HE CLINGS TO THE CITY.

English Immigrant Loathes to Work on the Farm.

Scans the "Want Columns" and Digs in the Cellars Rather than Work on the Land.

Toronto Globe.—The English immigrants have arrived in Toronto, to a wall. Since Friday 500 immig(ants have arrived in Toronto, and less than half of these have accepted the farming positions that awaited their acceptance. Many are mechanics, who prefer city life, and they may now be encountered on the downtown streets in groups of two or three. Employment agents are active at the Depot Immigration Office, and a number have been engaged for railroad construction and other rough labor at $1.75 a day. Those that do go to the farms do so with apparent reluctance, and the fear of loneliness is indicated by the number who insist on being engaged in pairs or trios.

"You must go alone, boys, or not at all," said the immig?ation officer to two young men who wanted to go to the farm together.

Among the gentlemen in the Immigration Office yesterday was Mr. Robert Verity, an employment and immigrant agent, with office in Leeds, Eng. To a Globe reporter he showed a letter from Mr. W. H. Pinder, the oldest shipping agent at Leeds. One paragraph read as follows:

"It is reported here that thousands of men willing to work are out of employment in Toronto, and some without food and shelter. I should like to know from you the truth of this. I have had several reports brought in to that effect, and the same was reported to the press here, which just now deters many people from going out."

Mr. Verity has informed his correspondent that mechanics must take their chances, but adds that farming positions await all who will accept. He denied also the more ridiculous rumors quoted in the above paragraph.

Many undoubtedly, while discouraged by the first touch of homesickness, write discouraging letters home. This was the case with an ex-Leeds constable who came out and after a short stay returned to England. In a letter he says:—"I see it differently now. I will never be satisfied to stay in England, and sail for Canada August 3rd." He is in Canada or nearing her shores today.

In front of a downtown newspaper office seventy-five men, the majority unmistakably new arrivals, were eagerly awaiting the paper to read the "help wanted" ads. A farming position was open, but that is the "court of last resort," and starvation alone will drive many to it.

A contractor who was spoken to yesterday said:—"I have probably a dozen English laborers on excavation They work well, but are as tractable as the foreigners. I cannot see that they have yet made any impression on the labor market.

An officer of a labor union said:—"If some restriction is not put upon the importation of these men good Canadians will soon be walking the streets, because they will be displaced by the cheaper men. On farms no doubt their presence would be for the general good, but the flooding of the cities will not make it better for those already crowded into them.

VIRGINIAN BREAKS RECORD.

Allan Liner Lost Seven Hours, But Still Made a Remarkable Run.

Montreal, Aug. 10.—The Allan liner Virginian, which passed Father Point, inward this morning at 8.42, has broken her previous record by two hours, and the English mails will be delivered here tonight and in Toronto tomorrow.

Her time from Moville to Father Point was five days and twenty-two hours and twenty minutes, allowing five hours added for westward passage.

This is the fastest time ever made in delivery of mails to Canada, not only by an all Canadian route but by the American route as well.

The Allan office has been informed by Virginian's captain that seven hours were lost by fog near Straits of Belle Isle, so it is evident that with fair weather throughout the voyage it is possible, with the Virginian, to land mails in Montreal in the forenoon of Thursday in place of evening, making the entire run of passengers and mail bags from Moville to Montreal in six days and a few hours.

GIRL DIES OF FRIGHT.

Hasbrouck, Heights, Aug. 10.—Miss Lizzie Schultz, nineteen years of age, was frightened to death by a barking dog yesterday. Miss Schultz was on her way to the office of Dr. Conover, with Mrs. John T. Bulmer, a neighbor, whose baby was ill. They had got within half a block of the doctor's office when a dog owned by William Hess began to bark at the women as they passed.

"Oh, there is that dog," said Miss Fchultz. "It often jumps up on me when I pass, and I am so frightened!"

Although the dog did not come out of the yard the woman was so shocked for fear it was going to leap upon her, that she became ill on reaching the doctor's office. Dr. Conover gave her stimulants and she was able to walk home. Soon afterward however, she collapsed and became unconscious. She died in a few hours, the doctor says, of heart failure, caused by fright.

