Arrival of the Niagara.

The R. M. Steamer Niagara arrived on Monday evening about 8 o'clock, after a massage of nine days, which appears now to he the regular time in which we may expect But little of interest seems to be passing in the political world. Various surmises are still freely spoken of respecting the future on the continent of Europe.

Russia is desirous to evade as much as

possible the treaty of Paris.

will be hailed by the poor with satisfaction,

the Black Sea. The Hannibal has been sent to during Friday night. Serpent's Island, and sufficient intimation has been riven that in the opinion of the Allies something like a breach of faith has taken place. Although
Kars is but 30 miles from the Russian frontier, she is there still, destroying works, cutting down forests, refusing English officers the right of visiting the spot, and playing the despot after the manner of Warsaw or Tiffis. The same is the case at the mouth of the Danube. Russian troops are still there. The part of Bessarabia which is to be added to the Principalities is still in Russian hands, and the Czar raises doubts about the topography, and would gladly evade the conditions."

But it is added by the ministerial organ that
any "practical result" is not likely to follow, which means, of course, that Russia will give way under the earnest pressure of the Allies, and that Austria, which has not yet evacuated the Principalities, will be compelled to follow her example.

The intense heat has subsided to the more usual temperature of English harvest weather. We crop. The accounts from all parts, of the appeargratifying as ever. Wheat has not only been exensively cut in the south, but some has been stacked already. Spain is the only country from which we hear of a serious deficiency, but Russia and America appear likely to have plenty to spare. We may hope, therefore, at present for moderate prices of the great necessary of life.

Italy continues uneasy, of course, but without nolent disturbance. There is evidently consideraoffices of the Western Powers. In Naples, conversations in the streets, on political subjects, take tresses. place openly,—a thing unknown till lately, and the police seem afraid to interfere. In Bologna, the municipal council have had the courage to address the Pope, praying for relief from foreign in-tervention, and even for an electoral law for the municipalities, which the Pope had himself decreed, but which had never been yet put in force. The Sardinian Government seems restless to take some kind of action, but is in evident fear of the machinations of Austria.

Russia has thought better to descend from her lofty assumptions, and to yield what she is not allowed to filch. Austria was displeased about the Isle of Serpents; therefore an English fleet as entered the Black Sea, and is to remain there till Russia restores Kars and the little island. She is now all readiness to do both. Firmness is the only policy by which peace can be preserved with a country for whom no advantage is too mean or too great to be seized, provided it can be done with impunity. From the islands of the Baltic to the confines of Persia she has deprived neighbouring powers of every rock and every village she could grasp. A Stockholm correspondent of morning paper writes a very sensible letter on eness of uniting Denmark, Sweden, and Norway in Scandinavian bonds, to resist the Agressions of their rapacious and faithless neigh-

As an illustration of the tone of Dove's mind, we may give he following letter, which he put into Mr. Wright's hand on his entering the condemned sell on Friday morning :-

"York Castle Condemned Cell, Aug. 8th, '56. ted Sir, -- My time is short--my days are numbered, and soon I shall have to appear before the judgment-seat of Christ; but I trust my judge is my advocate and friend, and that I shall meet his smiles, and be welcomed to manaons in the sky. I can truly say-

therefore, used extraordinary means, and blessed be his holy name. I believe it is in answer to the prayers of my dear mother, and that I shall have reason to bless and praise Him through all eternity, that he ehecked me in my mad career, and adopted this plan to save me.

"Oh! my dear sir, accept the thanks of a dying man for the kindness I have experienced at your hands. May that God, who is your Father and my Father, bless you both in this life and that which is to come, and may we meet in this splendid line to cross the Atlantic. Heaven, is the prayer of, respected sir, yours affectionately, " WILLIAM DOVE."

" Mr. Thomas Wright, York."

The culprit was a Wesleyan, and the sacrament of the Lord's Supper was administered to him on Friday night, after which he engaged almost continually in prayer until one o'clock on We give below extracts from our English | Saturday morning, when he laid down and had papers. At twenty minutes to twelve o'clock, the under-sheriff, Mr. W. Gray, arrived at the castle, and made the usual demand for the body of the condemned man for execution. At this time there could be no less than from 15,000 to 29-000 people assembled in front of the gallows.

this time, and Dove, while being pinioned, held session of the general assembly. him by the hand.

At this juncture Mr. Barret availed himself of an opportunity of asking Dove if there was anything in the statement he had made on Tuesday which he wished to alter or correct? Dove subsequently turned to Mr. Barret and American MARBLE on reasonable terms. said,-" Mr. Barret, tell my poor mother I die happy." These were the last words he uttered, except in prayer.

