THIS AND THAT.—Rev. Mr. Pope (Baptist) baptized four persons on Sunday.....Bishop Sweeny gave a temperance address in St. Malachi's Hall, Portland, last Sunday evening.....Wm. Welsh, Esq., for many years President of the Y. M. C. Association of this city, left for Liverpool on Monday last, there to reside. Previous to his departure he was presented with addresses and testimonials from the Y. M. C. A., the Evangelical Alliance, the Officers of St. David's Church, of which he was a member, and from his S. S. class. Mr. Welsh is a most estimable gentleman, has been actively interested in every good movement, and will be greatly missed. We wish him abundant success in his new home.

☞ Mr. Beecher is now undergoing cross-examination. Mr. Fullerton is said to be exceedingly skilful in cross-examination, but he has not yet succeeded in making Mr. Beecher change in any respect his direct testimony. If any change is noticeable it is in the direction of more deliberate and emphatic denials of the charges against him.

☞ Rev. J. N. Barnes, who is now laid aside from preaching for a time at least, purposes visiting different parts of the Province, as his health and the weather may permit; and he has consented to act as Agent for the INTELLIGENCER where he goes. He will collect from present subscribers, and will also solicit new names. Money paid to him will be the same as it paid to us.

☞ We have received from Mr. Geo. W. Day, a copy of an act to provide for Garnishee or Trustee Process; and an act to amend the attachment and abolition of imprisonment for Debt Act. Price 25 cents.

HARPER'S MAGAZINE, with the May Number, completes its fiftieth volume and its twenty-fifth year. This number is one of unusual interest. The *Editor's Easy Chair* in a few words points, with just pride, to the past of the Magazine, especially its immediate past; but this number is more occupied with the celebration of the national glory than of *Harper's* well-deserved prosperity. James Parton contributes to this Number an article on "Caricature in the Puritan Period," with fourteen rare and curious illustrations. Professor Charles Rau contributes a second illustrated paper on the "Stone Age in Europe," this month treating of remains found in caves. The Hon. S. S. Cox continues his illustrated papers on American humor; and Emile Castelar contributes another installment of his series on the Republican Movement in Europe. The Editorial Departments are, as usual, full of interesting and instructive matter.

"IT IS PERFECT," is the brief criticism of thousands of our best music teachers after an examination of CLARK'S NEW METHOD FOR THE PIANO FORTE—a work which is rapidly superseding methods heretofore in vogue—sent by mail for $3.75. To be had at book and music stores. Lee & Walker, publishers, Philadelphia, Pa.

"Horse Men," and others who pretend to know, say that the following directions had better be observed in using "Sheridan's Cavalry Condition Powders:" Give a horse a table spoonful every night for a week; the same every other night for 4 or 6 nights; the same for a milch cow, and twice as much for an ox. The addition of a little fine salt will be an advantage.

We have heard recently of several severe cases of spinal disease cured by "Johnson's Anodyne Liniment;" one case of a man forty-five years old, who had not done a day's work for four years. The back should first be washed, then with a coarse towl. Apply the Liniment *cold*, and rub in well with the hand.

CONSUMPTION.—How much thought has been bestowed and what ponderous volumes have been written on this direful malady, which can be relieved; and if the lungs are not irretrievably injured through neglecting to use this remedy, can certainly and safely be cured by this soothing preparation. Dr. Wilson's Pulmonary Cherry Balsam acts directly upon the diseased part, and so controls and commands the disease, that harmonized nature can effect a cure. Consumption can now no longer be the bugbear of the sufferer, since this Balsam is fully competent to subdue the most harassing cough, and restore the miserable sufferer to health and strength.

A WORD TO HORSEMEN.—Dr. Dow's Sturgeon Oil Liniment has been tested by the first horsemen of this country, and proved to be superior to any other. Dr. Dow, the inventor, knows all about horses, and has had some of the finest horses in this Dominion in his possession. All who own or employ horses are assured that this will do all a Liniment can do. Always have a bottle in your stable.

The changes of weather and season, with the change of labor, often have a great effect upon the blood and sinuous fluid of horses. It is at these changes that they require an assistant to nature to throw off any disorders of the fluids of the body that may have been imbibed, and which, if not attended to, will result in Yellow Water, Worms, Heaves, &c., all of which may be prevented by the use of Clark's Derby Condition Powders.

Mr. H. N. Phelps, blacksmith, Elora Ont., got his knee hurt by the kick of a horse. It had long continued weak and painful until he used GRAHAM'S PAIN ERADICATOR, and was cured by a few applications.

THE NEXT BEST THING TO HEALTH.—Next to possessing good health we may fairly rank the means of acquiring it. This is not to be done by stimulating the organs into a false appetite or momentary vigor. Those who resort to such expedients will find that they eventually increase the evils they wish to remove. But it is to be effected by creating a new tone in the stomach, by purifying the blood, and altering the secretions. Then the first symptoms of returning health will be felt in a glowing elasticity of spirits, and a relish for labor, whether bodily or mental, which is always characteristic of a sound body. Make the experiment, then, and as the best means of ensuring success, try Dr. Wilson's Anti-Bilious and Preserving Pills.

CHALONER'S ANILINE DYES.

The subscriber, who is the originator of this excellent method of putting up Aniline Dyes, being jealous of his own rights, begs to caution the public against imitators, who, not having talent or influence enough to originate useful articles, can only follow in the wake of others, and endeavor to wedge in their trash upon good natured customers. The grand principle which underlies imitations of inventions is covetousness, and it can be easily seen that the same principle leads to the deterioration of the production, either in quantity or quality, or both. In order, then, to be on the safe side, deal in Chaloner's Aniline Dyes only; they are put up in colored packets, which correspond as nearly as possible with the shade of dye they contain. A maximum supply is always on hand, so that there is no need of any other makers. The proprietor does not wish these remarks to be applied to Messrs. T. B. Barker & Sons, Hanington Bros., or Geo. Stewart, Jr., as they have had from the first an understanding to put up Rosaine under their own names. Chaloner's Aniline Dyes are for sale by nearly all city druggists and merchants, and direct by
