OUR VITAL STATISTICS.

"The Ninth Annual Report of the Marriages, Birthe, and Deaths, registered in Nova Scotia, during the year 1874" is just published.

pages and contains a large amount of interesting information concerning the Vital Statistics of the Province.

forms us that "The number of marriages registered in Nova Scotia during is a very low rate compared with other the year 1874 was 3,079. Of this number 2,350 were by license, and 729 by proclamation of banns. In the previous year 1873, the number of marriages registered was 3,114, being an excess of 35 marriages over those of 1874. This shows a decrease in still higher ratio, about 1 in 20." 1874, which is small, when we take into account the commercial depression facts learned from that source are months. The fluctuations in the marriages of a country express with tolerable accuracy the varied conditions and prospects of the people. When the proportions of marriages to the population of a country are compared, it is ability to procure a livelihood in a country, is the proportion of marriages." In 1871 3074 Marriages were registered. ln 1872 2915 In 1873 3114 In 1874 3079

It appears that the marriages during the year were, amongst the different religious denominations, as follows:

Roman Catholies......743 Presbyterian Church.......646 Church of England......477 Methodists......33 Church of Scotland......126 Congregationalists..... 22 Lutherans...... 17 Reformed Presbyterian..... Universalists..... Other denominations...... 69

"The greatest age of man married was 83. He belonged to Pictou County. The least age of man married was 18; the least age of woman was 14. The united age of the oldest couple was 146. The age of the oldest woman married was 63, she belonged to the County of Pictou, and was the happy bride of the man of 83 above referred to. The united age of the youngest couple was 33, the man being | 24.27 in each 1000." 19, and the woman 14. The marriage took place in Halifax County."

The registration of Births shews a number of curious facts as compared with the Vital Statistics of other countries.

"In Scotland the proportion is 363 births in every 10,000 of the population, or one birth in every 26."

"In England the annual natural increase of population is equal to 1.41 per cent. In Massachusetts the natural increase is about 0 90 per cent. This is a small ratio, and shows that the birth registration is very imperfect. In France the ratio is still smaller, the excess of births over deaths, making only an annual increase of 0.17 per cent in the population."

"In Nova Scotia, the mean natural increase is equal to 1.72 per cent, based on the census returns of 1871. The ratio according to registration is somewhat under this, being 148 or 0.24 per cent less than that according to the census."

"Fully 20 per cent of the births still escape registration, consequently this rate per cent is below the actual

"The births registered in Nova Scotia in 1874, were 10,744 or one birth in each 37 of the population. The ratio should be higher than this. According to the marriages registered at least 12,316 births should have been returned. Taking the estimated population of 1873, the proportion would have been 1 birth in each 32 persons, which is probably as near as may be a fair proportion."

"Of the 10,744 births registered, 5545 were males and 5199 were fe-

males."

"In England the mean ratio is 103.6 boys to 100 girls. The proportion differs however in the different counties. 105.7 boys."

"Taking the aggregate sexes of five years, the proportion is 109 males to 100 females. This may be taken as the mean ratio of the Province."

"The twin births registered in 1874, dent." were 116. Of these 14 occurred in Shelburne.

The twin births have been slightly higher in this than in the previous years. The number, however, is maintained from year to year with remarkable uniformity."

The ratio of twin in Scotland is 1 It is comprised in a pamphlet of 95 in every 83. In Massachusetts the proportion is 1 in each 100, and in this province the rate is about 1 in 98."

"Of the 10,744 births registered, next. Mr. McMillan, the Secretary, in- 10,553 were legitimate and 191 illegitimate. This is equal to 1 in 56. This countries in which registration exists. It is therefore evident that the illegitimate registration of the Province is still very imperfect."

"In England the illegitimates are about 1 in 16. Scotland exhibits a

The Registration of Deaths and the of the Province during the last eighteen elaborated even more than those of Marriages or Births. The ages of deaths, and diseases causing death are classified with great care and minuteness. It appears that in Nova Scotia the deaths are probably in the ratio of 1 to 58 or 60 of the population. Acfound that in exact proportion to the cording to the census returns of 1871, the deaths are given to population in the proportion of 1 to 83. This is equal to 12 deaths in each 1000 persons, or 1.23 in 100.

"In Scotland there is 1 death to each 42 of the population, or 21-07 deaths in every 1000."

"In England the ratio of deaths to population is about 1 in 45, or 22.40 deaths in each 1000, or 2.24 in 100."

1874, was 4,730. Of these 2527 were | will be at the MACCAN STATION on Friday males and 2203 females. There were afternoon the 7th of July, at 1 o'clock, thus 114 deaths of males to 100 deaths of females."

"In England the proportion is 106 male to 100 female deaths, This ratio has been maintained with wonderful regularity for a series of years."

"Glasgow and Liverpool exhibit higher rates of mortality than either New York or London, and London with a crowded population of over three and a half millions, has only a slightly higher death rate than Halifax. This indicates that the sanitary condition of The present mortality of London is 1 death in 41 of the population, or about

. "The mortality of Calcutta has been greatly reduced, (nearly one half) within the last few years by attention to sanitary measures. A knowledge therefore, of sanitary science is no mere accomplishment, but an absolute necessity it attention is at all to be paid to the prevention of disease and the prolongation and enjoyment of life."

