particular, have engaged our attention, and excited afresh our admination of that beneficent system of Public Schools, which in a few short years, in flerce conflict with no ordinary amount of deep-rooted hostility, has done so much for the general enlightenment and elevation of our native Province. The men who projected and organized, together with those who are conducting this grand educational enterprise, can well afford to encounter any opposition to their noble offorts, and to smile at any depreciation of their inestimable services by the prejudiced and the inestimable services by the prejudiced and the penurious among their fellow-citizens, the number of whom, we gratefully record, is rapidly and delightfully diminishing year by year, as the system they deprecate wins its way to greater success, and practically demonstrates its vast superiority over the previous methods of school instruction. On the grand question of Free Schools Nova Scotia has fought the battle and won the victory, while New Brunswick, alas, has yet to wake up out of its deep slumber. Now and then a voice is lifted, as recently by His Excellency, the Governor, at the anniversary exercises of the Fredericton Seminary, calling in stirring accent for awakened energy and a forward movement in the work of common school education, and the appeal is vigorously applauded by a few in earnest sympathy with the question, but anon all is silent again, and the question, but anon all is silent again, and we go trudging on "in the way our fathers 000 tons in excess of the quantity for the same trod." But this cannot endure, and, if we period of last year. rightly interpret the signs of the times, it will not be endured by the more intelligent and benevolent sentiment of this Province. What we need first of all, and we must have, before we can hope for any change in our present stupid system of school instruction, are men for our Education, and whose moral courage is equal to the task of proposing and pushing forward measures for that end—men who are possessed of that nobility of nature that will make them ready to accept of any personal detriment, or political martyrdom, as a small price to pay for such an inestimable blessing as that of the free school system. school system. We shall hereafter note for our columns some

of the details of Mr. Rand's Report, which is full of interesting facts and figures, with accompanying and practical suggestions relative to measures for still more signal success in the working of their admirable system.

FIRE. -On Wednesday morning last, Fisheries: about 2 o'clock, fire was discovered at the "It is expedient to restrict the application of

Ayer's Cathartic Pills,

For all the purposes of a Laxative

Perhaps no one medi-cine is so universally re-quired by everybody as a cathartic, nor was ever any before so universal-ly adopted into use, in

any before so universally adopted into use, in every country and among all classes, as this mild but efficient purgative Pttt. The obvious reson is, that it is a more reliable and far more effectual remedy than any other. Those who have not, know that it cured them; those who have not, know that it cures their neighbors and friends, and all know that what it does once it does always—that it never fails through any fault or neglect of its composition. We have thousands upon thousands of certificates of their remarkable cures of the following complaints, but such cures are known in every neighborhood, and we need not publish them. Adapted to all ages and conditions in all climates; containing neither calomel or any deleterious drug, they may be taken with safety by anybody. Their sugar coating preserves them ever fresh and makes them pleasant to take, while being purely vegetable no harm can arise from their use in any quantity. They operate by their powerful influence on the internal viscera to purify the blood and stimulate it into healthy action—remove the obstructions of the stomach, bowels, liver, and other organs of the body, restoring their irregular action to health, and by correcting, wherever they exist, such derangements as are the first origin of disease.

Minute directions are given in the wrapper on the box, for the following complaints, which these

ments as are the first origin of disease.

Minute directions are given in the wrapper on the box, for the following complaints, which these Pills rapidly cure:

For Dyspepsia or Indigestion, Listlessmess, Languer and Loss of Appetite, they should be taken moderately to stimulate the stomach and restore its healthy tone and action.

For Liver Complaint and its various symptoms, Bilious Headache, Sick Headache, Jaundice or Green Sickness, Bilious Colic and Bilious Fevers, they should be judiciously taken for each case, to correct the diseased action or remove the obstructions which cause it, For Dysentery or Diarrhoea, but one mild

For Elysentery or Diarrhoea, but one mild dose is generally required.

For Itheumatism, Gout, Gravel, Palpitation of the Heart, Paim in the Side, Back and Loins, they should be continuously taken, as required, to change the diseased action of the system. With such change those complaints disappear.

disappear.

For **Dropsy** and **Dropsical Swellings** they should be taken in large and frequent doses to produce the effect of a drastic purge.

For **Suppression** a large dose should be taken as it produces the desired effect by sympathy.

As a Dinner Pill, take one or two Pills to promote digestion and relieve the stomach.

An occasional dose stimulates the stomach and bowels into healthy action, restores the appetite, and invigorates the system. Hence it is often advantageous where no serious derangement exists. One who feels tolerably well, often finds that a dose of these Pills makes him feel decidedly better, from their cleansing and renovating effect on the digestive apparatus. tive apparatus.
