ARRIVAL OF THE ATLANTIC.

New York, Oct. 23.—The steamship Atlantic from Liverpool 15th inst., arrived at 8 o'clock this evening.

A telegraphic despatch from Madrid of the 12th inst., announces the fall of O'Donnell and the restoration of Narvaes. O'Donnell and all his colleagues resigned on Sunday night, (12th inst.) and their resignations were accepted. Narvaes immediately resumed office.

The Paris Journal Debats says:—"We believe that the pretensions raised by Russia to the Island of Serpents have been abandoned, and the Island will again become a possession of Turkey, but the Belgrade difficulties remain as before.

The Neapolitan affair remains quite unchanged.—All thoughts of an expedition are now supposed to be abandoned, and even the French and English Ministers will not be recalled.

Russia is said to have given formal notice to reassemble the Congress of Paris to which France and Prussia have assented, and now awaits England's concurrence.

Denmark has consented to a reduction of the Land transit duties, preparatory to a reduction of the Sound dues.

The intelligence from England is unimportant. The Asia arrived out on the 13th.

Letters from Paris on the financial crisis are less favourable. The bullion in the bank is said to be increasing, both in Paris and at the branches.

It was rumoured that the Rothschilds had contracted with the bank of France to supply gold to the amount of 6,400,000 roubles.

A revolutionary document, addressed to the Italian people, and purporting to be signed by a Committee for the people and students of Paris, had been secretly posted in various quarters of Paris. It urges them to arms and proposes assistance.

Application had been made to the Portuguese government for authority to lay down an Electric Telegraph between Portugal and Brazil.

Preparations for defence continued at Naples. The Commissioners for settling the boundary line of Bersarabia had nearly completed their labors.

The Czar was to make his solemn entree into St. Petersburg on the 14th inst.

THE LATEST.

Letters from the Royal Albert, bearing the flag of Admiral Lyons, to as late as the 2nd October, announce that she was making preparations to winter about the South Bridge, and within the Golden Horn, and that in consequence of the non-execution of the Treaty of Paris by Russia, Her Majesty's steam frigate Magedecienne, the Lynx, steam corvette, and the Weser, steam gunboat, had re-entered the Black Sea, to be followed forthwith by the Vulture steam frigate.

MULTIPLICATION BY SUBTRACTION.

What a marvel is animal life! it suspends or reverses all the laws of chemistry; it unites and aggregates with activity what apart from its presence tends to separation and death. A still greater marvel is spiritual life, for it reverses the sensible rules of numbers themselves. We were taught amongst the elements of arithmetic that division was continued subtraction, and multiplication continued addition, but Mr. Gladstone has shown us that the reverse is the case in supporting religious institutions. The State formerly gave to the Society for the Propagation of the Gospel in Foreign Parts, 16,000l. a year. In 1831 it subtracted the grant, and the income of the society has in consequence multiplied itself ten-fold, from 5,000l. or 6,000l. a year it has risen to 60,000l. The Queen's letter has just been withdrawn also, which used to bring subscriptions to the amount of some 10,000l. per annum, and this further subtraction the honourable gentleman expects will be followed by a like multiplication of contributions to the society. We trust Mr. Gladstone will formulate his facts, and it will of course come to this—the more State endowment grants you subtract from religious institutions, the greater their income will be. If his present data will furnish a theorem, its example will be twenty-one thousand pounds total income, less sixteen thousand pounds State grant, equal six thousand pounds voluntary income.—Freeman.

Mrs. Stowe on Temperance and the Maine Law.—The supporters of the temperance movement lately sent through the Earl of Harrington an invitation to Mrs. Stowe to attend a public meeting in Derby, in order that a congratulatory address might be presented to her. Mrs. Stowe declined the invitation, as her husband was obliged to leave England to resume his official duties, and she was unwilling to undergo the reception of an address unassisted by him. In her letter to the Earl of Harrington she speaks of the advantage which the Maine Liquor Law has been to the State, and adds:—"It is my belief, from observations and travel in England and Scotland, that almost all the poverty and misery of the lower classes now arises from the traffic in intoxicating drinks. In no country has benevolence been more energetic, and the progress of social reform more rapid. The benevolent works of England strike a stranger as really stupendous, yet this one cause seems to nullify all and keep up misery, vice and disease.—It seems to me that there is now scarcely any cause of poverty and distress which the suppression of the liquor traffic would not remove. Since emigration to the colonies has equalized the population, it would seem as if

there might be money enough and work enough to support the whole population, were it not for the enormous taxation and drain of ardent spirits. The view of your great cities flaming nightly with signs of 'Rum, brandy and gin,' is to the eyes of an American as appalling as the slave-market of our Southern States to an Englishman. With the majority of our respectable population in New England these articles are considered as pertaining only to the department of medical practice, and, if we have them in our houses at all, it is with the same precaution and watchfulness that we use other medicines. When we see how they are publicly obtruded on the eye here every night, with all the attractions of brilliant lights and splendid shops, we wonder that there are any who escape such temptations." Mrs. Stowe, when on a visit, on Thursday week, to Dornoch prison, in company with the Duke of Sutherland, remarked:—"In every place where the Maine Law has been passed and acted upon, prisons are empty, and magistrates have nothing to do. So would it be in Scotland if the traffic in strong drink were at an end."

