

TURKEY.—Constantinople, Aug. 27.—Affairs in a very bad state—the revolt in Candia progresses. The Crotan inhabitants have asserted their independence of the Turkish Empire. Constantinople is announced to be in a state of siege.

BRAZIL.—The steamer Rhine, at London on Friday last, from Rio Janeiro, Aug. 8th, reports that a new Ministry is formed in Brazil, which is for a vigorous prosecution of the war. The Argentines repulsed the Paraguayans, July 11, with severe loss.

The United States steamer Neptic, at Bahia, saluted the flag of Brazil, July 23, as an apology for the seizure of the Privateer Florida in that port.

MISCELLANEOUS.

30,000 volunteers were reviewed by the Duke of Cambridge on the 11th inst., in presence of the Prince of Wales.

A dreadful fire occurred at Antwerp, in which 10,000 barrels of Petroleum were burned. Besides the large bonded warehouses, the Hotel de Coburg was destroyed.

The inhabitants of Sydney have resolved to erect a monument in their town to commemorate the discovery of their country by Capt. Cook. The monument is to be completed in 1870, in which year precisely one century will have elapsed since the discovery of New South Wales by the English navigator.

IN A MONITOR IN THE TORRID ZONE.—During the late trip of the monitor Monadnock to the Pacific coast, when the vessel was in the torrid zone, the thermometer reached the height of 145 to 150 degrees in the fire room, and 125 to 130 degrees in the engine-room. This extreme heat developed several cases of acute spinal disease, attended with violent convulsions, but none proved fatal.

A bottle has been picked up off Darenport, containing the following:—

“Monarch of the Seas left Liverpool on 19th March. May 2nd, no wind; short of provision, and no water. Dismissed in a gale 3rd April, lat. 25 20 N., lon. 48 8 W. (Signed) William Johnson, passenger.” This brief memorandum, which probably contains all that will ever be known of the fate of the ship, or of the 738 souls she had on board.

THE LATE GUNPOWDER PLOT affair was supposed by many to be an invention of the N. Y. Herald, but it is found to have a grain of truth. The facts, as published in the London papers, were that about five pounds of fine gunpowder, done up in a brown paper, with a slow match attached to it, was found about fifteen paces from the Little Abington side of the Victoria Tower. At this spot, if the powder had exploded, it could have done no damage besides breaking a few windows of the House of Parliament.

LONDON FOUNDED BY JULIUS CÆSAR.—At London the Roman general was able both to watch his enemy and to secure the conquests he had made, while his ships could supply him with all the necessaries he required. When, in the autumn of the year 43, he drew the lines of circumvallation round his camp, he founded the present metropolis of Britain. The spot he selected has been—perhaps with one small interval—the habitation of civilized men for 1,833 years. May we not venture to hope that its influence for good has been not altogether unworthy of the position it has occupied among the cities of the World?—Dr Edwin Guest.

AUSTRIA AND THE PARIS EXHIBITION.—The participation of Austria in the Universal Exhibition to be held at Paris next year has become very doubtful. The most busy manufacturing provinces of the empire are Bohemia and Moravia, which have been literally ravaged by the Prussian occupation. A large number of objects intended for the Exposition at Paris have been carried off by the Prussians, and again the exactions and the contributions of all kinds that were levied have been such as to place it beyond the power of the manufacturers to make those fresh sacrifices which would be required to maintain their credit in the general competition of 1867. Rather than present itself in a position of lamentable inferiority the Austrian manufacturers prefer to abstain from appearing at the Paris Exhibition and to reserve their powers for the great Exhibition which is projected to be held in Vienna in 1870.

THE “RED, WHITE AND BLUE.”—The Cable has announced that this vessel, which left New York July 9 for England, arrived at Hastings on Wednesday, Aug. 15, after a passage of thirty-seven days. The “Red, White and Blue” is a miniature full rigged ship of 238-100 tons burden, and commanded by John M. Hudson, late a master's mate in the United States Navy, and accompanied by Captain Francis F. Fitch late of the clipper ship Margaret, and a dog. The vessel is furnished with three masts, and 16 sails, in area 65 yards of canvas, her greatest length being 23 feet, by width of 5 1/2 feet. She is furnished with full equipments, charts, compasses, barometer, and meteorological apparatus, and was stored with 80 days' provisions, including 250 gallons of water, 50 cans of desiccated roast beef, 30 packages of coffee, 200 pounds bread, and liquor, preserves, cigars, and solids and luxuries in profusion, besides which there were 1700 lbs. of ballast on board, and added to which was a weight of three tons, necessary to submerge the vessel even when overloaded. She started off under favorable auspices, and it appears has accomplished her voyage in safety. Hudson and Fitch will now be courted as brave adventurers; had they failed they would have been denounced as fools.—Advertiser, Aug. 18.