PRESTON ON IMMIGRATION.

Will Not Advise the Rider Haggard Proposition.

London, Aug. 10.—Mr. W. T. R. Preston appeared before the commission, of which Lord Tennyson is chairman, appointed by Mr. Balfour to consider the emigration proposals in the report of Rider Haggard. All members of the commission asked questions as to the Canadian emigration propaganda, and were very solicitous about the development of the Dominion and the advantage claimed by Canada for successful settlement.

Mr. Preston declined to advise the commission that the colonization proposals outlined by Mr. Haggard would work out successfully, but advised that prospective colonists should first have one year's experience at Canadian farming before engaging in operations on their own account. The commissioner said that the Canadian government would welcome any additional agencies with a view to securing desirable additional Canadian population. He laid before the royal commission a large volume of correspondence from successful British emigrants who have started life in western Canada with less capital than the amount proposed by Rider Haggard. He also expressed the opinion that if transportation facilities or assistance could be given to desirable British emigrants of the right class a larger number could be assisted than under the proposal submitted by Mr. Haggard. He assurred the commission that Canada could easily absorb a quarter of a million addition to its population annually. The examination lasted two hours. Mr. Preston was thanked heartily by Lord Tennyson for the interesting information.

DENVER BANK IN HOT WATER.

Owes Depositors $2,000,000, Who Start A Run.

Denver, Aug. 10.—A run was started today on the Denver Savings bank which owes depositors about $2,000,000.

At noon the doors were closed, and thereafter depositors were allowed to enter one at a time and draw 10 per cent. of their deposits. The run followed persistent rumors regarding the bank's stability which has been current for a week or ten days past. The trouble is reported to be due to bad loans. Vice President Jones said the run came without any intimation when the doors opened this morning.

"In what condition is the bank," he was asked.

"Very good, but there is no telling where a thing of this kind will end. I thought it wise to enforce the 10 per cent. rule, and the depositors and the bank will be protected to the full extent of our power."

A BILIOUS HEADACHE.

Is one of the meanest things in the world. To prevent biliousness use Dr. Hamilton's Pills, which keep the system clean and pure, regulate the bowels, give tone to the kidneys and liver. You'll never have a headache you'll never have a sour stomach, but you'll have vigorous bracing health by taking Dr. Hamilton's Pills. Your druggist sells Dr. Hamilton's Pills, 25c. per box, or five boxes for one dollar.

There are people who insist that you give them credit for good intentions and feel injured if you venture to expect them to make good.

Your vanity is much more easily misled than your judgment, but you would much rather listen to your vanity.

When the gold to crimson turns sometimes it is a sign of autumn and sometimes it is a sign that a rounder is making a night of it.

Probably it will soon be necessary for a woman to take a civil service examination before she can secure a hired girl.

Some men who are good for nothing else make good weights to place on dry goods boxes.

You can neder guess by a widow's weeds of the quality of man she is mourning.

The tongue is called the unruly member but it has ruled many a household.

It is easier for some people to hold a greased pig than it is for them to gold their temper.

If you would have a thing well done give the workman an extra dollar.

Ability to make a sprint is no good in a slow pace.

Lever's Y-Z (Wise Head) Disinfectant Soap Powder dusted in the bath softens the water at the same time that it disinfects.

A WOMAN'S ORDEAL

DREADS DOCTOR'S QUESTIONS

Thousands Write to Mrs. Pinkham, Lynn, Mass., and Receive Valuable Advice Absolutely Confidential and Free

There can be no more terrible ordeal to a delicate, sensitive, refined woman than to be obliged to answer certain questions in regard to her private ills, even when those questions are asked by her family physician, and many

continue to suffer rather than submit to examinations which so many physicians propose in order to intelligently treat the disease; and this is the reason why so many physicians fail to cure female disease.

This is also the reason why thousands upon thousands of women are corresponding with Mrs. Pinkham, at Lynn, Mass. To her they can confide every detail of their illness, and from her great knowledge, obtained from years of experience in treating female ills, Mrs. Pinkham can advise women more wisely than the local physician.

