

Dr. Graham, who three years ago murdered Col. Loring at the St. Nicholas Hotel, in this city, and who after being convicted of manslaughter, and imprisoned, was inconsiderately pardoned by Gov. Clark, was last week shot in a political quarrel in New Orleans. His assailant was set free by a coroner's jury, on the ground of having acted in self-defense.—N. Y. Paper.

GAS FROM WATER.—On Saturday evening last, the city of Wilmington, Pa., was lighted with gas made from water, under the patent of Prof. Sanders, of Cincinnati. A large company were present to witness the success of the experiment. The supply of coal-gas was turned off and the water-gas was let into the pipes. The light produced is described as thrice as brilliant and twice as pure, as any that the citizens had before known, but the water gas requires a new kind of burner, and it was only where the new burners were used that the light was superior.

The Buffalo Republic predicts that in less than ten years a steamboat will be constructed to run on our lakes which will be longer than the Great Eastern, and capable of carrying three thousand passengers and three thousand tons freight, and that she will make over thirty miles an hour, and be capable of running in winter as well as summer.

The Rochester Daily Union estimates that one hundred thousand barrels of apples await shipment now at the stations on the Rochester and Niagara Division of the road, to say nothing of the other products. The apple crop of Western New York is very large.

A man named Wilson, dressed in a suit of patent submarine armor, walked across the Schuylkill river, under water, at Philadelphia, last week.

The St. Louis Democrat says that upwards of four hundred slaves leave that city every week, nearly all of whom go to the South, and argues that this draining must soon rid the State of slavery. The gross receipts of money in Missouri, from this source, this year it is thought will amount to millions of dollars.

ENTERPRISING FEMALES.—In the town of Pekin, Niagara county, N. Y. state, reside Samuel Roberts his wife Salina, and their four daughters. They occupy a farm of a hundred acres, the work of which, such as plowing, logging, planting, hoeing, taking care of the teams, &c., has, during the last year, been performed by the mother and daughters. The eldest daughter, aged eighteen, plowed twenty acres, and one of the younger sisters dragged in the grain.

THE TERRIBLE BRIDGE ACCIDENT AT ALBION, N. Y. The Rochester Democrat has the following additional particulars of the terrible accident at Albion, which was mentioned by Telegraph.

"A young man from Brockport had caused a rope to be stretched from the roof of the Mansion House, on the north side of the canal, to a building on the south side, and announced that he would walk across it. The rope was about two rods west of Main street bridge, an iron arched structure, like most of the new canal bridges, which of course offered an eligible stand point from which to view the performance. It was accordingly crowded with people and teams. The rope walker had got part way across the canal, when the bridge broke in two at the centre, precipitating all who were upon it into the middle of the canal. Men, women, children, horses, and wagons, were all piled in an indiscriminate mass. The west half of the bridge went down first, and of course many of those who stood near the break were pitched off in such a way, that when the east half of the bridge came down, which it did immediately, fell upon and covered them up. Mr. Grant informs us that a pair of horses and carriage full of people were crushed in this way so completely that nothing had been found of them when he left—two hours after the accident. He thinks that the number killed must be greater than reported by telegraph. What became of the rope walker no body appeared to know. He was not seen to cross the canal or to return to the side from which he started, so far as Mr. Grant could learn. He may have been startled by the crash so that he fell off his rope into the canal and swam ashore.

CENTRAL AMERICA.—Mexico continues in a frightful state of disorganization. A rebellion has broken out in Venezuela, which, after several sanguinary conflicts, has been suppressed by the Government. The object of the Revolutionists would seem to be plunder and revenge, and the Government has the sympathy and support of the people. The French Charge having taken an active part against the Government, had been summarily dismissed, and embarked on Laguyra in the French steamer, Lucifer, on the 15th ult.

CONSPIRACY IN HAYTI.—A conspiracy against the Haytian Government has been detected and defeated by the able and vigilant President. Gen. Prophete, who was the leader, has been allowed to leave the island. The disappointed conspirators, revenged themselves by the dastardly assassination of an innocent child, the favorite daughter of the President who was quietly reading in a room in the palace.

Messrs. Squire, Parsons & Co., in writing from Brantford Ct say:—We are out of Davis' Pain Killer, and some of our customers are suffering from the want of it. It has, from its own merit, acquired a popularity beyond anything in the whole category of medical preparations. Sold by druggists.

