THE TIDES.—The column of the Moon's Southing gives the time of high water at Parrsboro, Cornwallis, Horton, Hantsport, Windsor, Newport, and Truro.

High water at Pictou and Cape Tormentine, 2 hours and 11 minutes LATER than at Halifax. At Annapolis, St. John, N.B., and Portland Maine, 3 hours and 25 minutes LATER, and at St. John's, Newfoundland, 20 minutes EARLIER, than at Halifax. At Charlottetown, 2 hours 56 minutes LATER. At Westport, 2 hours 54 minutes LATER. At Yarmouth, 2 hours 20 minutes

FOR THE LENGTH OF THE DAY .- Add 12 hours to the time of the sun's setting, and from the sum subtract the time of rising.

FOR THE LENGTH OF THE NIGHT .- Subtract the time of the sun's setting, from 12 hours and to the remainder add the time of rising next morning.

BETCHER'S

FOR COUGHS, COLDS, WHOOPING COUGH, ASTHMA, &c.

This article has been known to give immediate relief in Chronic Coughs when other Syrups have utterly failed, and for temporary coughs and colds it is invaluable, for which assertions abundant testimony can be produced. For singers and speakers it is also invaluable. No harm can result from a free use of this medicine. To be had of the Manfacturer

AGRICULTURE.

NON-HEADING CABBAGE. Last autumn I was mourning over an unusual number of half-developed cabbages, which were only fit to be fed to the cows, and mentioned the fact to a Duchess County Farmer, who is in business in New York, and has lately bought a farm near us, asking if his crop had turned out badly. His answer was that he had no more soft heads than he wanted, or to the effect that he would feel disappointed if he had not a considerable number. Now we neither of us, raise cabbages for market, but for our own consumption mainly, and I was utterly at a loss to know what he could do with a quarter of his crop that failed to make heads. He told me that he dug a wide trench, so deep that after some top soil was throw in he could set the cabbages out in the trench as close as they could stand, and their heads and then extinguish it for the succeedwould not come up level with the top ing two minutes. of the ground. When planted, he covers the trench with boards and some brush, corn-stalks, salt hay and earth on the top, keeping it open at the ends or elsewhere until cold weather, and then covering it in close. He said they would all have firm, solid heads in the spring. I tried it, and this spring we are enjoying the best cabbages we ever ate. They are rather small to be marketable, say four and a haif to six inches in diameter, solid and sound, crisp and tender, as delicate as cauliflowers, and what is most remarkable, I never know we are going to have cabbage for dinner until I see it on the table. The wholesome and delicious vegetable is, that it usually fills the house with its detestable odor, so, to have cabbage without this drawback is worth all the trouble it costs .- Cor. American Agriculturist.

BALKY HORSES .- The Kentucky Home Journal gives the following directions for breaking up the balking of a viciously stubborn horse: "Put on your harness and hitch him to anything you desire, either single or double, as you teel disposed, and give him the commanding word to go ahead. If he goes, you have nothing to do or say but let him go on and do your work; but if he refuses to go, take him out immediately, take all the harness off except the bridle, and take a small rope the property of many of our most delicious size of a plough line, and tie one end to the bit on the right hand side, and most perfect health and strength may be pull it through the ring of the left under the chop, pull his head around to brown bread and fruit. - World of Scihis left side, and slip the rope under ence. his tail like a crupper and make it fast, DEAR SIR,—Having used a half dozen bottles of your valued Pectoral Mixture I keeping his head tolerably close to his side. find myself greatly relieved from a chronic Now all is ready, so let him go, and vention of a French architect, M. Sefille go, talking kindly to him all the time. sive process for injecting bricks, tiles, let him get up; now talk kindly to him | proof. and caress him. Your work is now half done, for you have only to tie the me, and five bottles completely cured me so I have not been troubled with the Asthma since, and I believe it to be the best medicine for Court of Cold to be the land make it fast like a crupper the same as before and start him off again and let him go till he falls down a second time; let him get up immediately and hitch him up, and you will probably never have any more trouble with him."