The convict having been placed under the fatal beam, from which the rope dangled in the have had occasional showers, but reaping has not been interrupted yet during the entire day. The debtor, now in confinement in York Castle, but showers, hitherto, have been only such as were whose name, occupation, and residence have needed for the green crops, and farmers appear to been studiously and positively withheld to the think they will even benefit much of the corn very last), proceeded to perform his office. Having assured himself of no mistake, he passed quickly to the steps, the bolt was drawn, and the drop fell, and in a moment the wretched criminal ceased to exist.. He suffered slightly, death being almost instantaneous.

Sir C. The weather was favourable for the excursion. The British Isles have subscribed magnificently in aid of the sufferers by the recent inundations in France. There has been an agricultural show in Paris, at which many English farmers exhibited their stock.

> Marshal Pelissier has been created a Duke, and we now learn from a decree in the French official organ that he is named "Duke of Malakoff"-a compliment in connection with the war the highest which the Emperor could bestow on him.

LONDON MARKETS.

THE BRITISH CORN TRADE.

The Markets universally show a heavy fall in wheat prices, very little below an average of 10s. per. qr.; and in some instances, from its commencement, the decline has nearly reached 15s. Farther than this it is not very reached 15s. Farther than this it is not very probable it will at present go, so little of the crop having been gathered. The uneasiness highest degree, and as a general about the potatoe crop has greatly subsided, the disease being appearently arrested by the same bright weather that hastened the maturity of the corn; but the want of sufficient moisture spare the life of this wretched man having small, thus reducing the yield which otherwise led, he was executed in front of York Castle, would have been very great. THE GREATEST MEDICAL DISCOVERY

OF THE AGE.

DR. KENNEDY, of Roxbury, has discovered in one of our common pasture weeds a remedy that cures

FROM THE WORST SCROFULA DOWN TO A GOMMON PIMPLE.

HE has tried it in over 1100 cases, and never failed except in two cases, (both thunder humor.) He has now in his possession over two hundred certificates

of its value, all within twenty miles of Boston. Two bottles are warranted to cure a nursing sore mouth. One to three bottles will cure the worst kind of pim.

Two to three bottles will clear the system of biles.

Two bottles are warranted to cure the worst canker in the mouth and stomach. Three to five bottles are warranted to cure the worst

One to two bottles are warranted to cure all humor Two bottles are warranted to cure running of the

ears and blotches among the hair. Four to six bottles are warranted to cure corrupt and running ulcers.

One bottle will cure scaly eruption of the skin. Two to three bottles are warranted to cure the worst

Two to three bottles are warranted to cure the most desperate cases of rheumatism.

Three to four bottles are warranted to cure the salt Five to eight bottles will cure the worst cases of

Reader, I peddled over a thousand bettles of this in the vicinity of Boston. I know the effect of it in every case. So sure as water will extinguish fire, so sure will this cure hamor. I never sold a bottle of it but that sold another; after a trial it always speaks for itself. There are two things about this herb that appears to me surprising; first that it grows in our pustures, in some places quite plentiful, and yet its value has never been known until I discovered it in 1846-second, that it

should cure all kinds of humor.

In order to give some idea of the sudden rise and great popularity of the discovery, I will state that im April, 1853, I peddled it, and sold about six bottles per day—in April, 1854, I sold over one thousand bottles

Some of the wholesale Druggists who have been in business twenty and thirty years, say that nothing in the annals of patent medicines was ever like it. There is a universal praise of it from all quarters.

In my own practice I always kept it strictly for hu-mors—but since its introduction as a general family medicine, great and wonderful virtues have been found

in it that I never suspected.

Several cases of epileptic fits—a disease which was always considered incurable, have been cured by a few bottles. O, what a mercy if it will prove effectual in all cases of that awful malady—there are but few who have seen more of it than I have.

I know of several cases of Dropsy, all of them aged people cured by it. For the various diseases of the Liver, Sick Headache, Dyspepsia, Asthma, Fever and Ague, Pain in the Side, Diseases of the Spine, and particularly in diseases of the Kidneys, &c., the discovery has done more good than any medicine ever known.

No change of diet ever necessary. Eat the best you

can get, and enough of it. DIRECTIONS FOR USE.—Adults one table spoonful-per day—Children over ten years dessert spoonful— Children from five to eight years, ten spoonful. As no directions can be applicable to all constitutions, take sufficient to operate on the bowels twice a day.
