

tion is to be with the Alexander Street Church, Toronto.

AN INSTALLATION SERVICE was held in the Leinster Street Baptist Church, St. John, B. N., on Sunday the 27th ult., for the purpose of publicly recognizing the Rev. W. S. McKenzie, as the pastor of the Church. After reading of the Scriptures by Rev. P. McLeod and prayer by Rev. Mr. Saunders, the Rev. G. M. W. Carey preached the Installation Sermon from 2 Timothy 45. The Visitor says "the whole sermon was one well worthy of being listened to by the ministers of our denomination at our Associational gatherings."

The Rev. E. O. Cady, then gave a very excellent and appropriate charge to the church. His address was replete with wise christian counsels, the valuable results of several years experience, and successful labor.

An Ordination Service was held at Canterbury, N. B., on the 16th ult., when Elisha Carey was set apart to the work of the Christian ministry. The Rev. John Rowe of Jacksonville, and Rev. R. Campbell of Lower Woodstock, were the officiating ministers.

Beauginis has experienced a revival under the preaching of the Rev. E. O. Corey. "Backsliders have been reclaimed, sinners converted, and old christians filled with joy unutterable." Eight happy converts have been baptized.

The 28th day of November is appointed by several of the Governors of States in the neighbouring Republic as a Day of Thanksgiving.

SALEM CHAPEL is to be reopened by the Congregationalists. The Rev. Mr. Elliott from Ottawa have been appointed by the Congregationalist body in England, who will sustain him for the present. Mr. E. preached in Chalmers Church on Sunday last.

We learn from the Witness that letters have been recently received from New Hebrides—from Dr. Geddie dated June, and from Mr. Morrison, August 1st. The missionaries and their families were well.

NOVA SCOTIA AUXILIARY BIBLE SOCIETY.—The Fifty-fourth Anniversary of this Society will be held D. V., in Temperance Hall on the evening of Tuesday the 21st inst. Chair to be taken at 7 1/2 o'clock. The usual collection will be taken.

Recent literary notices inform us that Prof. DeMill is achieving success as a writer of fiction. "The Dodge Club" in Harper's Magazine is from his pen, also a new novel entitled "The Cord and the Creese" (the dagger,) appearing in Harper's Bazaar.

We have received the Minutes of the Fourteenth Session of the African Baptist Association held at Bear River on the 28th September, and following days. The record shows that during the past year there have been 3 baptisms, 3 received, 22 excluded, 3 removed, 8 died, and 443 members remaining.

The following is one of the resolutions of the body.

"It is the opinion of this Association, from the evidence adduced, that he, the said Rev. Benson Smithers, has been guilty of immoral conduct on several occasions; therefore his credentials from this body, authorizing him to perform the duties of a Clergyman, be annulled from this date.

And further, That the eleven members who gave in their names to follow Smithers be expelled, and their names be inserted in our Minutes. (Adopted.)"

ECCLIASTICAL MILLINERY.—The Church News of Oct. 9th, says:

"The Art Exhibition, though by no means so extensive as those of previous years, gained in quality what it lost in quantity. The work of the East Grinstead religious was greatly admired, being altogether in the spirit of ancient embroiderers; with the collection of really handsome suits of vestments, plate, altar linen, frontals, hangings, and ornaments was full of interest, and will no doubt most satisfactorily do its work in the Wolverhampton locality. Several Roman Clergy were present from time to time, and expressed their astonishment at the splendor and beauty of the collections. Our notes of it have been crushed out this week."

The Archbishop of York discountenances Ritualism. The Ritualists, wishing to have their revenge, ticketed a set of vestments on view in the Wolverhampton Ecclesiastical Arts Exhibition thus—"Any priest willing to introduce vestments into the diocese of York will be presented with this set. Apply to the Hon. Sec., &c." A correspondent of the Record, says: I have reason to believe that no application was made. Nevertheless the offer was very tempting, and might have proved efficacious in ensnaring some weak-minded priest into a dispute with his bishop."

NEWS SUMMARY.

The Cable despatches from Europe during the past week, relate exclusively to Garibaldi's movements for the occupation of Rome. He is within six miles of the city, with about 5000 or 6000 men—we of course may be much mistaken, but we should judge from present appearances that the ultimate success of his enterprise is somewhat doubtful. There has not been, as was the case in his march on Naples, an almost universal rising of the people in the country through which he has passed. Had the whole of the part of the Papal territories through which he has approached the city risen at once, and had the citizens of Rome who favored the movement, been numerous and powerful enough to take possession of the city and receive Garibaldi with open arms, the case might have been different. It may possible turn out so still, but as far as we can judge his own enthusiasm does not seem to have taken a very strong hold on any but a few of his immediate followers—where he once fully in possession of Rome there might very probably be such a demonstration of sympathy throughout Italy, as would compel Victor Emmanuel to consent to the movement, and act as some justification for disregarding what is called the Treaty of September. In such case, the Emperor Napoleon, who is deeply compromised by that Treaty to maintain the temporal power of the Pope, might feel himself released, on the ground of the universal voice of the Roman subjects of the Pope. His own position as Emperor of the French rests solely on the vote of the universal suffrage of the people which placed him where he is—an authority which he therefore professes to hold sacred. He has however sent a squadron and troops to the relief of the Pope, and they are landed at Civitta Vecchia, a port of the Papal dominions, and more are being hastily despatched unless before now Garibaldi shall have been in full occupation of Rome with manifest indications of support throughout Italy, the French will undoubtedly again take military possession of the city and the present attempt to eject Pius the Ninth from his Dominion must fail. Whatever amount of individual sympathy may exist throughout Europe in favor of Gen. Garibaldi's objects, there is also a strong moral sense prevailing of the necessity of adhering to treaties, and of preserving peace among the surrounding nations, which might very possibly be the consequence of Garibaldi's success.