> TURKEY INCUBATORS .- I have tried the plan of hatching hen's eggs under turkeys, and find it an admirable one. In fact, it has quenched a longing I entertained to possess an incubator, and in future I hope to use the poor foolish turkeys, that will bring out brood after brood of chicks and far from tiring of the confinement, seem only too well pleased when they find a fresh nest full of eggs, and grow fat and glossy as well. Not so foolish, perhaps, after all for the weather was very cold, and I fed them well and kept them snug and warm. I set them early in January, and kept them sitting for over three months. I removed the chicks at once on being hatched, and have brought them all up (about 50) under one of the most delicate fabric. Mrs. Cheshire's artificial mothers. "Admirable" mothers I think they should be called, and I hope while I rear chickens never to use any other. My first brood proved to be fully 3 pullets. Down'to April 24, through very severe weather, I only lost 7 out of nearly 100 chicks .- London Live Stock Journal.

The Saturday Review says: The happiest life of a woman is perhaps attained when she adopts the opinions of a reasonably intelligent husband and conscientiously thinks they are her own.

SCIENCE.

THE ELECTRIC LIGHT ON A TRAN-SATIANTIC STEAMER .- The French transatlantic steamer Amerique is now provided with an electric light, in order to prevent her collision with other vessels. The Lanthern is placed on the bow at a height of 22 feet above Minion type. Sheep, 75 cents. Extra Turthe forecastle, or 42 feet above the key, \$2. water. The current is produced by a Gramme electric machine, revolving at the rate of from 950 to 1,000 turns per minute, and affording a light equal to 150 carcel burners. An ingenious device places the control of the light in the hands of the officer of the watch, and by this he can extinguish the illumination or renew it at will without stopping the machine. Experiment has recently proved that the most effective use of the light, as a means of warning, is to allow it to shine for ten seconds

IMITATATION SILVER ON STONE AND PLASTER .- Take two sheets of mica and render them perfectly white by boiling in hydrochloric acid, or by the action of fire. Wash and dry, and then bruise them to fine powder, which sift. Mix the powder with very light collodion; and with a soft camel's hair brush, put two or three layers on the object. This coating, as soon as dry, will assume and preserve the appearance

ASTICK OF OYSTERS .-- But I brought great objection I have to this most you here to have some oysters. Will you have a stick, my dears? Yes a stick of oysters!

In Fu-Chow the passing refreshment trade is supplied, not from cans and kegs, but from a stick, a bamboo stick, upon which the oysters, all in their shell, are set fast. In fact they grew upon this stick. At the proper time, these bamboo rods are thrust down into the oyster beds; and the baby oysters-all babies always want something to hold by while they are growing, you know-attach themselves to these rods. When the oysters are mature, the rods are taken up and brought into market. A most daint and appetizing way, I think -- Wide Awake.

BREAD AND FRUIT .- The nutrient fruits is less than 1 per cent., and yet maintained upon a moderate diet of

WATER-PROOF BRICKS are the intake a good long whip and make him He has patented a simple and inexpen-He will travel like a dog after his tail, and other earthen materials, with the for he can travel no other way, but af- tarry residue from the manufacture of ter a while he will fall down, when you illuminating gas. Brick thus prepared will immediately let loose the rope and is said to be rendered absolutely water-

> An English iron-rolling mill has sucseeded in rolling armor-plates for iron-clad vessels twenty-two inches in thickness. In striking contrast with this, another establishment has rolled plates to the extreme thinness of .0015 of an inch. These sheets are the thinnest ever produced from iron, and are said to be quite tough, though almost as thin as paper.

Avoid arguments with ladies. In spinning yarns among silks and satins, a man is sure to be worsted and twisted; and when a man is worsted and at once what the best medical practition-twisted he may consider himself wound ers have for ages found so difficult even to

An eminent physician says he cures 90 of every 100 cases of scarlet fever by giving the patients warm lemonade with gum arabic dissolved in it. A cloth should be wrung out in hot water and laid upon the stomach.

