THE

North British Cattle Food Company's NUTRITIOUS CONDIMENT

FOR Cattle. Horses and

All the principal prize cattle at the Royal Agricultural Shows, held at the Agricultural Hall, Islington, London, 'Xmas, '68, '69, '70, and '71, were ted on the North British Cattle Food Co.'s Nutritious Condiment.

THE NUTRITIOUS CONDIMENT has been used by the leading breeders, proprietors of racing establishments, and feeders of cattle and borses in England and Scotland for ten years, with great success. The largest contractors, omnibus proprietors, horse car companies, and owners of horses in the principal cities of Europe, also teed with it. The success attending its introduction in Canada was greatly in excess of the most sanguine anticipations of the Company, inasmuch as the large cargo consigned to Montreal in October '72 which was considered to be sufficient to last one year, was exhausted in three months.

Six hundred of the leading Veterinary Surgeons, Horse Owners, Contractors, Farmers, Express Companies and Lumber Dealers of Canada testify to its utility as an economical, health giving food, for Horses and Cattle.

A Condiment is generally considered to be a seasoner of feed. The Nutritious Condiment is, however, a great deal more than a seasoner. Although it will season and render palutable any description of coarse provender, such as chaff, chopped hay, &coit is in itself a fees for the measurement of vessels about to rich nutritious food. This will be seen by the be registered for the first time under the Act, system of feeding, which, if adhered to, will Monday, 11th.—Steamers Somerset, (Am.) be registered for the first time under the Act, system of feeding, which, if adhered to, will Doane, Ch'town, P. E. I., via Port Hawkes. or requiring measurement for the purposes of effect a saving of twenty per cent. in the cost or feeding, and the animals will be in a great deal better condition than when fed upon the

The directions show that where the Condiment is used, one fourth of the oats used at each time of feeding are deducted, and the bulk is made up with chaff or chopped hay. One fourth of a feed of oats costs more than four times as much as a measureful of this Condiment (quantity, one gill costs one cent.)
Then the cost of the chaff or chopped hay to make up the bulk is very trifling. Therefore it will be seen the "Nutritious Condiment besides possessing numerous advantages in point of health, is a cheaper method of feeding than the old system of plain oats.

The Condiment may be had at the Depot, 83 Lower Water Street, Halitax, and of Sub-Agents throughout the Province.
