in the fall from the carriage—so much so, in fact, that the attendance of Dr. James Christie, of this city, was called for.—*Tel.*

NEW FOUNDRY IN YARMOUTH.—Messrs. Burrell Johnson & Co., Iron Founders and Machinists Yarmouth, N. S., are erecting a fire proof building 100 feet long by 45 feet wide, the machine and boiler shops are nearly completed. There are a large quantity of cooking stoves, steam engines, mill work and machinery of all kinds manufactured in their establishment. Our correspondent, who refers to the new building, says:—Mr. Burrell showed me a large new cooking stove especially adapted for soft coal. There is attached to it a hot water reservoir and hot closet. Inside the oven is an improvement for basting meat or fowl, which is one of the modern improvements. The firm give employment to a great number of men, and will employ more when they have their establishment completed.—*Tel.*

The Queen's speech acknowledges with satisfaction the provisions made by Parliament for the Princess Louise and Prince Arthur. It announces relations of Great Britain with all Foreign Powers is of friendly character. The Treaty of 1854, having been revised by the Conference recently held in London hope is expressed for continued tranquility in the East. The speech dwells with satisfaction upon the Treaty of Washington and hopes for a general recognition of principles for guiding the maritime conduct of neutrals. Full reliance is placed upon the disposition of the Americans to carry out all the provisions of the Treaty. The Commons are thanked for the liberal supplies they have granted. The extraordinary powers granted for the repression of agrarian outrages in Westmeath have thus far answered their purpose, while in other portions of Ireland there is a gratifying immunity from crime. Remainder of speech is devoted to topics of local character.

A great many people have asked us of late, "How do you keep your horse looking so sleek and glossy?" We tell them, its the easiest thing in the world; give *Sheridan's Cavalry Condition Powders* two or three times a week.

A gentleman in the eastern part of the state, who was about having his leg amputated on account of its being bent at right angles and stiff at the knee, heard of *Johnson's Anodyne Liniment.* After using it a short time, his leg become straight, and is now as serviceable as the other.

Dr. Wilson's Pulmonary Cherry Balsam combines both tonic and expectorant powers in a high degree. By the former term its ability to prevent weakness is understood, and by the latter its capability to cast off all noxious matter. With this remedy at hand, no invalid need be at fault to keep himself or herself free from many pulmonary disorders to which they are subject during our long and inclement winter. Coughs, Colds, Whooping Cough, &c., can be successfully treated by taking this Balsam. During close and heavy weather, asthmatic sufferers will experience the utmost possible relief by simply using this remedy.

Many impurities enter the human body during the summer, from the decomposition of animal and vegetable matter which often taint the air and render the water noxious. The good qualities displayed by Dr. Wilson's Anti-Bilious and Preserving Pills in searching out and expelling all pernicious particles from the system, constitutes them the best medicine for averting Indigestion, Bilious Attacks, Diarrhœa, Cholera Morbus, and all the various afflictions of the alimentary canal constantly recurring in our variable climate.

Sprains, Stiffness of the Joints, &c., of the most formidable character have been cured by Dr. Dow's Sturgeon Oil Liniment. Rheumatic Pains which have proved incurable by any other known embrocation, have yielded under the stimulating powers of this excellent Liniment. The power of this remedy enables it to cope with all external pains, and to cure, or at least to relieve, martyrs to Rheumatism.

Clark's Derby Condition Powders are now extensively used, and, as far as we can learn, with universal satisfaction.

From observations under the Microscope of the blood of patients using Fellows' Compound Syrup of Hypophosphites, taken from time to time, positive proof has been obtained of the steady removal of diseased and dead blood particles and the substitution of vitalized discs, so necessary to the construction of healthy muscle.