Common wheat flour, made into a paste, with cold water applied dry, will take out grease spots without injuring

AMERICAN CREMATION .- A citizen of Washington, Penn., has built a large stone house on a hill for the reception of dead bodies, and a furnace scientifically constructed, in which they are to be burned. He has given strict injunctions to his executors that his own body be burned in the furnace.

A. J. Allyd says, in the Household, that "raw onions grated fine and applied to a burn will stop the smarting immediately."

Hundreds Cured daily in Nova Scotia

DIAMOND RHEUMATIC CURE.

Effectually curing hundreds of our Nova Scotia citizens from that terrible malady RHEUMATISM.

This statement is substantially a FACT based upon evidence in the possession of the agent, in the shape of numerous testimonials from past sufferers, in the walks of life, and particularly from some of our most respectable and trustworthy fanilies. DIAMOND RHEUMATIC CURE.

In its history, this invaluable Medicine occupies the most honourable position possible for any remedy to attain. A few years since it was known only to the friends and neighbors and patients of the proprietors, and always sought for by them whenever troubled with Rheumatism, and in this way came to the notice of physicians generally, and through their favorable expression, and its acknow ledged value as a Rheumatic Remedy, the demand for it became so frequent and urgent as to oblige its proprietors to increase their facilities for its manufacture. Its reputation rapidly extended, and soon orders, letters of enquiry, letters of thanks, and certificates of praise were daily received from all sections of the United States and Canada; and in this way on a basis of its merit alone-unaidded by "tricks of the trade" or special efforts—it has risen to its present envious position. Wherever introduced it has received the most flattering preference in the treatment of all rheumatic complaints. In this we are really grateful and happy not alone because our medicine finds ready sale, and is consequently profitable to us, do we say this, but because we open a new field in medical science, and cure relieve. We fill a place heretofore unoc cupied. We relieve the suffering and minister to God's poor; we restore the la-boring to the use of his injured limbs, and save him scores of times its cost in doctor's bills; we carry contentment and gladness into the home of the afflicted, and consequently are remembered by millions of grateful souls.

The proprietor of this medicine has walked the aisles of the Hospitals of London, Eng., for the past twenty years, making rheumatism a speciality, and the prescription from which this remedy is all he ever used in the treatment of this disease.

This medicine is for sale at all the druggists throughout Canada. If it happens that your druggist has not got it in stock, ask him to send for it to

IN VARIOUS STYLES. UPRIGHT, OBLIQUE, SQUARE, ETC. With all the latest improvements, manufactured by the subscribers, and especially adapted to this climate. An assort-

THE "SILVER TONGUE." A very fine toned CABINET ORGAN, by Carbart and Needham, N. Y. The above are offered to a discriminating public at moderate prices,

WM. FRASER & SONS, 70 & 72 Barrington St. June 1. VEGETABLE

THIS standard remedy for coughs and L colds and other pulmonary and bronhcial ailments, was first put before the public in 1826 and ever since then, a period of half a century it has maintained and increased its reputation.

In the meantime, probably thousands of sotheir day, and most of them sank into the oblivion from which they never should have emerged to cheat invalids with false hopes of Though no infallible virtues are claimed for this medicine it is but just to say that it pos-

sesses the following excellencies:-1. On many cases of cough it exerts an almost specific remedial influence, and the cases are very few which it quite fails to benefit. Long standing cases and those of aged persons are almost always greatly relieved.

2. Its action is speedy and pleasant; its taste is not disagreeable; and its dose is smail.

The last point is sure to be appreciated by the invalid. 3. It has received medical sanction, and has been frequently prescribed by some of our

leading physicians. Add to the above that, when the smallness of its dose is considered, it is even cheaper than the common 25 cent Cough Drops and

Syrups, of the Druggists-This remedy has held its way and attained its present reputation by its own merit, with little aid from advertizing. It has an established sale, and those who know it will always use it when they need such aid.

But while our climate remains what it is, the army of sufferers from throat and lung complaints will always be a large one, and continually reinforced by new recruits. That all such may be acquainted with this reliable medicine is the aim of this advertisement.

Price 50 cents and \$1.00 per bottle. CUTLER BROTHERS & CO., AVERY, RROWN & CO.,
Agents, Halifax
