THE TIDES .- The column of the Moon's Southing gives the time of high water at Parrsboro', Cornwallis, Horton, Hantsport,

Windsor, Newport, and Truro. High water at Pictou and Cape Tormentine, 2 hours and 11 minutes later than at Halifax. At Annapolis, St. John, N. B., and Portland Maine, 3 hours and 25 minutes later, and at St. John's, Newfoundland, 20 minutes earlier, than at Halifax. At Charlottetown, 2 hours 56 minutes later. At Westport, 2 hours 54 minutes later. At Yarmouth, 2 hours 20 min-

FOR THE LENGTH OF THE DAY .- Add 12 hours to the time of the sun's setting, and from the sum subtract the time of rising.

FOR THE LENGTH OF THE NIGHT -Subtrace the time of the sun's setting from 2 hou. s and to the remainder add the time of rising n.x' worning.

BETCHER'S PECTORAL MIXTURE

Coughs, Colds, Whooping Cough, Asthma, &c.

CERTIFICATES. This article has been known to give immediate relief in Chronic Coughs when other Syrups have utterly failed, and for temporary coughs and colds it is invaluable, for which assertions abundant testimony can be produced. For singers and speakers it is also invaluable. No harm can result from a free use of this medicine.

To be had of the Manufacturer J. W. BETCHER, No. 27 CORNWALLIS STREET,

HALIPAX, N. S. HALIFAX, March 10th, 1873.

J. W. BETCHER, Esq. Dear Sir,-Having used a half dozen bottles of your valued Pectoral Mixture I find myself greatly relieved from a chronic cough, and pulmonary weakness which had been preying upon my system for over a year, and

would recommend it to all who are suffering from like complaints. GEO. L. FELLOWS.

ST. JOHNS, N. B., April 16th, 1874. This is to certify that I was attacked with a very severe cold combined with the Asthma very bad, so that I could not lie down or hardly breathe. One bottle of the cough medicine prepared by J. BETCHER, Esq., of Halifax, N. S., relieved me, and five bottles completely cured me so I have not been troubled with the Asthma since and I believe it to be the best medicine for Coughs, Colds, Asthma, &c., that there is made.

JOHN N. DEARBORN. Aug. 12. l yr.

CONSUMPTION CURED.

To the Editor of Christian Messenger. ESTEEMED FRIEND:

Will you please inform your readers that I have a positive CURE FOR CONSUMPTION

and all disorders of the Throat and Lungs, and that by its use in my practice, I have cured hundreds of cases, and will give \$1,000,00.

case it will not benefit. Indeed, so is my faith, I will send a Sample, free, to any sufferer addressing me. Please show this letter to any one you may know who is suffering from these diseases, and oblige,

Aug

Falthfully Yours, DR. T. F. BURT, William Street, New York.

Agriculture.

GRASS FOR POOR LAND .- A correspondent wishes to be informed what kind of grass to sow on poor soil, so as to support stock sufficient to till the land, make beef and butter, and provide a supply of manure, so that the farm shall not grow poorer year after

It is difficult to answer such a question properly without fuller information. Clover, vetches, rye, rape, or kohl rabi, grown with the aid of artificials and fed off by sheep, will put poor land into a state fit for a root erop, after which it may be sown to grain of some kind, and laid down to grass. Or, little by little, the farm may be brought up to a higher pitch of fertility by liberal manuring, and then seeded down. Clover is a valuable restorative on soils where it will flourish, and may be eaten off by sheep or ploughed under as a green manure with the best results. A farmer who has poor land to operate on, should not be in too great haste to raise beef. Let him be content to raise mutton for a time, and employ a flock of sheep in manuring the place bit by bit, until the whole is enriched. A farmer so situated should carefully avoid selling away any of the hay or straw produced. Feed it all to stock. As far as possible too consume the grain on the farm. The crops should be made walk to market by transforming them into mutton, beef and pork .- Canada Farmer.

PRIMITIVE PLOUGHING .- A Mexican correspondent of the Louisville Courier Journal writes:

opportunity of observing more closely Under ground, or where there is no than diligence or railroad can permit, heat for it to attract of consequence, the process of ploughing as commonly it is another matter, and does possess practised in this country. The plough | more or less preservative power. itself is almost a fac simile of the pattern used by the Egyptians in the time of Abraham, and certainly commends Take a large lump of butter, and a itself to all agriculturists on account of table-spoonful of flour; brown them in its great simplicity and cheapness. It the saucepan in which the soup is to be consists of a wooden shaft about four made; then chop up finely some carfeet long and four inches thick, armed rots, onions, celery, sorrel, and potatoes, at its lower extremity with an iron and mix them well together; put tuem point, slightly flattened, and sometimes | into the saucepan with pepper and salt; presenting a feble forward curve. The pour boiling water over them, and let other end is provided with a round stick them stew for three or four hours. A passed through a hole to serve as a few herbs are a great improvement. handle. The pole, consisting of the stem of a small tree, from which the bark has been peeled, is fifteen feet from Dayton, one of the spiciest bits long and attached to the shaft by means of "humors of the trade" we have yet thus consituted is fastened at the exvery light wooden yoke, about seven 'Dear Sirs, I see you have "Old wells Brookfield-A. Not less than fifty such contrivances were crawling at a snail's pace over the field, which we stopped to notice, scratching up the ground the depth of very novel sight.

three to five hundred bushels of flat or Watson, at Pekin, in October 10.

Greenfield—Robert Harlow.
Hantsport—C J. Margeson, Esq., M. D.
Hillsturgh—Nelson Miller, Esq. three to five hundred bushels of flat or field turnips to feed, if he will take the trouble to save the seed. If any one wishes to try it next season, and will in July, when working the corn the roller over them in place of the snow. last time; be sure and put the seed down broadcast, before you plow or of your corn and turnips, keep the weeds | three weeks. down .- Rural New-Yorker.

Prof. McNab has presented to the Royal Irish Academy a memoir on the ascent of water in the stems of plants, to investigate which point very many the privet the rate of ascent to be 16.6 inches; in the cherry laurel the of water. rate varied from 24 to 12 inches. Experiments were also made as to the influence of sunlight and darkness, the inflaence of the bark, the influence of the leaves, and the influence of pressure.

A company has been formed in Los Angeles, to plant 300 acres of forest trees for fuel and other uses, on the line of the Anaheim extension of the Southern Pacific Railroad.

Science.

STEEL FROM SAND .- The great commercial value of the magnetic iron sands of New Zealand, worked to so much advantage in the manufacture of steel, has called attention to the very extensive deposits of the same substance on the coast of Labrador, and several establishments are now engaged in gathering this and forwarding it to England. At one place about thirty tons a day are extracted. The separation of this sand from other substances mixed mechanically with it is greatly facilitated by the use of a new magnetic ore separator, which has also been used to advantage in other localities where the ore by roasting is converted into a magnetic oxide of iron, then pulverized and the iron extracted .- Harper's Magazine.

TAR, OR WHITEWASH .- Tar or any black substance tends to rot wood away much faster than wood that has had nothing at all done to it. A fence tarred and exposed to the full sun, as any observer knows, soon crumbles away. In a few years the wood is like an overdone pie-crust. And then all know how long a mere whitewash fence lasts. Yet there is no preservative character of much account in lime. Every rain goes through it into the wood, but it is the white colour, which rather turns away the heat than attracts it which is in that case the great agent which preserves it so long.

In all discussions as to the preservation of wood by paints or coatings, washes or paints is an important point | &c. in the argument. As for tar, it is the very worst thing that could be used On our way to Temisco we had an where there is exposure to the sun,
