1859.1

THE CHRISTIAN MESSENGER.

United States.

The Boston Telegraph states that, "The Newfoundland mail at Paris brought the announcement of a full triumph of the French Admiralty over the English in the questions concerning the fisheries.

A serious riot occurred in New York, 16th inst., on the tug boat Moses Taylor, which had been down the Bay to convey passengers on illegally repealed by the Duke in 1852. It is, board steamer Jason. While steaming back the captain of the tug got into a difficulty with a gang of rowdies. The captain had an arm not only insists formally on the right of the broken, his skull split, and is otherwise so badly Tuscans to independent action, but sets forth the injured that he cannot survive. After disabling the captain and engineer, the rowdies proceeded to demolish the cabin and fixtures of the boat.

sary of the settlement of Boston was celebrated in that city on the 16th inst. The Hon. E. Everett delived an oration on the occasion.

the arrival of the Great Eastern, juclude invitations to various notables to visit that city while she is there; amongst the number are President Buchmum and his cabinet, General Scott, the fail them, they will defend by all means the prevent all further dispute, proposed that a mander of the British forces in North Ameri-

MAINE ELECTION .- At the recent Maine State Election, Lot M. Morrill was re-elected Governor, by a majority of about 10,000. There chiefly republicans. will be but one Democratic member in the Senate.

A new patent car is to be tried on the Boston and Worcester railroad It is built of iron, and is so strong that no amount of rolling down precipices will do it any injury. The thinness of the sides allows in the car much more width of room, and the whole weighs less, by a ton, than an ordinary wooden structure.

The Rev. Dr. Edgar, Rev. Mr. Dill, and Rev. Mr Hillison a deputation from the General Assembly of the Presbyterian Church in Ireland, arrived at New York on the 19th inst.

The telegraph is now so extensively used for correspendence, that the revenue of the post office department is a million dollars less, annually, than it would otherwise be.

The Tuscan Government has published very complete justification of its vote repudiating the Hapsburg Lorraine dynasty, and offering annexation to Piedmont. The election of the delegates who passed these votes was conducted by the provisions of the Law of the 3rd of March, 1848, that is, the charter granted by to the 5th June. The intercourse of Europeans the Grand Duke, accepted by the people, and therefore, still the law of the land. This memor indum, addressed to the Cabinets of Europe after the first experiments with the electric teleendless anarchy which must be the result of forcing on the people sovereigns hated by them, on transforming his fleet, and already possesses and openly hos ile to them. It asks " whether six steam war junks. One of them, the Niphen, the aurbition and interests of one tamily shall has started on a voyage of circumnavigation. The two hundred and twenty-ninth anniver- outweigh the interest and will of two millions Her engine is of 350 horse power, and of Ameof men?" It shows that union with Sardinia rican manufacture. The crew consists entirely is their best hope of tranquillity; and rejects of Japanese sailors, who show great aptitude in all apprehension of coercion on the part of the management of steam engines. France as a "thing so enormous, that even to The preparations at Portland for celebrating think of such an act for a moment would be not only an absurdity, but a gratuitous insult contrary to the laws of the country. The towards a friendly Government" In the last re- Government resisted, and the affair was assumsort, it is intimated, that " should human justice ing an unpleasant aspect, when the Emperor, to rights and dignity of their country against ag- third power should be selected as umpire. and gression" It seems that not only the delegates, designated first France, and then Russia. The ca, the Governors of the several States, and the a large part of whom are the equals of our American consul had not sent in his answer, own aristocracy, but the commercial councils when the author of the discovery, who was voted annexation to Piedmont by 1,297 against morally certain of the result, gave up his claim

ITALIAN AFFAIRS.

Parma and Bologna are following, as rapidly as the course of husiness permits, the example Every one speaks highly of the Emperor's of Tuscany. The Parmese have voted for annexation by a majority of 63,403 in favour, to 506 against it. But Bologna and the States of the Church-here will be the difficulty for Louis Napoleon, who lives in hourly fear of the Popish clergy. They, too, have formally proposed to pass a resolution that they will no longer submit to the temporal government of the Pope. Now the Pope, like the other little despots of Central Italy, has not run away this time. French soldiers saved him that fumiliation, and enabled him to plunder and murder at Perugia by his Swiss brigands. The Bolognese and other inhabitants, therefore of the Legations are, technically, rebels-if Lord John Russell himself described things rightly, rebels against intol-STABBING AFFRAY .- An altercation took of the Papal governors, the roads, lately impasproduce since 1848. What will Lord John be able to do for these States of the Church, which both he and Louis Napoleon have agreed need just that deliverance which the inhabitants of the Romagna are now voting ?

25th of August, was-the absolute sale of the landed property taken from the clergy. The value realised by such property to be paid to the clergy in bonds not transferable.

