

peremptory forbidding the system. This would certainly be a peaceful and most happy way to remove the last foul blot upon the national character.

Mr. Colfax in a speech publicly declared that he had no disguise to make of his sentiments or his principles; that he didn't or he wouldn't stand before them with a forked tongue; that, while a friend to their industrial, general, and mining interests, and advocating the rights that the general government owed to them, he wished to tell them frankly what this government had a right to demand of them, to wit—allegiance to the Constitution, obedience to the laws, and devotion to the Union and the government.

One of the party, Mr. Bowles of the Springfield Republic, thinks government ought to take decided ground on the matter.

"At present," he says, "one-half or two-thirds of the Federal officers in Utah, are polygamists, and others bear no testimony against it. This, certainly, is a disgrace to the country, and should not be tolerated for an hour."

It is considered a crime by the common law of all civilized nations, as well as by the statutes of our own; and if it were punished as such, it is highly probable that the leaders would have new light and abandon it altogether.

Charles Durkee, late U. S. Senator from Wisconsin, has just been appointed Governor in place of Jas. D. Doty, deceased, whose antecedents lead us to expect that all his influence will be wisely employed against this iniquity.—Morning Star.

LATEST FROM EUROPE.

NEW YORK, August 21st, 1865.—Steamship Belgian passed Farther Point yesterday, with dates to the 11th.

Queen Victoria and the junior members of the Royal Family had arrived at Antwerp, from whence they proceeded to visit the King of the Belgians.

A terrible tragedy had occurred in London. A man took three children to lodge, temporarily, at a coffee house, and murdered them in their beds by suffocation. The murderer escaped.

In England nothing had been heard from the Great Eastern.

A meeting of the Atlantic Telegraph Company had been held, at which it was resolved to complete the present cable, and construct and lay another.

The new Parliament had been further adjourned, nominally, until the first of November.

Liverpool Chamber of Commerce has memorialized Postmaster General to have the Cunard Steamers sail on Friday instead of Saturday.

Weather unfavourable and breadstuffs advancing.

Reports prevailing of Potato rot in Ireland.

PRUSSIA AND AUSTRIA.

The terms on which Austria is ready to concur with Prussia for the settlement of the Schleswig-Holstein difficulty have been made public. The Cabinet of Vienna is willing to let her grasp all take Kiel and occupy Rendsburg, provided Prussia give Austria a quid pro quo in the shape of the rectification of the Silesian frontier. The administration claims of Prussia in the Duchies, to be left to the decision of their future Duke; and for this shorn dignity Prussia proposes the Grand Duke of Oldenburg. To this proposal Austria replies: Pledge yourself, then, not at any future time to return to the scheme of annexation—to ask the people of the Duchies themselves what they would wish in the matters of their own Government is the last thing in the thoughts of either of the two Cabinets.

RUSSIA.

According to The Russian Gazette, the Jewish populations in the empire of the Czar are about to be admitted to wider privileges. At present they are not allowed to settle in Eastern Russia, nor are they allowed to change their abode without permission, but the Czar thinks of abolishing both restrictions.

The capture of Tschkend, as it is spelt in Petersburg, where, according to an eastern account, the Russians were said to have been defeated with such heavy loss, was accomplished with a loss of only 25 killed and 85 wounded. The Invalids Russe says that the place will only be provisionally held.

Savage work must be going on in Poland, of which we hear only by accident. The Moscow Gazette says that many villages have been devastated by incendiarism to prevent the Russians taking possession of consecrated property.

The Czar, by a gracious decree, has permitted the smoking of tobacco in the public squares and streets of St. Petersburg and other places; but he prohibits the use of it in stables, haylofts, barns, and dangerous localities, and benignly leaves the management of smokers on railway lines in the hands of railway authorities.

SPAIN.

REMOVED LEGITIMIST RISING IN SPAIN.—Madrid, Aug. 1 (Evening).—The Epoca asserts that some Legitimist bands have appeared in the mountains of Soria; their watchword being "Spain and Catholicism."

MISCELLANEOUS.

It is stated that the cause of the suspension of telegraphic communication with India consists in a break in the submarine cable about 350 miles from Bushire.

LAPSE MEMORIAL.—A restaurant in the Palais Royal was a few days since the scene of a rather unusual occurrence. A priest, aged forty, had breakfasted there without being particularly remarked. About an hour after his departure he returned, and after exchanging a few words with the master of the establishment, he raised his voice, and begged permission to make an amende honorable in public. He had forgotten, he said, that it was Friday, and had eaten meat, adding that as the involuntary scandal was public, the reparation ought to be so likewise.

AWFUL CASE OF INFANTICIDE.—A woman named Charlotte Winsor was sentenced to death at the late Exeter assizes for the murder of the illegitimate child of Mary Jane Harris. Winsor and Harris were put upon the trial at the previous assizes, but the jury were unable to agree upon a verdict. When the prisoners were brought up again on Friday, Harris was admitted to give evidence against the older woman. Her statements are appalling. If she is to be believed, Winsor boasted of having put several illegitimate children to death in consideration of sums of money paid her by their mothers. Harris described, with horrible minuteness, the conversation with Winsor, and subsequently the murder of the child, who was suffocated under a bed. On Saturday Winsor was found guilty and sentenced to death, the judge holding out no hope of mercy.

THE BRITISH CAPTIVES IN ABYSSINIA.—The Pall Mall Gazette announces that Mr. Palmer, the traveller, has been appointed by Government to go out to the King of Abyssinia, with a view of obtaining the release of the British subjects in captivity.

UNIVERSITY OF LONDON.—The senate of this university have agreed upon the immediate institution of a new degree, that of a Doctor of Literature, and the scheme has been approved of by her Majesty's Government.

