The lesson is significant. The ministers of Jesus are instructed changing our present custom ; but I forhow they may best please their Master, and bear. do the greatest good to their fellow-men. If they would be useful, let them heed their appointment, and " PREACH the Gospel." We cannot forget the order of these First Things, evidently 'arranged by infinite Wisdom for the effective Development of Church Life, and the supplying of Models and Principles for the Church Future. We have first a Prayer Meeting of days, in which the minds of the disciples are prepared for all that is to follow. There is the germ of all succeeding developments. Thus Christ says to his Churches, " If you desire my blessing, meet and pray, and continue in prayer and supplication till the blessing comes." A needed service becomes obvious, and it is at once performed by putting in order the completed apostleship. Then they wait prayerfully for further manifestations, and soon the Spirit descends copiously upon them all, qualifying them in an extraordinary manner for their lifework. Immediately, and apparently as natural result, we see Divine Providence opening a wide door for usefulness. Without any appointment of their own, a large congregation is gathered, and made to witness manifestations that awaken deep interest. Next in order, we have without any preconcert or preparation, a sermon full of "Christ and him crucified," every sentence of which cuts with a superhuman edge, and the people fall like grass before the mower. Truly, the Wisdom, as well as the Grace, of God is here.

The ordinary services for public worship and the preaching of the Word do not afford opportunity for christians to express their adherence to the truths which they have emthose occasions. Even a regular participation cherishing hopes of an eternal union in heaven

The Conference Meeting as observed by Baptist Churches is appropriated for the special purpose of Christian Communion, and when properly conducted, and rightly estimated by all its members, is one of the most instructive and profitable of all the appointments of the Church and may be made the means of greatly enhancing the blessings of Church membership Christians enjoying the hopes of heavenly blessedness do much at those meetings towards the edification and encouragement of their fellow pilgrims by making brief communications. Union with the Church of Christ is receives. The piety and usefulness of our churches we conceive are to be raised and promoted more by a high appreciation of individual responsibility with respect to fellowship and fellowship meetings than by any other means. Whilst Infant baptism we conceive casts personal responsibility into the shade and in many cases entirely destroys it, those who are free from its trammels should exemplify their freedom not only by thinking and acting for themselves in that ordinance name as that he may enjoy the fellowship of but by constantly showing themselves wit nesses for the truth before their brethren and the world.

Our news by the English Mails, which reaches up to the 23rd ult. is anything but satisfactory or cheering as regards the prospects of a European War. It may indeed be said to be reduced to the bare hope, that some unlooked for circumstance may intervene, to change the whole aspect of affairs between the parties most nearly concerned in the threatened conflict. The last report which appears to have been an authentic one, was, that Austria had given Sardinia but three days to disarm ; and in case of her refusal, that war would be at once declared. If such be the case, the meaning is obvious. Austria has upwards of two hundred thousand men in her Italian Province of Lombardy, on the very borders of Sardinia, who, it is said, has not more than 60 or 70 thousand at the most. It is therefore the policy of Austria to strike an immediate blow, before the vast army which Louis Napoleon has collected on the Southern borders of France, shall have passed the 'Alps. The defeat or disorganization of the Sardinian Army would give Austria an advantage which it might cost France much to retrieve. The Congress is still spoken of, but the chances of any effectual interposition amid the explosive elements of war seem to grow every day less. There is little doubt but that an immediate rising would take place in many parts of Italy in favor of the Sardinians, but insurgent multitudes however great, are seldom of much service siderable degree of order and discipline.

Those who rightly estimate the blessings of the Gospel of Christ will also set a high value on all its institutions, and will be ready to obey all its commands. No attempt will be made by them to evade obedience to any of the duties it enjoins. The language of such will be "Lord, what wilt thou have me to do ?" and when convinced of duty they will not delay to observe his precepts.

The organization of believers into churches is doubtless intended to accomplish important an inestimable priviledge which belongs to those, and those only, who have been made the subjects of a new birth unto righteousness and have thus become 'new creatures in Christ Jesus : " Except a man be born of water and of the Spirit he cannot enter into the kingdom of God."
