Wood's Phosphodine is sold in Fredericton by all Druggists.

THE WORST OF A COLD.

Is how suddenly it comes. No time to run to a drug store, croup develops, the lungs are effected with too late. Keep Catarrhozone on hand,— it kills colds instantly. Something magical about the way it cures Catarrh and Bronchitis. Catarrhozone is the best remedy because it cures in nature's way; it heals, soothes and restores permanently. Carry a Catarrhozone inhaler in yout pocket, use it occasionally and you'll never catch cold — that's worth remembering.

IMPORTANT JUDGMENT.

Question of Religious Education in England in Peculiar Position.

London, Aug. 10.—A decisian qy the Court of Appeals to-day leaves the question of religious education in Great Britain in a peculiar position. The education act of 1902 was intended to compel local authorities to pay for religious instruction in the voluntary schools, and led to the notorious "passive resistance" movement, under which numbers of Nonconformist schools. The education bill which cover this expenditure for church was recently under discussion in parliament is intended to remedy this state of affairs. In the meantime the county council of the west riding rates levied to cover this expenditure for church schools. The enucation bill which was recently under of Yorkshire had refused to pay discussion in parliament is intended to remedy this state of affairs. In the meantime the countycouncil of the west riding of Yorkshire had refused to pay teachers for the time devoted by them to religious instruction. The board of education then sought the assistance af the courts in the matter, with the result that the caurt of appeals decided in favor of the Yorkshire council.

If this decision should be upheld by the house of lords, whither the case will now be carried, it will practically accomplish by a legal stroke what the bill of Augustine Birrell, president of the board of education, aims at and furthermore, it may possibly enable many "passive resisters" to bring action for false imprisonment.

The trouble appears to be due to the careless drafting of the bill of 1902.

Tooke BUSINESS SHIRTS

Give an air of confidence and prosperous appearance to the wearer.

The best English Oxfords and finest French Gambrics are used, and the patterns are not only exclusive but absolutely fast.

The stitching throughout is straight and uniform. Each operator works on one class of work only, and thus becomes very expert.

Careful dressers for more than a quarter century have always demanded Tooke Shirts.

TOOKE BROTHERS, Limited,
MONTREAL 903

"Money Back"

means merit. No house would offer to refund money, unless they were sure you would not want to have it refunded. When a house with a well-earned reputation says, "your money back if you are not satisfied with our goods," you may be sure the goods are right.

We have such implicit confidence in the virtues of

GIN PILLS

that we authorize druggists to refund the money if they fail to cure.

We KNOW they WILL CURE all Kidney Troubles—strengthen weak Kidneys, and relieve pain in the back, dull headaches and all other distressing symptoms of Kidney Disease.

That is why we make this emphatic offer. It's worth 50c to be relieved of the agonizing pains—its worth $1 or even $2.50 to be completely cured. And we refund the price if they fail. You certainly get your money's worth either way. 50c box 6 for $2.50, at druggists or direct from

WOODMAN---WILDER.

Daughter of Well Known Lower Southampton Resident Wedded at Worcester.

Worcester Mass., Telegram.— Aug. 6.—In the bay window of the parlor of the home of Mr. and Mrs. Edwin W. Fox, 8 Massachusett street, Frank A. Wilder and Anna C. Woodman, were married at eight o'clock this morning.

Rev. McLeod Hovey, pastor of the First Presbyterian church officiated.

Miss R. Leonilla Wilder, sister of the groom, and Fred E. Whitturn were the attendants.

The Columbia orchestra played Lohengrin's wedding march.

The window was banked with palms and ferns, and cut flowers were used in several rooms

The bride was gowned in white nun's veiling trimmed with lace. She carried a shower boquet of white roses and wore a wreath of roses in her hair. The bridesmaid wore white Swiss muslin and carried a shower boquet of sweet peas.

The gift of the bride to the bridesmaid was a signet ring, and that of the groom to the best man, a scarf pin.

The presents were displayed in the back parlor, among them being a check from the groom's parents.

The couple left at 9.20 a. m., for Boston, whence they will go by boat to St. John, N. B., and then to the bride's home, Lower Southampton,

Mr. and Mrs. Wilder will be at home Thursday's after September 1st at 8 Massachusetts street.

(The bride is a daughter of Mr. Ross Woodman, a well known resident of Lower Southampton, York Co.)

THE THIN MAN'S DANGER.

He can't resist disease germs,— that's why he's such a mark for consumption. In this land of plenty, thinness is wickedness, especially when it's so easily overcome with Ferrozone. This remarkable tissue builder makes you fat quickly; it does so by forming blood that's rich, nourishing and health-giving. iFerrozone supplies the nutriment needed by wornout nerves, rapidly constructs muscle and fatty tissue. The form fills out, the cheeks redden, proving that weight is being added. Tobe well and stay well, use Ferrozone. Fifty chocolate coated tablets in a box for fifty cents or six boxes for $2.50 at all dealers.

