M. De Lesseps' mission seems to be to change the geography of the world. He now proposes to form a Company to carry out the recommendation of the French Commission to form an inland sea in Tunis, asking only from the State a concession of forests and lands that are now valueless.

Endeavor to be always patient of the faults and imperfections of others; for thou hast many faults and imperfections of thine own that required a recipocation of forbearance. If thou art not able to make thyself that which thou wishest to be, how canst thou expect to mould another in conformity to thy will.

Queen Victoria does not think it too great a condescension for royalty to compete for prizes at fairs. She has recently won, at the Birmingham Cattle and Agricultural Society's exhibition, a premium of $50 for a shorthorn Hereford from her Windsor farm. She will take the prize in the form of a cup of that value, and has asked to be allowed to select personally one from a number of designs of cups.

Sherman to accompany the Vice-Regal party, states that the request for an escort to accompany the party from San Francisco to Texas was made by him to the War Department without solicitation or knowledge of the Marquis. Colonel Tourtellotte thought the party would enjoy the trip better and feel less nervous in the Indian country some such precaution was taken.

The term of service of David Dudley Field's son-in-law, Sir Anthony Musgrave, as Captain-General and Governor-in-Chief of Jamaica, having expired, a memorial has been addressed to the British Secretary of State for the Colonies praying for an extension of Sir A. Musgrove's period of office on account of his great popularity and the exertions he has made to promote the interests of the colony. Lord Kimberly, after full consideration, has, however, decided that it is not expedient to accede to the request.

On Tuesday evening the Newcastle spool factory was burned. The main building was destroyed, the boiler and engine house slightly damaged, though the drying house and its contents were saved. The factory was not at work that day, Mr. Russell and his men being absent loading cars with birch for use in the factory. The loss, including about $1,000 worth of finished stuff, is estimated at $10,000 to $12,000. Insurance $5,000. Origin of fire unknown.

There has been some crossing with teams from Milledgeville to Milkish, on the Kennebeccasis River, but the ice is not safe, in fact some parties who tried it Tuesday found it but two inches thick in some places. Grand Bay and that part of the River St. John below Woodman's Point is not yet frozen over, but there is pretty good crossing for teams from the public landing on the north-west side of the Reach to Sprin's Mill, above Carter's Point.

On the night of Thursday last the house of Edward Coyle was burned. It was situated about one mile above the Canaan River bridge, on what is known as "The Fredericton Road." The owner at the time was confined to his bed in a very precarious state of health, and was with difficulty removed from the burning building. A blacksmith shop and store, the latter having been built by Andrew Lipsett, Esq., lumberman, which was situated not far from the house was also burned.

The Woodstock *Press* says, Messrs. Grant & Atherton boxed up and sent to Winnipeg, Manitoba, last week, a very fine specimen of their work. This was a three seated *tete a tete* sleigh, finished in the most elaborate manner with cushion plush upholstery, and silver-plated mountings. The sleigh was built for the Hon. C. P. Brown, Commissioner of Public Works of Manitoba, and as a piece of workmanship was highly creditable to Messrs. Grant & Atherton.

About one o'clock Thursday morning, fire was discovered in the rear of the house in Union Alley owned by Edward Maher, and occupied by Annie Whelley, Mrs. Evans and Mrs. Weary. The fire was in a bedroom in the rear of the second flat of the house, which is a medium sized two-story dwelling, and the flames had made considerable headway before water was turned on. It took only a short time, however, to conquer the destroying element. The salvage corps rendered exceedingly good service and removed all the furniture and bedding. The loss on the house is put at $300; no insurance.

THE NEW BRUNSWICK CORDAGE WORKS TOTALLY CONSUMED.

