—Students should include a resume of related experience. Experience preferable but not essential. Policies of the SUB are handled by this board. Students repeating their year are not eligible.

D. Students In Any Year Are Eligible.

Applications should be addressed to:

Dave Gamble
c/o Applications Committee
c/o SRC Office
Student Union Bldg.

Any students interested in Council or its Committee should drop in at any time.

All post graduates are eligible.

Forest Resource Centre and botanical gardens proposed

By GERALD THOMAS

Concern for the environment is bringing about definite changes in the present role of UNB.

Recent enrollment figures indicate a shift in favour of the Depts of Biology and Forestry according to Dugald Blue, registrar. This has resulted in these departments being given top places on the Senate's list of construction priorities, with plans being discussed for joint development of two hundred acres in the University's woodlot south of the Trans-Canada highway.

Dr. Eric Garland, Campus Development Officer, said, late this summer, he and President Anderson, got together with representatives of the Depts of Biology, Forestry and Engineering to discuss the possibilities of development.

Murray and Murray, the university architects, were asked to draw up preliminary plans based on the space needs estimated by the interested departments. The provincial and federal governments, convervation groups, as well as joint government organizations such as the Maritime Forest Research Center, were also asked if they would be interested in a joinly developed Forest Resource Center. So far such interest has been definitely favourable, said Garland.

Forestry and Engineering will take up a minor portion of the total development however, with all but a small percentage of area going to Biology's Botonical Gardens and arboretum.

This project will still be considered by the University should the Forest Resources Center fall through, said Garland.

Dr. Leo Dionne of the Biology Dept. has spent part of this past summer examining other Botanical Gardens and arboretum, developing a plan which has now been submitted to the Senate's Planing Committee.

It doesn't have to be built on the woodlot sight however; even if it should, the 200 acre area is but a small part of a 2300 acre lot.

Other fringe benefits stressed by both Blue and Garland are those to be gained by the Fredericton area, and the province as a whole. This means a new park and tourist attraction, (it being the only Botonical Garden East of Montreal) as well as establishing New Brunswick as a major center of forrest research and development.

* * *

Red Cross youth discover the needs of their communities first hand by going out and experiencing the problems affecting people in need. Through inner city projects, volunteer work at blood donor clinics, swimming instructions for handicapped children, Red Cross youth in Canada are working for a better world.

RED N' BLACK REVUE

GENERAL MEETING
WED. SEPT. 26, 1973
6pm TILLEY 102

All the old timers must attend.

All those who can sing, dance, act, juggle, stomp, tell jokes, spin a yarn (B.S.), etc. are welcome to the fold.

Can't do anything?
Can't do anything but it sounds like fun?
We have plenty of stage fright for everyone.
Meet some of the friendliest kids on campus.

BE THERE . . . . . ALOHA