CHILD OVERBOARD AND NOBLE RESCUE.—A few days ago, as the Isle of Wight steamer, Pearl, was running between Cowes and Ryde, a little girl, three years old, fell overboard from the fore part of the ship. The mother of the girl attempted to jump in after her, but was restrained by the passengers. The sea was very rough, and the child was carried away so that the paddle wheel just passed harmlessly by her. The vessel was going at full speed, and in a moment the infant was seen floating about the paddle wheel. The commander, Captain Galpine, pulled off his hat, coat, and shoes, and jumped into the sea, caught the child, and held her up until a wherry, which happened to be close at hand, came by and picked them both up, from whence they were put on board the steamer, which had been stopped and backed as quickly as possible. The poor child soon recovered. The agony of the mother while her infant was in the sea was most distressing.

MR. now SIR JOHN CRAMPTON.—The Globe says:—"The elevation of Sir John Crampton, to be a Knight Commander of the Bath, marks very distinctly the approval of the Government of the way in which that gentleman fulfilled his duties as Representative of her Majesty at Washington; and the time and manner of raising him to the dignity may be considered as intended to harmonise with the far more important indications which have been given by Lord Palmerston of his earnest desire to avoid any unnecessary offence to the American Government."

The Hon. Justice Haliburton ("Sam Slick") and Mrs. Haliburton have arrived at Upper Norwood. The ex-judge has taken a final farewell of Nova Scotia as a place of residence, and intends to make his home in Great Britain for the remainder of his days.—English paper.

THE FRENCH IN ALGIER.—The army of occupation, according to official returns, costs annually 2,500,000l., which for 100,000 men is certainly not an exorbitant estimate. The Government and police costs about 400,000l. The civil administration and attempts at colonisation costs about 300,000l. The highest year of receipts was about 80,000l. There is at present, therefore, an annual balance of 2,400,000l. against the colony.

MUSICAL POLICEMEN WANTED.—The police of the town of Breslau, in Silesia, have been instructed to see to the tuning of the hand-organs which are allowed to be played in the streets, and to take care that they do not offend musical ears by unpleasant discords, to prevent which they are subjected now to a monthly inspection and trial by the authorised officers of the municipality.

The Nord states that "the principal network of railways in Russia has been conceded to a company composed of capitalists of various countries; among whom the chief are the Paris Credit Mobilier, and MM. Hottinguer, Baring, Hope, and Stieglitz. The concession is granted for eighty-five years, and a minimum interest of 5 per cent is guaranteed to the shareholders by the Russian Government. The lines must be completed in ten years. In consequence of this decision, MM. Isaac Pereire and Thunareysen, on the part of the Credit Mobilier, have left for Russia."

The Emperor of Russia has resolved to introduce the Gregorian calendar into Russia, and thus do away with the difference of twelve days between the old style and the new. This change will greatly aid the development of commerce between Russia and the rest of the Christian world.

The county gaol of Lancashire is now almost self-supporting. A very large number of articles are manufactured there from cocoa nut fibre by the prisoners. These articles are exported largely to America.

During the last seven years, 1,400 murders have been perpetrated in and about San Francisco, and the city itself has been burnt down seven times.

Try Them!

WE mean GERRY'S PECTORAL TABLETS for Coughs and Colds, which, slowly dissolved in the mouth, directly act on the lungs and bronchial tubes when diseased. The common practice has hitherto been to pour large doses of physic into the stomach, thereby not only losing their effects, but inducing dyspepsia, and other diseases of the digestive organs. We say, try them.

Price one shilling sterling by retail dealers throughout the Province, and wholesale in Halifax, by G. E. MORTON & CO., Proprietors' Agents. October 15.

For the Relief and Cure of all Affections of the Throat and Lungs; such as Coughs, Colds, Consumption, Bronchitis, Indigestion, Asthma. It is also an invaluable Remedy for Children suffering with the Whooping Cough or Croup. For all the above complaints this remedy stands unequalled. It is purely a Vegetable Compound, perfectly safe, and not unpleasant to the taste. No family will be without it after having tested its merits.

Try Clirehugh's Tricopherous.

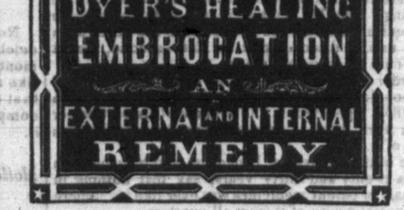

FOR DRESSING RENOVATING AND PRESERVING THE HAIR AND TO PREVENT ITS FALLING OFF OR TURNING GREY.