Delle Emerentienne Montreuil, of 114 Latourelle St., Quebec, Que., writes:

Dear Mrs. Pinkham:—

"I suffered for eight months with what the doctors called prolapsus, which caused great weakness all over my system, with faint dizzy spells. I kept growing weaker and weaker. I tried several medicines which they claimed would cure my trouble, but nothing was of the least benefit until I tried Lydia E. Pinkham's Vegetable Compound, and this helped me so rapidly that I could hardly believe my good fortune. I would gladly have paid $25.00 for that first bottle, for it started me on the road to health, and five bottles cured me.

"I am most grateful for my splendid, robust health, and shall certainly recommend the Vegetable Compound in glowing terms to all my friends and acquaintances, for it is deserving of all the praise I can give it."

Mountains of proof establish the fact that no medicine in the world equals Lydia E. Pinkham's Vegetable Compound for restoring women's health.

A Bottomless Pit.

There is a bottomless pit in the mountains of Hualalai, back of Kailua, in the Hawaiian Islands. It is about four feet in diameter. The pit is peculiar from the fact that it sucks in the air with remarkable force. Pieces of paper placed over the mouth do not float gently down, but are suddenly drawn in and disappear with startling rapidity. The air rushing into the pit can be distinctly felt by people standing on the edge. Strange sounds are heard also. Every night the inhabitants of the locality distinctly hear a noise similar to the blowing of a deep steamship whistle. The noise is heard for about five seconds and then subsides for a space of about ten minutes and then resumes for another five seconds.

Addresses In Persian.

The addresses in Persian upon letters which go through the postoffice at Calcutta are often quaint and puzzling. An Indian paper recently translated one as follows: "If the Almighty pleases—Let this envelope, having arrived at the city of Calcutta, in the neighborhood of Calootolah, at the counting house of Sirajodeen and Ilahdad, merchants, be offered to and read by the happy light of my eyes, of virtuous manners and belover of the heart—Meean Shaikh Inayut Ally, may his life be long. Written on the tenth of the blessed Rumzan, Saturday, in the year 1266 of the Hegira of our Prophet, and dispatched at Bearing."

COUGH NO MORE

SPRUCINE

THE REMEDY OF THE DAY

A definite preparation of Spruce Gum, Wild Cherry, Hoarhound and Tar.

Scientifically combined in the form of agreeable and palatable Syrup.

One of the most reliable preparations yet introduced to the public for the immediate Relief and Cure of *Coughs, Colds, Bronchitis, Hoarseness, Whooping Cough, Croup, Asthma,* **and all diseases of the Throat and Lungs.**

Taken with Cod Liver Oil in the first stages of Consumption, it will be found invaluable.

Executed in Gold and Porcelain after latest and best methods.

Anesthetics.

Local and General applied and administered for painless Dentistry.

Office: CHESTNUT'S BUILDING.

Queen st., opp. City Hall. Tel. 78.

Some Men Learn

the Value of ADVERTISING

by not trying it. There are hundreds of men in the business world who have seen their competitors commence to advertise and promptly and loudly prophesied their failure. These have learned their mistake and paid a high price for their experience. To see your competitor prosper at your expense is far from pleasant. Others have thought that there might be something in

ADVERTISING,

but have perferred to wait and see how those who tried it came out. These must now be content to occupy a position as "also rans" as the advertisers have forged so far ahead and gained such a foothold that it is a hard matter to dislodge them.

ADVERTISE YOUR GOODS.

The purchasing public expect to hear from you, if you have bargains to offer. If you don't tell your story the man across the way

WILL

The public want bargains. If your prices are right, if your goods are seasonable, if your advertising is truthful and goes to the home, you will without a doubt be the owner of a busy store. Every business evening people read

Royal Household Flour

must be better than all other flours. We will not be satisfied to even share the honours of first place.

THIS assertion is not made through any selfish desire to deprive other millers of their right position; but we know that our facilities for producing THE BEST FLOUR are beyond contradiction the finest in Canada. Ours are the only mills where flour is scientifically purified while in the course of being ground, and if you could see the dirt that we take out and then think of what others must of necessity leave in, you would not long hesitate as to which is the best for your stomach. You would quickly agree that HOUSEHOLD must be the best.