BAPTIST AFFAIRS.

Probability That a General Dominion Association Will be Organized.

St. John, Aug. 10.—Rev. David Hutchison of Main street Baptist church returned today from the Pacific coast, where he attended a meeting of Baptists to discuss the advisability of holding a future annual Dominion convention, Baptist. He reports it being received favorably both at the British Columbia meetings and also in Manitoba, Alberta, and Saskatchewan, and looks for its adoption by the maritime convention at Liverpool this month.

It would not affect Provincial gatherings or the denominational newspapers, but a general magazine for the denounciation would probably be started.

HALF-SICK PEOPLE.

The world is full of them. Just sick enough to be lazy and listless; to sleep poorly. Quite often you're half sick yourself. Chances are the trouble is in the stomach and bowels. Best prescription is Dr. Hamilton's Pills; they tone up the entire system, strengthen the stomach, elevate your spirits, and make you well in one night. Dr. Hamilton's Pills work wonders with people in your condition. Mild in action, effective and easy to take. Get Dr. Hamilton's Pills today, 25c. per box at all dealers in medicine.

WATCH THE WINSTONS.

Sketch Publishers Portraits of Both Churchills.

London, Aug. 10.—The sketch this week conducts its teachers into the realm of possibilities and invites attention ta this spectacle; President of the United States of America, Winston Churchill; Prime Minister of Great Britain, Winston Chuschill. There is no specification as to the time nor speculation as to the relations the two Winstons would undertake to maintain between the American and British peoples if their periods of exaltation should synchronze The sketch publishes photographs of the two men side by side, and simply remarks.—"Two of the men most conspicuous in the foreground of public life at the present moment are the Winston Churchills. Ours has set the empire ringing with his speech on the Transvaal constitution; America's is the cynosure of eighty million pairs of eyes in the States on two accounts. He has just published a new novel acclaimed on the one hand as better than Thackeray's best and on the other as worse than Thackeray cauld have written at his worst. Moreover, he fills the eyes of politicians because he is a candidate for Governor of New Hampshire Here is Lord Randolph Churchill's son at one and thirty, the most striking and picturesque figure in the Liberal party. A potential premier across the water is his cognomenal double, a man of thirty-four, aiming at a post which is a step upon the way of the man whose goal is the Presidency. Moral, watch the Winstons.

She—"It's a splendid match. Positively two souls with but a single thought."

He—"Wait until they come to decide who is to take care of the single thought."

WHEAT AND GOLD IN THE HINTERLAND.

The Wilderness Will Blossom With Towns, Farms and Industries When the G. T. P. Eastern Section is Built.

Mr. J. C. Ross, special correspondent of the Toronto Globe, writes:—

The Height of Land, near Lake Abitibi, Aug. 1.—The mining developments of the past year around Ontario. Then the recent gold finds in northern Quebec have brought that part of the country to the notice of the public. But when you tell the people that northern Ontario and Quebec have futures as bright as the older parts of the provinces, or hold out possibilities of growth that will rival the west, they smile in an incredulous way and refuse to take you seriously. And yet it is true that the northern parts of these two provinces are on the eve of a growth that will open the eyes of even the mostoptimistic. L

Already there are evidences of the new north coming to her own. The Grand Trunk Pacific is crossing through a region of surpassing richness, and will open up thousands of square miles of the great clay belt as well as new timber and mineral lands. Our own T. & N. O. road is being pushed north to meet it a short distance west of Lake Abitibi, and all along its northward course there are signs of settlement—the beginning of the new era.

On the Quebec side the Interprovincial railroad is being surveyed from near the south of Lake Temiskaming to run north through Ville Marie and away beyond to the Grand Trunk Pacific. A gain in Ontario the James Bay railway is being pushed north from Sudbury to James Bay.

In a few years tourists will be travelling to James Bay in Pullman cars and the Indian with his pictures que bark canoe will be a thing of the past. Already there is a steamboat on Lake Abitibi owned by Revillion Bros., the great fur dealers. On Lake Quinze a boat is being operated by the Temiskaming Navigation Company.

WAS AN UNKNOWN REGION.

A few years ago this entire region was unknown save to the Indians and Hudson's Bay fur traders. Now it is being invaded by the prospector, the miner the lumberman, the surveyor, and the railroad contractor. In a few years more we may expect to see all the evidences of civilization.

There are really no valid reasons why the north should not develop into a great mining, lumbering and agricultural country.... There is abundance of mineral wealth stored in her mountain ridges, she has the finest virgin forests in the world, and her great clay belt is the very best for the growing of wheat. Then the district north of New Liskeard (the clay belt) is farther south than Winnipeg, and even the district north of Lake Abitibi is much farther south than many of the famous wheat-growing districts of the Northwest.

That the country can produce good crops is proven by the splendid farms on both the Ontario and Quebec sides of Lake Temiskaming—and farther north. On the Ontario side there are to be seen fine fields of grain — the wheat proving to be of a superior quality.