MAGNANIMITY.—Mr. Teall had preached to a large congregation at Stoney Gut, on the very spot where Paul Bagle's chapel stood. There were present the wives of the two Bogles, George B. Clarke, the brother of Sam Clarke, and a host of others, all clothed in mourning. After the sermon was concluded, G. B. Clark rose and addressed the weeping assembly and concluded a few words of thankfulness to our society for remembering them in their low estate by sending the Gospel to them, with these words:—“My friends, notwithstanding all the wrongs which so many of us have suffered unjustly at the hands of the authorities and soldiers, I know I speak your sentiment, and my own, when I say we freely forgive all who have injured us in any way.” to which there was a hearty response of “Amen.” A noble sentiment this! Such a mind many who are the despisers and traducers of the negro may well covet to possess. It merely demonstrates its possessors to be no “petted panthers,” proves that the field in St. Thomas-in-the-East “is already white unto harvest.”—Jamaica Morning Journal.

A STAR ON FIRE.—Mr. Edwin Dunkin of the Royal Observatory contributes to the “Leisure Hour,” of August 25th, a paper under this title. It gives an interesting account of the star which burst forth with unusual brightness in the Northern Crown last May. It afterwards faded gradually away to its former telescopic magnitude; and there seems high probability that the star actually took fire and burned for a considerable time, till it actually burnt itself out. The spectrum analysis of its light led to the conclusion that a gaseous condensation was superposed on the ignited solid of which the star consists. Its distance is so great that the condensation just witnessed may have occurred ages ago; and if the star, like our sun, had a planetary system, the heat must have been disastrous to it.

It is impossible to find a place on this broad land where Perry Davis's Pain Killer is not known as a most valuable remedy for physical pain. In the country, miles from physician or apothecary, the Pain Killer is cherished as the exclusive panacea, and it never deceives, while in the cities, it holds place before all nostrums as a relief.—Boston Saturday Evening Gazette.

At Dartmouth, on Thursday morning, in the 87th year of her age, Mrs. Charlotte Bowman, a native of Quebec.

At his residence, Ragged Islands, on the 16th July, Mr. Richard Wall, aged 96 years. He was a native of Long Island, New York, and came to Shelburne in 1814, with the early settlers of that place.

At North Sydney, on the 25th inst., Woodville Porter, youngest son of James and Catherine Armstrong, aged one year, three months and nineteen days.

At his residence at Weymouth, on the 3rd day of June, 1866, Mr. Patrick Condon, aged 45 years, leaving a widow and four children, one then only four weeks old, and bearing the name of his father, has since died, thus leaving the widow and three children, not only to mourn the loss of a husband and father, but also of the loved little Patrick. His while they sorrow, as all others do under similar circumstances, they are consoled by the belief that their departed ones are at rest, and with their Saviour. Brother Condon was evidently a converted man, he was a native of Digby, and brought up a Roman Catholic, but while residing at Westport, in the summer of 1841, the Lord was graciously pleased to bless that place with an extensive revival of religion, when many became obedient to the faith, amongst whom was the subject of this notice, he was led by God's word and spirit, from the crucifix

to the Cross, and embraced Jesus Christ, as the one and only Mediator between God and man, and was baptized by the late Rev. Wellington Jackson, who was then pastor of that church, since which time now 25 years, he has ever maintained his integrity as a Christian and a Baptist. He was graciously sustained during his protracted illness, of nearly twelve months, and died in full hope of the resurrection to eternal life.—Com. by C. R.

Teeth Extracted by the Use of Nitrous Oxide Gas.

WE take pleasure in announcing to our friends and the public that we are now prepared to extract TEETH by the use of Nitrous Oxide Gas. By this process we are enabled to extract Teeth without the slightest pain or inconvenience to the patient.

Anesthesia, by Nitrous Oxide, acts as a healthy stimulant, unattended like other stimulants, by subsequent depression. By superoxidizing the blood it gives to the patient a vigor for resisting the exhausting effects of the operation. Ether and Chloroform on the contrary, deoxidize the blood, and act as reditives to depress rather than elevate the tone of the system.
