BY His Excellency Major General Sir Howard Douglas, Baronet, (L. S.) Lieutenant-Governor and Commander-in-Chief of the Province of New-Brunswick, &c. &c. &c.

A PROCLAMATION.

WHEREAS the Right Honourable Earl Bathurst, one of His Majesty's principal Secretaries of State, has transmitted to me, the following order of His Majesty in Council:—viz:

At the Court at Carlton-House, 23d March, 1825.

PRESENT,

The King's most Excellent Majesty, IN COUNCIL.

WHEREAS it has been represented to His Majesty at this board, by the Lords Commissioners of His Majesty's Treasury, that they have given directions, that His Majesty's Troops, serving in the several British Colonies and Possessions abroad, should in certain cases be paid in British Silver, and Copper Money, and that with a view of securing the circulation of such Money in those Colonies it would be expedient that an order in Council should be issued, declaring that in all those Colonies where the Spanish Dollar, is now either by Law, Fact, or Practice, considered as a legal tender for the discharge of Debts, or where the duties to the Government are rated or collected, or the Individuals have a right to pay in the description of Coin, that a tender and payment of British Silver Money, to the amount of Four Shillings, and Four Pence, should be considered as equivalent to the tender or payment of one Spanish Dollar, and so in proportion for any greater or less amount of Debt.

And Whereas it has been further represented by the Lords Commissioners of His Majesty's Treasury, that with respect to the Cape of Good Hope, where there are not any Spanish Dollars in circulation, consists entirely of paper Rix Dollars and its proportions, and with respect to Ceylon, where the circulation consists of Silver and Paper Rix Dollars, as well as of a variety of other Coins, which are generally received and paid with relation to their value as compared with Rix Dollars, it would be expedient that a tender and payment of our Shilling and six pence in British Silver Money, should be considered as equivalent as a tender and payment of one such Rix Dollar, so current at the Cape of Good Hope, and Ceylon, respectively, and so in proportion, for any greater or less sum, and also, that British Copper Money, should be made a legal tender in all the British Colonies for its due and proper proportions of British Silver Money, as by Law established in Great Britain, but that no person shall be

compelled to take more than 12d. in Copper Money, in any one payment. His Majesty having taken the said representation into consideration, is pleased, by and with the advice of His Privy Council, to approve of what is therein proposed, and the Right Honourable the Lords Commissioners of His Majesty's Treasury, and the Right Honourable Earl Bathurst, one of His Majesty's Principal Secretaries of State, are to give the necessary directions, herein as to them may respectively appertain.

(Signed.) C. C. GREVILLE.

I do therefore hereby make known the same to all His Majesty's loving subjects in this Province, and all persons concerned, will take due notice, and govern themselves accordingly.

And I do also hereby further make known that the holders of British Silver Money, may demand from the Officers in charge of the Commissariat Department.— Bills upon the Lords Commissioners of His Majesty's Treasury at thirty days sight, in Exchange for whatever sums may be tendered by them in British Silver, not less in amount than one hundred Pounds at the fixed rate of a Bill for one hundred Pounds, for every one hundred and three Pounds of British Silver Money, so tendered.

Given under my hand and Seal at Fredericton, the Twenty second day of October, in the year of our Lord, One Thousand Eight hundred and Twenty-five, and in the Sixth year of His Majesty's reign.  
By His Excellency's Command.  
W. F. ODELL.

A MINERALOGICAL DESCRIPTION OF THE PROVINCE OF NEW-BRUNSWICK.

WITH A METEOROLOGICAL MEMOIR.

(Continued.)

In connection with the Meteorological phenomena of this Climate, given in a preceding section of the present Memoir, I have to notice another fact, no less interesting than anomalous, viz:—that the mean temperature, or average degree of heat in this Province, during the summer exceeds by 5° of Fahrenheit, that in England, in the same season,—the medium temperature in the latter never exceeding 70° according to Dr. Kirwin, while in the former, according to the Table of observations in 1824, it is found to be 75°.

This circumstance may account for the rapid and luxuriant progress of vegetation in this region, during the brief cycle of three months.

Who can repine at a Climate, in which Nature exerts her full tide of strength?—where the trunk of the Forest shrub is no sooner bare of its ivy incrustations, than its leaves play in the spicy breeze, while gay exotics, and the lank and sweeping blade of grass, fringe the dissolving lakes and streams?

The temperature of latitudes within 48 degrees, is found to be greatest at the solstices, and on referring to the Table given in this memoir, the greatest degree of heat will be found to have occurred in the months of July and August, a few days after the sun's passing the solstitial signs.

The following Table gives a view of the mean temperature of a few places on the continent of Europe, nearly in a parallel latitude with this Province, and is drawn up for the purpose of assisting an investigation of our atmosphere, and some extraordinary discrepancies of its temperature—

Places.	North Lat.	Mean An. Heat
Lyons,.....	45	52 5
Bordeaux,.....	44 50	57 6
Padua,.....	45 31	51 60
Lausanne,.....	46 31	48 87
Zurich,.....	47 00	55 3
Nantes,.....	47 00	55 63

From this Table it will appear that the mean temperature of our climate is beyond that of similar latitudes on the continent of Europe, during the greater part of the year.

It is also an interesting fact, that in the months of July and August, we enjoy a greater degree of heat than Italy, and the South of France, and that while a few days in those months, it is equal to what is felt at Canton, in lat. 23, the annual mean is within one degree of that at Philadelphia in latitude 40.

As the temperature of this climate varies only in the summer from that of others in Europe, under a similar parallel of latitude there can be, I conceive, but one satisfactory way to account for the same.
