

in Bermuda and the Bahamas. This alarming pestilence has been most fatal at the former place among the troops, who are ordered to and daily expected at this port, until the hot season is over.

The Delegates from the several Provinces of British North America have been in consultation during the past week at Charlottetown, P. E. I., and arrived in Halifax on Saturday last. They consist of almost all the leading men of the several Provincial Governments—the pith, as it were, of our Colonial influence and ability. Their object, as is of course generally known, is the Union of the British Provinces, whether a Federal or Legislative Union is yet a point undetermined. Nothing has yet transpired as to the result of their deliberations. Whatever such result may be, it can only be preparatory to the action to be taken by the Legislatures of the respective Provinces. We do not apprehend anything very decisive for the present, although the movement is one that may probably lead to highly important changes in our Colonial relations. Much might be effected previous to anything like a general Union, to place the several provinces upon a much more satisfactory and advantageous position, as regards their social and commercial intercourse with each other, than now exists.

CIVIC.—Wm. Ackhurst, Esq., we perceive, has had a respectfully signed requisition, presented to him, asking him to allow himself to be nominated for Alderman of Ward 3. Mr. Ackhurst has done good service to the city in the Aldermanic office, and we presume there will be no opposition offered if he will consent to the nomination, but will be elected by acclamation.

At a Meeting of the Halifax County Sessions held on Tuesday the 6th inst., a motion was made by Mr. Justice Naylor to rescind a resolution, passed at a late meeting, requiring applications for tavern licenses in the country districts, to be recommended by a majority of the residents in the polling district in which the inn may be situated, and to substitute another granting increased facilities for obtaining permits. To this Mr. Justice Jennings moved an amendment, declaring that it was not expedient to disturb the existing regulations; which motion prevailed by a large majority.

He was seen by them leaving about four o'clock in the morning having a dark lantern and taking something away with him. A desk taken was found hid away on the Common the following day. It contained \$20 which had not been abstracted. Some idea is entertained of the party as he left his hat behind.

The Directors record with much satisfaction the hospitalities and assistance everywhere extended to the deputation, which were so generally bestowed, that during the whole tour of nearly four weeks, no travelling expenses were incurred. As on former occasions Messrs. Hyde and Lindsay conveyed Mr. Hutton and the pupils free of charge on their respective routes. Mr. McKay, of the Prince of Wales Hotel, Truro, entertained them gratis, and the Captain of the Pictou and New Glasgow steamer carried them free to and fro.

T. H. RAND Esq., Superintendent of Education, is travelling through the Western Counties and along the southern shore, for the purpose of meeting the several Boards of Commissioners, Inspectors &c. We are informed that the opposition to the New School Law is fast disappearing.

CURIOUS DISCOVERY.—A correspondent of the Eastern Chronicle states that some gentlemen, while waiting for the steamer at Point Brulo, took a small skiff and rowed along the shore, as the sea was perfectly calm. Reaching a prominent rock, they heard a dull splashing sound apparently inside of it. This roused their curiosity, and rowing up to it, and scrambling over the ledge, they were astonished to see that inside it was a natural basin about fifty feet in circumference scooped out by the action of the waves as perfectly as if the hand of man had done it—and literally swarming with a wriggling mass of eels! How they got there seemed at first as inexplicable as how frogs got inside of rock sometimes, according to certain accounts; but the mystery was solved by one of the party who discovered about ten feet from the bottom of the reservoir an aperture communicating with the sea above low water, but which enabled the rising tide to fill the basin, and the eels to enter and leave thier secluded retreat at pleasure. It is suggested that the discovery may prove valuable, by taking steps to establish a regular fishery of eels. "Eel Pie Island" in the Thames may thus be eclipsed in fame and value by "Eel Pot Rock" at Brulo.

POTATOES do not appear to have suffered from disease to any extent as yet. We trust the crop may be secured without much loss.

Diphtheria is said to be dangerously prevalent in Granville, Annapolis County.

MASON & HAMLIN'S CABINET ORGANS, FOR Families, Churches, and Schools. ADAPTED TO SACRED AND SECULAR, CHURCH AND HOME MUSIC.

They are elegant as pieces of furniture, occupy little space, are not liable to get out of order, and every one is warranted for five years.

The CABINET ORGANS, introduced about a year since, and manufactured exclusively by MASON & HAMLIN, have met with success unprecedented in the history of musical instruments. Supplying a long-felt want, they have been received with the greatest favor by the musical profession and the public, have already been very widely introduced, and the demand for them is still rapidly increasing, and must continue to increase as their merits become known. They are to private houses, Sunday-schools, and smaller churches all that the larger pipe organs are to large churches. In addition to this, they are admirably adapted to the performance of Secular as well as Sacred Music.

The CABINET ORGAN is essentially different from and a very great improvement upon all instruments of the Melodeon or Harmonium kind. Its superior excellence consists in many important characteristics, among which are:

- 1. The more organ-like character of its tone.
2. It has greatly more power and volume of tone in proportion to its cost.
3. By the employment of a very simple and beautiful invention, its capacity for expression is made vastly greater than has ever before been attained in such instruments. This invention is especially valuable, because scarcely any practice is necessary to render it available. Any ordinary performer can master it in an hour or two.
4. It admits of great rapidity of execution, adapting it to the performance of a greater variety of lively secular music.
5. No instrument is less liable to get out of order.
6. It will remain in tune ten times as long as a Piano-forte.

It may be reasonably said that if these instruments have the great and obvious superiority thus claimed for them, they must have received very warm recommendations from professional musicians, who would naturally be most interested in the introduction of such instruments, and who are the best judges of their excellence. Such recommendations have already been given to them to an extent unparalleled. Among those who have proffered written testimony to their admirable qualities and great desirability, and that they regard them as unequalled by any other instruments of their class, are such well-known musicians as Lowell Mason, Thomas Hastings, William B. Bradbury, George F. Root, etc.; the most distinguished Organists in the country, as Cutler, of Trinity Church, N. Y.; Morgan, of Grace Church; Zundel, of Mr. Beecher's Church; Braun, Wels, Wilcox, Tuokerman, Zerrahn, etc.; such celebrated Pianists as Gottschalk, Wm. Mason, Mills, Sanderson, Strakosch, etc. In brief, more than two hundred musicians, including a large portion of the most eminent in the country, have testified to this effect: Each CABINET ORGAN is securely boxed, so that it can be sent safely to any distance.

ILLUSTRATED CATALOGUES, with full particulars, free to any address. Persons residing at a distance can order by mail with entire confidence of receiving as perfect an instrument as though selected in person at our Ware rooms.—No deduction from the prices, which are in variable.—Terms, Cash.
