Correspondence. For the Christian Messenger. London Correspondence. [From our Special Correspondent.]

(Concluded from last, No.) London, June 19, 1857.

MR. EDITOR,

DESTRUCTION OF THE WHOLE WORLD. It is a fact, that considerable dismay was caused among a large body of people, by a prophecy that on Saturday, the 18th, at midnight, the world would be destroyed, burnt up, by collision with the tail of a comet. In France the belief was even more general : Some suicides are reported as caused by this fear, and many minor disturhances. Such panic is nothing new. Every few years, some idea or other is so set afloat, and frightens silly people out of the little wits they have. However, I am still writing in peace ; and "Scotland stands where it did," as in Macbeth's

Of course, Special Correspondents must know all about comets, as well as everything else; but yours, Mr. Editor, is humble enough to give the opinions of philosophers in preference to his own, especially as he forgets most of the astronomy he learned under fear of the scholastic ferule. Scientific men say a comet may appear about this time, or, not for years to come. Then, as to its density when arrived :-- M. Babinet affirms, that if the density of the air be represented by 1, that of a comet would be a fraction of which the numerator is 1, and the denominator a number superior to unity, followed by 125 cyphers. Sir

there will come a collision, in which the Peers must give way to that House which, as the representative of the people, in effect rules England. MISSIONARIES, Versus THE EAST INDIA COMPANY.

The Bengal missionaries came before Parliament by a petition, in which they called attention to the discreditable state of our civil government,

and the injustice it inflicted on the native population. In a debate on the subject, Mr. Kinnaird, who is so well known as Chairman at Bible and other meetings moved that,-1. "The present administration of the lower provinces of Bengal SCHENECTADY -- UTICA -- SYRACUSE -- ROCHdoes not secure to the population the advantages ESTER,-&C. of good governments, but the mass of the people MR. EDITOR, suffers grevious oppression from the police, and Proceeding to Rochester from Albany we the want of proper administration of justice." passed through an extensive, rich, and highly 2. " That it is desirable that Her Majesty's Govcultivated part of the country, interspersed with ernment should institute special inquiries into the numerous villages, towns, and cities all bearing social condition of the people, and ascertain what measures have been taken in consequence of the J. Herschel mentions the weight of a comet's tail oppression under which a large proportion of the only a few ounces; another philosopher iuhabitants of the lower provinces are now said asserts, that were collision to take place, the effect to be suffering, more especially with reference would only be that of a fly coming into contact to the system of landed tenures, the state of the police, and the administration of justice; and also, that such report be laid upon the table of the House." In support of his motion he said when it was considered that we held that country only on prestige, and that the number of Europeans there, including the native Indian army, only numbered 100,000, while the native population amounted to 150,000,000, they would see how important it was to deal justice to them, in order to secure their fidelity, in case it should be ne cessary to fall back upon it. He then proceeded to show the hardships which and the Redeemer's work be ended, can say, the poor Ryots experienced under the Zemindars their landlords, who maintained their power over them by means of bribery in the courts, and with the police, who always took the side of the strong against the weak. The police in Bengal were infinitely worse than the population over whom they were set; and the magistrates, for the most part were young and inexperienced men, whose standing did not exceed seven years, and some even as low as three years. It was vain to talk at a distance of from thirty to forty miles, and that, too, in a country without even the smallest bridle road or foot-path. In the reply of the Council to the memorial of the missionaries, the evils complained of were attributed to the physical condition of the people and nature of the climate. Mr. Kinnaird, however, relied on the evidence of the missionaries, who devote their lives to improvement of the whole condition of the Hindoos. But the House, by its slender attendances voted the whole thing a bore. Mr. Kinnaird spoke to almost empty benches; and, finding there was no chance of carrying his motion, withdrew it. A member promised, on behalf of the East India Company, attention to the matter (which just means nothing at all), and had the or civil;" so that one oath could be used by all hardihood to say, that consideration of missionary new members, instead of Catholics having a sepa- representations would be construed by Hindoos into an intention to subvert their religion and violently christianize them-which, especially under present exerted native feeling on the sub-

with a locomotive at full speed. M Arago is mid to have entertained an idea that a collision might cause destruction, but that the probability was a million to one. And if comets be, as stated, only masses of luminous vapour, we need entertain no fear.

But, higher and graver reasons prevent the idea of such destruction. Those who repose on the assurances of Holy Writ, and who look only for destruction of this glorious sphere as cotemporary with the "coming in clouds of the Son of Man," when the providences of God shall see fit "Though the earth tremble, though the mountains shake, yet will not we fear." How few, of those who dreaded the comet, stopped to reason ! still fewer, to look, and read, and ponder over the Lamp of Truth, to "see if such things were so !"

PARLIAMENT.

Mr. Hardy brought on his Beer Bill, having for its object to place beer houses under the icensing system and supervision of the magistracy, as are spirit-dealers. But it was contended that the licensing system already works injuriously, and so should not be extended. Sir George Gray promised a more comprehensive measure, by the Government, next Session, and the Bill was withdrawn.

Lord Campbell introduced a Bill to prevent the publication of licentious works and indecent pictures, which of late have become prevalent; and a notorious offender was recently prosecuted for publishing a penny work of that description, which was generally exhibited in the smaller and poorer news-shops.

On the Oaths Bill, the Catholics objected to that clause which denies that any potentate should exercise " ecclesiastical or spiritual" supremacy, they believing that the Pope should exercise it. They proposed to substitute the words " temporal rate form, as now, which does not violate their conscience. It was rejected.

Then came Sir Frederic Thesiger's famous amendment. The Bill, as it stood, admitted ject, would be very dangerous. here. The Hall occupied for that purpose is a on Monday, the 15th, and reached home on splendid building, capable of containing nearly Wednesday evening, the 17th, having spent five lews to Parliament, by omitting that clause of the THE TREATY WITH PERSIA.