A Vienna telegram publishes a very unusual instance of mercy on the part of the Emperor of Austria. It is stated that all the Polish and Hungarian political prisoners will be amnestied, the first on the birthday of the Emperor, the last on the feast day of the patron saint of Hungary.

The Lord Mayor of London, recently attended by the usual civic authorities, laid the foundation-stone of new Blackfriars-bridge. The new bridge, which has not yet received its distinctive name, will be completed, according to present calculations, in about two years; the estimated cost of the whole erection being 320,000L.

HOUSE OF REFUGE FOR FEMALE INEBRIATES.—We learn from the Edinburgh Daily Review that the Lord Provost of the capital has just laid the foundation-stone of an asylum for female inebriates. It is to cost about 3,000L, and is to accommodate fifty inmates. The undertaking is in a great measure due to the efforts of Dr. Greville.

The Emperor Maximilian of Mexico speaks fluently in six languages; and generally wears duck trousers and a roundabout and a sombrero hat. His wife, the Empress Charlotte, is a rather good-looking brunette, with a penchant for waterfalls.

The geological world will be sorry to hear that the wonderful toad, which was found imbedded in a block of magnesian limestone, at Hartlepool, and computed to be 6000 years old, expired on the 30th of June. It was found in April last, and had been in an aquarium at the Hartlepool Museum, and while there has attracted thousands of visitors. Its death is attributed to injuries which are supposed to have been inflicted by some excursionists from Newcastle.

It has long been a question among scientific men, says the Opinion Nationale, whether the immediate cause of Cholera exist in the atmosphere or not. Experiments recently made in Egypt seem to favour the affirmative. Two captive balloons were sent up, one of them over Alexandria, the other over a village in the isthmus where cholera had not made its appearance. From each of the balloons was suspended a piece of fresh beef cut from the same ox. After the balloons had remained up for some hours they were both pulled down, and the beef suspended over Alexandria was completely tainted, while that which had been suspended over the village was as sweet and good as ever.

CHARGE OF POISONING AGAINST A MEDICAL MAN.—A medical practitioner, named Sprague, residing at Ashburton, near Dartmouth, has been apprehended on a charge of attempting to poison four persons—viz, his wife, his own father, his wife's mother, and a domestic servant. The matter thrown from the stomachs of the persons who are alleged to have been poisoned has been forwarded to Professor Herapath for analysis, and the report of the professor was expected yesterday, to which day the case had been adjourned. The charge has created very great excitement in Ashburton.

And never yield to fear. There is a land mine eye hath seen, In visions of enraptured thought, So bright that all which spreads between; Is with its radiant glory fraught: A land upon whose blissful shore, There rests no shadow, falls no stain; There those who meet shall part no more, And those long parted meet again.

I have used J. B. Fitch's Golden Ointment and find it to be the best article for drawing and healing any wounds or skin disease.

AYER'S CATHARTIC PILLS

ARE the most perfect purgative which we are able to produce or which we think has ever yet been made by any body. Their effects have abundantly shown to the community how much they excel the ordinary medicines in use. They are safe and pleasant to take, but powerful to cure. Their penetrating properties stimulate the vital activities of the body, remove the obstructions of its organs, purify the blood, and expel disease. They purge out the foul humors which breed and grow distemper, stimulate sluggish or disordered organs into their natural action, and impart a healthy tone with strength to the whole system. Not only do they cure the every-day complaints of every body, but also formidable and dangerous diseases. While they produce powerful effects, they are at the same time, in diminished doses, the safest and best physic that can be employed for children. Being sugar-coated, they are pleasant to take; and, being purely vegetable, are free from any risk of harm. Cures have been made which surpass belief, were they not substantiated by men of such exalted position and character, as to forbid the suspicion of quackery. Many eminent physicians and men of science have lent their names to certify to the public the reliability of our medicines, while others have sent us the assurance of their conviction that our Preparations constitute immensely to the relief of our afflicted, suffering fellow men.

The Agents below named are pleased to furnish gratis our American Almanac, containing directions for the use and certificates of their cures, of the following complaints:

Costiveness, Bilious Complaint, Rheumatism, Dropsy, Heartburn, Headache arising from foul stomach, Nausea, Indigestion, Morbid Inaction of the Bowels and Pain arising therefrom, Flatulency, Loss of Appetite, all Diseases which require an evacuant medicine. They also, by purifying the blood and stimulating the system, cure many complaints which it would not be supposed they could reach, such as Deafness, Partial Blindness, Neuralgia and Nervous Irritability, Derangements of the Liver and Kidneys, Gout, and other kindred complaints arising from a low state of the body, or obstruction of its functions.

Do not be put off by unprincipled dealers with other preparations which they make more profit on. Demand Ayer's and take no others. The sick want the best and there is for them, and they should have it.

Prepared by Dr. J. C. Ayer & Co., Lowell, Mass., and sold by Druggists and Agents everywhere.

Sold at wholesale and retail by Avery, Brown & Co., Halifax, N. S.; Geo. A. Hays, St. John, N. B.; W. R. Watson, Charlottetown, P. E. I.

BROWN'S BRONCHIAL TROCHES

A Slight Cold, Cough, Hoarseness, or Sore Throat, which might be checked with a simple remedy, if neglected, often terminates seriously. Few are aware of the importance of stopping a Cough or Slight Cold in its first stage; that which in the beginning would yield to a mild remedy if not attended to, soon attacks the lungs.

Brown's Bronchial Troches were first introduced seven years ago. It has been proved that they are the best article before the public for Coughs, Colds, Bronchitis, Asthma, Catarrh, the Hoarse Cough, in Paralysis, and numerous affections of the Throat, giving immediate relief. It is the best and most efficacious for clearing and strengthening the voice.

Sold by all Druggists and Dealers in Medicine, at 25 cents per box.
