Meteorological Register. Abstract of Meteorological Observations TAKEN AT ACADIA COLLEGE.

In Lat. 42 ° 6, Long. 64 ° 25. Height above sea, 95 ft. For the month of January, 1859.

Barometer, reduced to 32 ? Max'm., 3rd, 7 a.m., 30.640 Min'm., 8th, 7 am., 29.175 Mean for the month, 29.960 Thermometer in open air Maximum 21st 2p m., 57 900 Minimum 13th, 6am. 9 ? 00 Mean for the month, 21 ? 552 Hygrometer, Mean of Dry Bulb.

Fraction of Saturation, Mean, Mean Cloudiness Number of cloudless days, Velocity of Wind, 2 miles per hour. Pevailing Winds Number of days on which rain or snow fell Amount of rain or melted snow in gauge, in inches 5 722 Depth of Snow, in inches, Number of evenings on which the Aurora was visible, 0

The Hon. Mr. Howe was entertained by a number of his friends at Truro on Tuesday last. money presented to him by A. G. Archibald, Esq. In reply, he referred, in glowing terms, to his late visit to the United States, and said in the last paragraph, " Whether I shall ever again accept of office in this country, is extremely doubt-

C. F. H.

We learn from a contemporary that a puncheon of rum was recently taken from Halifax to the Albion Mines; but on taking it from the truck in front of the rumseller's door, it burst, and spilled its contents in the road. A number of men (?) in their devotion to Bacchus, went on their knees and saved a quantity by putting it " inside their shirt collars."

On Tuesday last a Trotting match came off on the ice on Bedford Basin. As a matter of course much rowdyism and drunkenness followed.

EXPLOSION. - A most remarkable escape occurred recently on an accidental explosion of gunpowder at Mira Bay. Mr. Martell, in the act of mense coalfield here, and many of the seams crop serving one of his customers, was pouring out some powder into the scale from a keg in his arms. By some means, as yet unknown, the den-down nation it has been. Our vessel was powder, in the scale, and instantaneously the the first that ever steamed at Tete, and we were whole remaining in the keg, exploded, and threw down the building, but, what is most marvellous, without injury to those in the store.

At a Public Meeting in WILMOT on Wednesday, the 12th ult, the following resolution respecting the proposed Representation Bill, was unanimously agreed to:

Resolved. That this meeting believe that Annapolis and Granville have but their constitutional right in being long represented in Parliament, but at the same time believe that any act which does not give Wilmet an equal right to a Town or District Representation comes short of common justice, and does not, in the least degree, meet the wishes of the inhabitants of Wilmot.

Quite a gloom was cast over our community on Saturday last, by the announcement that Charles Bridgetown on the same morning. It is stated that Mr. Dickson was on a visit to Bridgetown for the purpose of being married to a lady of that place, and that the ceremony was to have been performed on the day of his untimely death .-

There is some talk among our city merchants about increasing the tare on sugar from 10 to 12 per cent, such, we believe, being the fixed rate in New York and other cities in the Union. This would most likely have the effect of drawing Canadian purchasers this way, besides being a great benefit to retail sellers .- Chronicle

SHIPPING IN YARMOUTH.—The following table, compiled from Yarmouth papers, will shew the great progress of shipping, and consequently o wealth, in our western capital

ealth, in our	western capital :	The Section 1

Dr. Livingstone's Expedition.

Letters have just been received by a gentleman in Glasgow from Dr. Livingstone. The following extracts will be read with interest :-

"River Zambesi, June 23, 1858. "We are below Mazaro, and next week will go to Tete, where my men are waiting for me. It is said that many of them have died of small pox, a disease unknown in their own country; but the rest have purchased pigs, goats, and of when the tragedy was revealed, to be destroyed. poultry with their earnings, and refuse either to -Leeds Mercury. slaughter or sell them till I come. We went up to Mazaro in the Ma-Robert, and encountered the enemy, consisting of 200 well-armed natives (with Tower-muskets). We approached them slowly, and when within hail I called out that we were English and pointed to the English ensign. They gave a shout of joy, and we soon saw them running down with bananas for sale. We mean to keep free of the quarrel on both the native and Portuguese sides, and get away beyond them as soon as possible. My brother found very good cotton in the delta; but all complain that wars ruin their cultivation.

"I still adhere to the opinion I have all along expressed, that a vessel drawing from four to six two prizes, the first amounting to 2501, and the teet water could run upon it during seven or eight months of the year with ease. We all enjoy good health, no case of fever having appeared and industry, over idleness, apathy, and self-in-An Address was read, and a handsome sum of amongst us, and we have been in the delta five deligence, to appear in his journal; and he adds weeks. But this I knew beforehand to be the that Lord Brougham, and M. D. Hill, Esq., the healthy season, or winter, and selected health in Recorder of Birmingham, with other gentlemen, preference to a full river."