The New Brunswick Cordage Works, owned by Thomas Connor & Sons, and situated a short distance off the Adelaide Road, Portland, was burned to the ground on Wednesday night. This factory is said to have been the best of the kind in Canada and was so well arranged and provided against fire, and so carefully managed—no fires being allowed in the main building or the Run—that it was considered perfectly safe on that score. Shortly before the occurrence of the fire that night, the night watchman of the works, James White, had rung the nine o'clock bell and gone to the tar room, where he had wound the night watch. After leaving the tar room, with his lantern in his hand, chancing to look in the direction of the room, he discovered fire there, and almost instantly it was enveloped in flames. He gave the alarm, and in a short time hundreds of people were surrounding the works, willing and eager to lend assistance, but owing to the great quantity of inflammable material necessarily kept and used in the factory the flames spread with such lightning rapidity that it was impossible to quench them. One of the Portland steam fire engines and a hose cart arrived promptly on the scene but could render no assistance as the only water to be got at was within the burning building. Some barrels of tar and oil were taken out of a shed at the upper end of the works before it burnt and some manilla rope in the course of manufacture, together with some of the lathes, were taken from the Run. Shortly after the fire got under way in the main building, the flames commenced to draw down through the Run, which was 1,300 feet long. An attempt was made to tear down part of the Run, about two-thirds of the way from the main building, but before it could be accomplished the hot flames rushing through it drove the firemen from the roof and it had to be abandoned; and within two hours the whole factory was in ruins. The scene while the conflagration lasted was one of terrible grandeur. The heavens were illuminated and the town of Portland was lit up more brightly than it appears at night at the clearest full moon.

Happily, the warehouse, where the principal part of the stock, both manufactured and raw material, is kept, was isolated from the factory and was to windward of it, and in consequence a stock valued at about $50,000 was saved. Also the houses of the workmen, being to the windward of the fire, escaped.

The loss of the factory is estimated at $80,000, which was partly insured, but to what amount has not been ascertained. It is understood that the Commercial Union has a risk on it of $5,000 and that the London & Lancanshire, Western, and the Citizens also were carrying risks on it.

By the loss of the works fifty hands will be thrown out of employment. The destruction of this factory falls particularly hard on Messrs Connor, as they sustained the loss of their factory on the Marsh Road by fire some four years ago and have been to a very great expense in fitting up and perfecting their new works. They have proved themselves full of pluck and enterprise in the past and while they have the sympathy of the community, it is confidently expected that but a short time will elapse before the New Brunswick Cordage Works will be seen rising from the heap of ashes on the Adelaide Road.—*Sun.*

(From the Baltimore American.)

There was seen yesterday at Messrs. Knabe & Co.'s factory a magnificent concert grand, just finished by them for the presidential mansion. President Arthur, who is a thorough connoisseur of music, in selecting a piano for the White House decided in favor of the Knabe Piano as his preference, and ordered accordingly the instrument referred to. It is a concert grand of beautiful finish in a richly carved rosewood case, and of superb tone and action—an instrument worthy in every respect of the place it is to occupy. It was shipped to its destination yesterday.

MR. GEORGE SEWELL, of Memramcook, N. B, writing from Moncton, N. B., under date of May 7th, 1878, says:—

DEAR SIR,—In January last I came to Moncton from Memramcook to consult a physician, as I was in the last stages of Consumption. When I arrived here I had at once to go to my bed, and was so low I never expected to leave it. A physician was called who pronounced my case as hopeless; that I might live a week or two, but not certainly more. As a last resort he recommended "Robinson's Cod Liver Oil with Lacto-Phosphate of Lime." I purchased a bottle and after taking the first dose commenced to improve. It seems, after taking a dose, as if I had eaten a good, hearty meal. I have continued taking it ever since and am rapidly improving. I am confident that had it not been for your Oil I WOULD HAVE BEEN IN MY GRAVE TO-DAY. You are at liberty to use this in any way you wish, as I am anxious to let others, who are afflicted in the same way, know, in the hope that they too, may receive the same benefit.

I remain, dear sir, yours respectfully, &c.

I continued taking it in teaspoonful doses for a few days, and have not had an attack of it since, now nearly one year."

IF A FEW GRAINS OF COMMON SENSE could be infused into the thick noddles of those who perpetually and alternately irritate and weaken their stomachs and bowels with drastic purgatives, they would use the highly accredited and healthful laxative and tonic, Northrop & Lyman's Vegetable Discovery and Dyspeptic Cure, which causes "good digestion to wait on appetite, and health on both."

CAUSE AND EFFECT.

The main cause of nervousness is indigestion, and that is caused by weakness of the stomach. No one can have sound nerves and good health without using Hop Bitters to strengthen the stomach, purify the blood, and keep the liver and kidneys active, to carry off all the poisonous and waste matter of the system.—*Advance.* dec 15 3i.