The first session of the Canadian Parliament under the Act of Union, will meet this day at OTTAWA. We shall look with much interest to this inaugural assemblage of the Representatives of the New Dominion. It is supposed that the session will be a very short one—not over a few weeks; and that after a very few indispensable measures shall have been attempted, it will be adjourned for some considerable time. Among the questions which require immediate attention, will be the equalization of the Tariff of duties among the several provinces, a regulation of the Currency, the necessary legislation in reference to the Intercolonial Railway and a few others. The M. P.'s will however in the mean time have time enough to become acquainted with each other and to brace themselves for future action as occasion may require.

NOVA SCOTIA FRUIT.—We have received the List of Prizes awarded by the Fruit Growers Association of Nova Scotia, at Somerset on the 24th ult.

The Silver Medal of the Royal Horticultural Society of London given for the best lot of the following sorts of Apples, twelve of each sort, viz: Gravenstein, Yellow Bellefleur, Ribston Pippin, Baldwin, Nonpareil, and Rhode Island Greening, and requiring to be taken three times was awarded, for the second time, to Dr. Hamilton of Cornwallis.

The prizes for the largest and best collection of apples grown by the exhibitor, not to exceed 24 sorts, six of each sort, were as follows:

- 1st. Henry Skinner, \$6.00
- 2nd. Joseph C. Starr, 5 00
- 3rd. Ward Eaton, 4 00

A seedling Grape raised by Mr. Wm. Sutton of Cornwallis, and which bore its first fruit this year, was tested by the Council and highly approved, and the sum of Four Dollars was awarded to Mr. Sutton therefor.

The total number of entries was 639. Quite a number of Exhibitors we perceive were from Annapolis county. The two counties of Kings and Annapolis, judging by the names on this list comprise the principal fruit-growers of this province.

ANAPOLIS APPLES are beginning to appear on our wharves. Some are certainly splendid fruit. Mr. James P. Dodge informs us that he sold three barrels of Gravensteins for eight dollars a barrel, and one barrel of No. 2 for six dollars. The former were such fruit as one, having had much to do with Annapolis Apples, says, he never saw in Halifax before; and he believed they would have realized \$9 if Mr. Dodge had asked that price.

It was said in the St. John Visitor, that Nova Scotia apples are commanding a very high price in St. John market, where Gravensteins were selling for \$5—one barrel having sold for \$7.00 and another for \$7.50.

When the Annapolis Railway is completed, we hope to see our Annapolis fruit-growers sending the bulk of their fruit to the Capital, and that they may get equally good prices.

FOR AUSTRALIA.—Messrs. Salter & Twining are sending the brig Chanticleer direct to Melbourne. She is expected to sail in a few days from this port. We trust that this attempt to open up a trade with a distant colony may prove successful. If a line could be established to leave here every season, we doubt not it might be made a profitable business.

Rev. A. S. Hunt, formerly of the 1st Cornwallis Church, has accepted a call to Dartmouth. The health of Mr. H. has lately been bad; and in his new field of labor the demand upon his physical energies will be much less than in Cornwallis.—Acadian Recorder.

FOUND AT LAST.—a remedy that not only relieves, but cures Consumption, and its numerous satellites, which revolve around it in the shape of coughs, colds, influenza, bronchitis, &c. This remedy is Dr. Wistar's Balsam of Wild Cherry.

THE MASON & HAMLIN CABINET ORGAN.—Those who are at all conversant with musical matters have heard of the Mason & Hamlin Cabinet Organs, which may be said to have achieved celebrity in a short time, commanding attention in foreign countries as well as at home. These makers had noted carefully the imperfections and the need of the reed instruments, and directed all their practical experience and the knowledge derived from an extended series of experiments, to the correction of such imperfections, and to the supplying of these manifest needs. Their experiments in the single point of the reeds has resulted in the production of a quality of tone which assimilates so closely to the pipe organ quality that it is difficult to distinguish between the two. This is a most important development of the reed instrument, as it obviates the popular objection to the former reedy, thin nasal quality of instruments of this class, and adapts it in a remarkable degree to the services of the church and to vocal accompaniment and worship at home.—New York Tribune.