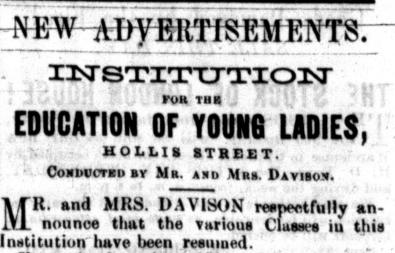

JAPAN

The last China mail brings news from Japan with the country was daily becoming more extensive, and is likely in a few years to effect a complete change in its aspect. The Emperor, graph, ordered the construction of lines connecting together the towns of Yeddo, Nangasaki, Simoda, and Hakodadi. He has also decided

An American, who had discovered a rich copper mine, laid claim to the mine and to the soil, 53. The latter, we may presume, too, were on the soil, and solicited authorisation to work the mine and share the profit with the Japanese Government. The offer was at once accepted moderation in this case.

MISCELLANEOUS.

STEERING APPARATUS OF THE GREAT EAST-ERN .- This simple but most ingenious invention is due to Mr. Langley; the shipbuilder of Deptford. By means of it, Captain Harrison, or the officer of the watch on the bridge, will be enubled to steer the ship by a signal indicator with as much certainty as if he guided the wheel himself. A small illuminated dial, with a movable index, is fixed on the bridge, in front of the officer of the watch, and connected with another of the same description in front of the man at the helm. Moving the index finger of the erable misgovernment; while, since the flight machine on the bridge to port or starboard moves the index of the machine before the belin at the same time, so that not a second is lost in putting the helm hard up or down. In the same manner the rudder itself is connected with another small dial before the helmsman, which tells by its index that they have exactly obeyed orders, while this again communicating with a similar machine on the bridge shows the officer of the watch the instant his commands are executed. The movements of the latter dial being, of course, regulated by those of the rudder, the officer on duty has always the helm, as if were, under his eye, and can detect if the man suffer the vessel to deviate a quarter of a point from her course even for a second. The apparatus, moreover, possesses another advantage, and that is, that simply moving over the index finger to hard aport opens up two red lights on the port side, and by turning it to starboard, a double green one is similarly displayed. Thus small vessels are afforded every facility for getting out of the monster's way in her impetuous rush over the deep.

C. Ayer, of Lowell, one of the stockholders in the concern, during which they came to blows, and Mr. Fay was stabbed with a penknife by Dr. Ayer.

Dr. Ayer was brought before Judge Maine, but released in bail of \$20,000.

A Great Conflagration took place in Chicago, on the 16th. Property worth \$500,000 was destroyed by the Fire.

A CHILD .- The infant child of a Mrs. Burns re- most enthusiastic welcome from the Piedmonsiding on the corner of Third and Race Streets, tese. In the afternoon of the same day, they was placed at a window in the second story. While its mother was absent the child fell out of the deputation is very clever. He espouses the window and struck upon the back of a passing dog. The dog broke the child's fall, and the child broke the dog's back. The child's life was saved, but the dog's was the sacrifice. A most unlucky dog was he. [Cincinnali Gazettee.

A FINGER POINTING OUT THE GUILTY .-- P. Yancey is on trial at Louisvile, Kentucky, for horse-stealing. One point of evidence against the accused is a piece of his finger. Just before he stole the horse his finger was taken off by the knife of a cutting-box, and one Young got possession of it and has kept it for more than a year. Young produced the piece, and it was discovered that it fitted exactly.

Robert Wickliffe the richest man in Kentucky, died on the 2nd inst. He was nearly 90 years of age. He leaves an estate in land and negroes amounting to several millions of dollars. It is stated that there are 1460 buildings of various kinds now in process of erection in Memphis, Tenn., at an estimated cost of \$3,000,-006.

AN OLD TRAVELLER .- Jobs Murphy, an old man 92 years of age, took lodgings last night at the station house in Chelses. He came from Nova Scotia, and had travelled some three hundred miles with a large bag filled with provisions and clothing lashed upon his back. He was bound to Chicago to visit a son who is residing there. A purse was made up in change at Chel. sea, which will enable the "Old Traveller" to take a ride on the rail from Boston to his destinat on -Boston Paper.

The Russian Government has begun the construction of the telegraphic line which is to run from Moscow right across the north of Asia to the mouth of the Amoor, on the Pacific Ocean. The whole length will exceed 2600 leagues. A project has been drawn up for continuing the line to the coast of America, which would afford great facilities for laying the cable to connect the two continents.

" Christian Messenger " Office France, and the known views of the Emperor dered to the Pa i ic to settle the difficulty which ed her to be guided by her mother, and stated will meet with due consideration. If the French has recently sprung up between Great Britain to her that if she wished to have a Bible, or to people would be convinced of the southing free-the principle of free trade, and adopt them free-ly, they may rest assused that political liberty of 1 wish to go with my mother, and 1 will go is 1 wish to go with my mother, and 1 will go with her."