" Tete, Sept. 14, 1858. "Formerly I believed, from what the Portuduring only six or eight months in the year. I executors of the late Edward Moxon. now believe that it could be navigated with one of the 30-inch steamers ten months, it not the whole year. When we go to Lupata-where the river is no longer divided into many channelsour difficulties in navigation ended. Here the gentlemen at once yielded to my suggestion, and dug out a ton and a half of coals, the very first ever taken out of the earth in this country. Mr. Rae, a Glasgowegian, pronounces them to be good, and promising better, as they are got from the surface in the bank of the Mautoze, where they have been exposed to the action of floods and atmosphere for ages. There is an imout. With coal, and the best iron ore in abundance, surely Africa will not always be the trodvisited as if we had been another Leviathan. The country was in a state of war, and no Portuguese durst pass, but we did, our passport being the English name. This is against our prospects, for everything stands still, or goes back, when war rages. We had gone from the Portuguese to the native side, from time to time, unmolested, being equally friendly to both parties. Many of the officers wished to accept my mediation, and the rebels all did, but the Governor would not give in. A decisive blow is to be struck soon, but the rebels being mostly runaway slaves, they will hold out. Two who acted as pilots on board once wanted me to buy them to get out of the scrape. It is sad to see so fine a country in this state. We meet some very fine cotton, growing wild wherever it has once been sown. It is long in the staple, and has been introduced, as its name imports. The other has a short strong W. Dickson, Esq., had died suddenly at or near staple, which chings to the seed, and is more like wool in the hand than cotton. We have also lignum vitæ and ebony. But I must leave all these things to be reported on by my companions. My men were still at Tete, though thirty of them had died of small-pox, and six had been killed by a neighbouring chief. The poor fellows received me with great joy, and no less glad was I to see them. All the party is now well. We have had illness, but no coast fever. I think, as both we and the Pearl escaped, it was greatly owing to pushing with all vigour away from the mangrove swamps at the mouth of the river. These are the hotbeds of fever, - I am, &c., "DAVID LIVINGSTONE."

> FIRE AT WINDSOR CASTLE. On Saturday night the son of the Rev. Lord Wriothesley Russell unconsciously left his candle burning on retiring to bed, and was awoke by his bed-clothes catching fire, fortunately just in time to make his escape and give the alarm. The house in which this young gentleman was sleeping belonged to the Rev. Frederick-Anson, canon, and is situated in the cloisters in the lower ward. By the energetic exertions of those who heard the alarm given, the fire was got under before extending to are earnestly solicited to aid the above benevoanother apartment; but the whole of the furniture of the bedroom was consumed. Had not the fire been discovered until a few minutes later, there is every probability of the ancient cloisters, as well as St. George's chapel, Cardinal Wolsey's chapel, over the Royal Mausoleum, and other buildings, being reduced to ashes, as, from the position of Mr. Anson's house, no engine could be brought to play on the flames.

FRIGHTFUL ACCIDENT IN LIVERPOOL Yesterday afternoon, while some improvements were being made at the shop of Mr. Lewis, draper, St. George's street, Liverpool, the party-wall gave way and caused a portion of the premises to fall in. Fifteen assistants and several customers were in the shop at the time of the accident. A number of persons are injured, one supposed to be buried beneath the ruins, and two of the customers (females) were killed on the spot. Three of the workmen were likewise severely injured.

In South Australia the Wesleyans have sixtyseven chapels, besides twenty rooms; the Baptists have forty-three chapels and rooms; the Independents have thirty-eight chapels and rooms; the Protestant Episcopalians have thirty-three Catholics twenty.

THE POISONED LOZENGES AT BRADFORD. The number of persons now known to have been poisoned by eating the lozenges with which arsenic was mixed at Bradford is 225, of whom eighteen have died. Five or six others are still suffering from the effects of the poison, and the Dealers in Sole and Upper Leather, Bindings, Linings, recovery of two of them is doubtful. 136 of the persons poisoned were adults. On Thursday, by direction of the magistrates, Mr. Leverau, the chief constable, caused the thirty-five pounds of poisoned lozenges which the police took possession

A SUBMARINE BOAT .- An American has visited England with the model of an extraordinary submarine boat, which possesses advantages far greater than those of the best diving ball, and combines with these the agencies of the most terrible floating batteries. Sir Baldwin Walker has had interviews with the patentee's agent, and if that invention should be found to answer it will completely revolutionise naval and coast wartare. The defences of Cherbourg and Ports. mouth would avail nothing against the submarine

Mr. John Cassell, the publisher, has offered second to 1001,, for the first and second best tales illustrative of the triumph of morality, sobriety, have agreed to act with him as adjudicators.

Mr. Tennyson's new poem of King Arthur is said to abound in lines and passages of uncommon guese told me, that this river was navigable beauty. It will shortly be published by the

> A NEW DISCOVERY .- The Constitutional Press asserts that the Church establishment is one of the sources of "constitutional freedom"
