

REPORT

RESPECTING THE SHUBENACADIE CANAL, FOR JULY, 1827.  
To His Honor the President, and Board of Directors of the Shubenacadie Canal.

GENTLEMEN,

The Canal works now under contract proceed with every expedition. The present month has been particularly favorable for the various operations of cutting and embanking, dressing of slopes, and masonry; but owing to the great depth of excavation upon No. 2 Section, the result of labour to the Contractor will not be found so great as hitherto, although the actual force employed has increased by an average of 35 workmen.

Operations upon Section No. 3, have for seven working days been proceeded with.

The bottom of Lake Charles, near to Reeve's mill race, will require to be depressed 5 feet 6 inches, for an extent of 278 feet lineal, to avoid a narrow and circuitous passage, through which the original soundings were taken.

The Contractor has 35 men employed and is at present throwing a coffer dam across the rapid, to effect that object.

The quantity of work performed upon No. 2 Section, according to previous measurement, up to the month of

April, is 49,847 cubic yards

May 11,498 do.

June 11,478 do.

July 6,292 do.

Or 78,815 cubic yards, at 12 3d. is exclusive of ten per cent upon contract rate

£4,925 18 9

Total of retaining walls, is

312 10 0

625 yards, at 10s.

Total expense of No. 2 section

£5238 8 9

Total expense upon No. 3 section, 35 men, 7 days, at 3s 1d. per day, is

37 15 5

Total award for cutting and embanking upon the Shubenacadie Canal

£5276 4 2

About 1027 feet of cut granite face stone, is now in readiness for the Locks; besides blue stone backing and arch stone, that will all be applied upon the arrival of the Masons and Stone cutters that may be expected next month from Scotland. The cements, and other requisites are in such a state of forwardness, that by the commencement of September, an expenditure of £1500 per month, may be expected by the Contractor.

The quantity of excavation to be performed upon No. 2 Section, exclusive of Lock works and Masonry, is 17,866 cubic yards.

From the elevation of the rapid at the lower end of Lake Charles, the surface of that Lake at present can only be depressed 8 feet; in consequence the rock excavation at the Northern extremity of No. 2 Section, cannot be proceeded with until such time as a sufficient level is carried up. This rock will afford an eligible situation for placing a pair of stop gates somewhere near to Lake Charles, and the expense of that part may be much diminished by contracting the surface width of the Canal, so as to correspond with the width of the Locks.

Gentlemen, I have the honor to be, your very obedient servant,

FRANCIS HALL.

Dartmouth, July 31, 1827.

ALL Persons are hereby cautioned against trusting Mary Fletcher, wife of the Subscriber, she having left my Bed and Board, as I will pay no debts of her contracting. JOHN FLETCHER.