From the Countess of Elgin. Government House, Quebec, 27th August, 1854.

Mr. V. Clirehugh—Sir—I am directed by the Countess of Elgin, now in Scotland, to request of you to send here, per Canada Express, 4 large bottles of your Tricopherous, with the view of its being sent to England with the Earl of Elgin's other effects. As his Lordship's stay here may be short, please forward it at your very earliest convenience.

Lady Elgin also desires me to enquire if you have an Agent in Britain for the sale of your Tricopherous, as her Ladyship and her family connections highly approve of it.

I am, sir, &c. AL. MCEWAN, Steward to his Excellency, the Earl of Elgin. Agents in Halifax, G. E. Morton & Co. Observe the address—No. 39 GRANVILLE STREET October 15.

THIS valuable External and Internal Remedy originated with a skillful and Scientific Chemist, who found it difficult to obtain an article that would with certainty, and in a short space of time, effect a cure of Wounds, Bruises, Cuts, Burns, &c. By various experiments he at length discovered a preparation which answered his most sanguine expectations, and its peculiar virtues becoming known to his friends, he was induced by them to prepare it for general use.

Since its first introduction to the public some important additions and improvements have been made in its composition, increasing its value and making it applicable to a greater number of diseases, especially to those of the stomach and bowels, and it is now used internally with, if possible, greater success than externally.

DYER'S Healing Embrocation

is a perfect pain destroyer and an invaluable Remedy for Rheumatism, Cuts, Wounds, Scalds, Burns, Bruises, Cholera Morbus, Diarrhoea, Sore Throat, Swellings, Cramp, &c.

It is indeed truly gratifying to us to receive such indisputable proofs of the value of this astonishing remedy, as are daily presented to us. We know its true value experimentally, and do not hesitate to recommend it as superior to any other Medicine for similar purposes, and we are willing at any time to refund the money, if it does not give entire satisfaction, or possess all the virtues we ascribe to it. Be sure and get the genuine.

ALWAYS SOMETHING NEW.

READ THIS—OLD AND YOUNG!

PROFESSOR WOOD'S Hair Restorative.

IT is, no doubt, the most wonderful discovery of this age of progress, for it will restore, permanently, gray hair to its original color, cover the head of the bald with a most luxuriant growth, remove at once all dandruff and itching, cure all scrofula, and other cutaneous eruptions, such as scald head, etc. It will cure, as if by magic, nervous or periodical headaches; make the hair soft, glossy, and wavy, and preserve the color perfectly, and the hair from falling; to extreme old age.

The following is from a distinguished member of the medical profession: ST. PAUL, January 1, 1855.

PROFESSOR O. J. WOOD—DEAR SIR: Unsolicited, I send you this certificate. After being nearly bald for a long time, and having tried all the hair restoratives extant, and having no faith in any, I was induced, on hearing of yours to give it a trial. I placed myself in the hands of a barber, and had my head rubbed with a good stiff brush, and the Restorative then applied and well rubbed in, till the scalp was aglow. This I repeated every morning, and in three weeks the young hair appeared and grew rapidly from August last till the present time, and is now thick, black and strong—soft and pleasant to the touch; whereas, before, it was harsh and wiry, what little there was of it, and that little was disappearing very rapidly. I still use your restorative about twice a week, and shall soon have a good and perfect crop of hair. Now I had read of these things—and who has not? but have not seen hitherto any case where any person's hair was really benefited by any of the hair tonics, etc., of the day; and it really gives me pleasure to record the result of my experience. I have recommended your preparation to others, and it already has a large and general sale throughout the Territory. The people here know its effects, and have confidence in it. The supply you sent us, as wholesale agents for the Territory, is nearly exhausted, and daily inquiries are made for it. You deserve credit for your discovery; and I, for one, return you my thanks for the benefit it has done me, for I certainly had despaired long ago of ever effecting any such result.

Yours, hastily, J. W. BOND. Firm of Bond & Kelley, Druggists, St. Paul.

[From the Editor of the Real Estate Advertiser.] Boston, 27 School Street, March 20, 1855.

DEAR SIR: Having become prematurely quite gray, I was induced, some six weeks since, to make a trial of your Restorative. I have used less than two bottles, but the gray hairs have all disappeared; and although my hair has not fully attained its original color, yet the process of change is gradually going on, and I am in great hopes that in a short time my hair will be as dark as formerly. I have also been much gratified at the healthy moisture and vigor of the hair, which before was harsh and dry; and it has ceased to come out as formerly.

Respectfully yours, D. C. M. RUPP. Professor Wood.

CARLYLE, Illinois, June 19, 1855.

I have used Professor Wood's Hair Restorative, and have admired its wonderful effect. My hair was becoming, as I thought, prematurely gray, but by the use of his "Restorative," it has resumed its original color, and I have no doubt, permanently so.