MISCELLANEOUS.

RUSSIA.—The Emperor Alexander has decided that libraries shall be formed in all the vessels of the Russian Navy which make long voyages, and he has ordered that a sum of 800 roubles shall be at once given for the purpose from his private purse, and that an annual allowance of 60 roubles shall be made to every ship-of-the-line, and every frigate from the same source.

THE GREAT EASTERN.—The steamship Great Eastern has been about three years in construction, and her entire cost will be about three millions of dollars. This vessel will be commanded by Captain W. Harrison, formerly of the Cunard line, who superintended her rigging and fitting out. The other officers are, a chief officer, chief engineer, twelve sailing officers, sixteen subordinate engineers, a sailing master a purser, and two or three surgeons.

The crew consists of 60 able bodied seamen, 90 seamen riggers, 200 engineers and fire-men. Steward's staff, 100; making, with officers, about 500.

MUTINY ON BOARD THE GREAT EASTERN.—A special petty sessions was held at Weymouth, on Wednesday, for the purpose of hearing a charge preferred by Captain Harrison, the commander, against 30 of the crew for mutinous conduct. The chief officer said the ship had not her full crew. There were on board about 60 able-bodied seamen. The prisoners had refused to wash the deck on Sunday last. Two of the crew, who appeared to be ringleaders, were respectively sentenced to a month and three weeks' imprisonment, and the remainder to a fortnight, with hard labour.

A Mr. Napier of Glasgow, Scotland, has made a discovery recently, by which the consumption of fuel in steamships is greatly economised. It has been tried on several Ocean steamships with success. The saving is one-third in the quantity used, so that on a voyage from Liverpool to the West Indies and back the saving would be £1500 and £2000. This will be an immense advantage to the Great Eastern, and fortunately for her she appears contemporaneously with the discovery.

The Royal Society of Tasmania has unanimously agreed to give £500 to any person who will introduce five pairs of live full-grown salmon into the colony. They are also prepared to give at the rate of £2 per pair for salmon smelts, and £1 per pair for salmon fry. Beyond this, the Government is prepared to expend several hundreds of pounds in forming ponds and channels for the reception of the noble fish. Salmon, although one of the migratory fishes, does not seem up to the present time ever to have crossed the line.

A very able writer in the last London Quarterly Review, after discussing the whole subject in a very intelligent manner, deliberately comes to the conclusion that if the French should invade England with 150,000 or 200,000 men, the whole military power of Great Britain could not prevent the taking of London. His principal recommendation is the adoption of the militia system of the United States.

A small screw steamer, called the Little Lucy, and only 20 tons register, built at Stockton, England, of thin steel plates, to run on a river in Brazil, has made the voyage out to that country in a very satisfactory manner. The steel plates of which the hull of this little steamer was built are only one-eighth of an inch in thickness.

REINFORCEMENTS AND AMMUNITION FOR CHINA.—The Liverpool Post says that—"It is reported in Plymouth that 2000 seamen and 1000 marines are to be raised from the Channel fleet for service in China.

The utmost activity prevails in the laboratory department of the Royal Arsenal at Woolwich. The men have been working overtime during the past week, an order having been received from the War Department to prepare and pack no less than 3,000,000 lbs. of rifle ammunition by Tuesday next, to be forwarded by the overland route. This ammunition will be placed in small square boxes, each encased in a bag, for the convenience of transit from Alexandria across the Desert. It is also stated that an entire brigade of Royal Artillery will proceed to the same destination.

MYSTERIES OF THE BANK PARLORS.—The New York Tribune says the discount clerk of one of the city banks recently resigned his situation. His resignation was accepted, his accounts investigated and pronounced all right, and a complimentary vote passed by the Board for his attention to his duties, &c. He then stated to the Board that he had a communication to make, as a caution to induce them to watch his successor. He stated that, notwithstanding his accounts were all correct at the time of resignation, he had, in fact, been using the bills receivable of the bank for years as collateral for loans, and employing the funds in the purchase of paper at usurious rates. By this course he had accumulated sufficient property to meet his moderate desires, and, having no further use for the facilities he had enjoyed, he had resigned.