Mortality at different ages: Of the 4730 deaths registered, 455 occurred under 3 months, 158 under 6 months, and 220 under 12 months."

We have not space for any further extracts, but would recommend a careful perusal of this work sent forth from the office of Statistics, and it will be evident that much interesting information is supplied by the careful labor of those who are employed therein. This too, is all in addition to the knowledge that, for the many legal purposes requiring it, a record is kept of every birth, marriage, and death in each county of the province.

CURE OF EPILEPSY; OR, FALLING FITS, BY HANCE'S EPILEPTIC PILLS. Persons laboring under this distressing malady, will find Hance's Epileptic Pills to be the only remedy ever discovered for curing Epilepsy or Falling Fits.

The following certificates should be read by all the afflicted; they are in every respect true, and should they be read by any one who is not afflicted himself, if he has a friend who is a sufferer, he will do a humane act by cutting this out and sending it to him.

A MOST REMARKABLE CURE.

PHILADELPHIA, June 28th, 1867. SETH HANCE, Baltimore, Md. — Dear Sir: Seeing your advertisement. I was induced to try your Epileptic Pills. I was attacked with Epilepsy in July, 1833. Immediately my physician was summoned, but he could give me no relief. I then consulted another physician, but I seemed to grow worse. I then tried the treatment of another, but without any good effect. I again returned to my family physician; was cupped and bled several different times. I was generally attacked without any premonitory symptoms. I had from two to five fits a day, at intervals of ptoms. I had from two to five fits a day, at intervals of two weeks. I was often attacked in my sleep, and would fail wherever I would be, or whatever be occupied with, fail wherever I would be, or whatever be occupied with, and was severely injured several times from the falls. I was affected so much that I lost all confidence in myself. I also was affected in my business, and I consider that your Epileptic Pills cured me. In February, 1865, I commenced to use your Pills, and only had two attacks afterwards. The last one was April 5th, 1865, and they were of a less serious character. With the blessing of Providence your medicine was made the instrument by which I was cured of that listressing affliction. I think that the Pills and their good effects should be made known everywhere, that persons who are similarly affected may have the benefit of them. Any person wishing further information can obtain it by calling at my residence, No. 836 North Third St., Philadelphia. Pa.

WILLIAM ELDER. WILLIAM ELDER.

IN THERE A CURE FOR EPILEPS':

The subjoined will answer. GRENADA, Miss., Jane 30. - SETH S. HANCE. - Dear Sir: GRENADA, Miss., Jane 30.—SETH S. HANCE.—Dear Sir: You will find enclosed five dollars, which I send you fee two boxes of your Epileptic Pills. I was the first person who tried your Pills in this part of the country. My son was badly afflicted with fits for two years. I wrote for and received two boxes of your Pills, which he took according to directions. He has never had a fit since. It was by my persuasion that Mr. Lyon tried your Pills, llis case was a very bad one; he had fits nearly all his life. Persons have written to me from Alabama and Tennessee on the subject, for the purpose of ascertaining my opinion in regard to your Pills. I have always recommended them, and in no instance where I have had a chance of hearing from their effect have they had a chance of hearing from their effect have they failed to cure. Yours, etc., C. H. Guy, Grenada, Yalabusha County, Miss.

ANOTHER REMARKABLE CURE OF EPILEPSY; OR, FALLING FITS BY HANCE'S EPILE! TIC PILLS.

times several in quick succession, sometimes continuing natil his mind appeared totally deranged, in which state he would continue for a day or two after the fits ceased. tried several remedies prescribed by our resident phy sicians, but without success. Having seen your adverboxes of your Pills, gave them according to directions, and they effected a permanent cure. The person is new and they effected a permanent cure. The person is new a stout, healthy man, about 30 years of age, and has not had a fit since he commenced taking your medicine, ten years since. He was my principal wagoner, and has, since that time, been exposed to the severest of weather. I have great confidence in your remedy, and would like every one who has fits to give it a trial.

B. L. DEFREESE.

STILL ANOTHER CURE.

Read the following testimonial from a respectable citizen of Grenada, Mississippi SETH S. HANCE, Baltimore, Md.—Dear Sir: I take great pleasure in relating a case of Spasms, or Fits, cured by your invaluable Pilis. My brother, J. J. Ligon, has long been afflicted with this awful disease. He was first attacked while quite young. He would have one or two spasms at one attack at first, but as he grew older they seemed to increase. Up to the time he commenced taking your Pills he had them very often and quite severe, prostrating him, body and mind. His mind had suffered seriously, but now, I am happy to say, he is cured of those ously, but now, I am happy to say, he is cured of those fits. He has enjoyed fine health for the last five months. His mind has also returned to its original brightness. Al this I take great pleasure in communicating, as it may be the means of directing others to the remedy that will cure them. Yours, respectfully, etc.. W. P. Ligoy.