ROSES WERE IN BLOOM.

At Ville Marie in Quebec, the writer saw most beautiful roses in bloom on July the 15th in the garden of Mr. Quay. He had a garden full of every variety of small fruits, including plums, cherries and apples. Through the country back from Ville Marie one passes for twenty-five miles through a good farming territory, fine buildings, fences and fields of grain testifying to the prosperity of the district.

There is no reason why the clay belt north of Abitiqi will not prove as valuable for farming as the districts around New Liskeard, and Ville Marie. Of course the land has to be cleared, but the timber would more than pay for the clearing. At present the only use the land shows is for the raising of mosquitoes. Large mosquito farms flourish at every available spot, and the variety that is bred is a large, hungry species that shows a decided preference for white men. They are so bad that many miners and prospectors were compelled to leave the country. They cannot be described, but once seen and heard and felt they will never be forgotten. Until they are exterminated the land is not fit for a white man to live in.

THE QUEST OF GOLD.

However, despite mosquitoes, sand flies, black flies and moose flies, the prospectors are flocking northward in quest of gold. Long trails, hard porteges and hours of paddling do not daunt these hardy sons lured by the hope of gain.

While the recent gold find near Lake Opiscatia has proved to be a "pocket," it is hoped that other good finds will be recorded. Many areas are showing prospects of mineral— Lake Abitibi, the Height of Land, and the Wendigo district. The writer met the superintendent of mines for Quebec away north at the height of land coming back from a six weeks' trip through northern Quebec. ...He reported traces of gold in two or three places—not in large quantities, but yet traces got by panning in the bays and creeks. He was quite optimistic regarding the future for mining in northern Quebec, and certainly with the coming of the new roads across the province we may expect to hear of other mining centres.

WILL NEED OUR POTATOES.

New Zealand May Take All Canada Can Spare.

Ottawa, Aug. 10.—A report from Mr. J. S. Larke to the Department of Trade and Commerce, suggests that New Zealand's preferential tariff is having its epect in increasing importations from Great Britain and from Canada. The crop of potatoes in New Zealand is much benlow that was expected. As a consequence prices have gone up and in the Wellington are quoted at £12 per ton, so that in October there will be a demand for and surplus Canada can supply at good rates.

Mr. Larke comments upon the possibilities of Canadian sheep breeders finding a market in Australia for highly bred sheep, and expresses the opinion that it would be worth their while trying the experiment.

Mr. Larke states that the New South Wales government is adopting the Austrian system of dealing with tramps, that is to say, the vagrant is put apon bread and water, and his diet is improved in proportion to the work that he does.

Complaint has been made that some of the herring sent to Australia from British Columbia have been almost worthless. If this kind of fish is shipped, Mr. Larke says, British Columbia herring will fail to secure the reputation that will command the best prices.

Some vehicles recently sent from Canada have been pronounced by the trade "unsuitable to this market" being heavier than the Australian, and will have to be sold below cost. Other vehicles in the same shipment promise very much better results.

Mr. D. H. Ross of Melbourne, reports to the department of trade and commerce that an experiment made by the Nictorian government in using motor 'buses as feeders for suburban railways has not proved successful, and the service has been discontinued, owing to non-productiveness in revenue and frequent breakdowns. On the other hand, large motor cars are being successfully operated in the public service by private enterprise in other parts of the state.

The Chicago disclousers have caused many inquiries for Australian canned meats, which are packed under rigid veterinary inspection.

Mr. Alexander MacLean, reporting from Toko, expresses regret that the Canadian manufacturers are not displayed either by sample or by prospectus, and in effect his remark is that there should be a vigorous advertising of Canadian wares.

HOUSEHOLD HINTS.

Some Interesting Information for Busy Housewives.

Orange Water Ice.- Rub sugar on the peel of two oranges and one lemon. Squeeze and strain the juice of the lemon and six oranges. Disolve the flavored sugar with a little hot water and mix with one and one-half pints of syrup. If too sweet, add a little water. Strain into the freezing pot and set away to cool. When cold whip 15 minutes and freeze.

Orange Food.-Juice of three Seville oranges, nine well beaten eggs, one-half pint cream, a little nutmeg and cinnamon, white sugar to taste. Mix the orange juice with the eggs, cream and spices. Sweeten to taste. The thickness of melted butter. It must orange juice must be strained carefully and stir it until it becomes about the ly. Set the whole over a slow fire, on no account be allowed to boil. Then pour into a dish to be eaten cold.

Orange and Apple Pie.-Cover a pie plate with puff pastry and place a layer of sliced oranges with the pips removed on it and scattered sugar over them; thenput a layer of sliced apples with sugar, and cover with slices of oranges and sugar. Put an upper crust of nice pastry over the pie and bake it for one half hour or until the apples powdered sugar over it.
