For Consumption

And all diseases that lead to it; such as COUGHS, NEGLECTED COLDS, BRONCHITIS, PAIN IN THE CHEST, AND ALL DISEASES OF THE LUNGS,

ALLEN'S LUNG BALSAM IS THE GREAT MODERN REMEDY

TT IS WARRANTED to break up the most distressing Cough in a few hours time, if not of too long standing. It is WARRANTED to give entire satisfaction even in the most confirmed cases of Consumption! It is WARRANTED not to produce costiveness (which is the case with most remedies), or affect the head as it contains no Opium in any form. It is WARRANTED to be perfectly harmless to the mos delicate child, although it is an active and powerful remedy for restoring the system. There is no real necessity for so many deaths by Consumption, when Allen's Lung Balsam will prevent it, if only taken in time.

PRICE \$1 PER BOTTLE. Sold by all Druggists.

April 22.

My recovery I attribute solely, with Got's biesening, o the use of our Catarric homedy. Yours truly, D.S.F. Price \$1 per bottle. HENRY SNIDER

THE HOUSEHOLD.

A new washing fluid is recommended: Beat two and one-fifth pounds of soap with a little water into a paste, warm it moderately and mix it thoroughly into twelve gallons of water at 86Fhr., to which have been added a tablespoonful of oil of turpentine, and two of water of ammonia. The articles to be washed are soaked in this for two bours, and then washed as usual; much time, labor and wear of clothes are thus saved. By adding more turpentine and ammonia, the fluid can be rewarmed and used the second time.

Por overs -One cup of sweet milk, two eggs, one and one-half cups of flour, and a pinch of salt. Pour into gem pans when they are very hot. No soda or cream of tartar. Eat with sauce made from the whites of two eggs with four tablespoonfuls of white sugar beaten well together.

SWEET PICKLES. - Pears, peaches and other fruit. One peck of fruit, one quart of water, two quarts of vinegar, fall into the well from above. To two pounds of sugar, two ounces of stick cinnamon, cloves if you like it. Let this boil, then boil the fruit in it by small quantities. When soft, take out into a jar; when all clear, boil the sirup a little, and pour it over the fruit. Cover with a cloth and a jam cover

QUICK LOAF,—One cup of sugar, one-third cup of shortening, half lard A Westport, 2 hours 54 minutes and half butter preferred, one cup of milk, one teaspoonfuls of cream of tartar, and flour. Season with nutmeg. Very nice without raisins, but much improved with them. If not successful at the first attempt, try again, as I am sure you will be very much pleased

> FRIED OYSTERS. -Take one or two eggs, beat as for cake; take some crackers and roll fine; dip the oysters in the egg, then roll them in the crackers, and fry in hot butter or butter and lard. Fry brown.

FRIED APPLES.—This is the season now for this wholesome and palatable dish. Don't try them after the porkthey will taste too porky. Just drop a neat little lump of batter in the spider, heat it hot, and then pour in the dish of sliced apples, add a half teacup of boiling water, put on the cover, and have been described above, and that let them cook until soft without stirring them. Give the spider an occasional shake, then take off the cover and let them fry until they begin fo brown.

In boiling beef and vegetables, if you put a teacup of vinegar into the pot, the beef will be more tender and the cabbage will give out no odor, and beets will be nicer. Put it in when the water is cold.

HEALTHFULNESS OF APPLES .- The frequent use of apples, either before or after meals, has a most healthful effect upon digestion-better eat less meat and more fruit. An eminent French physician thinks that the decrease of rye. dyspepsia and bilious affections in Paris is owing to the consumption of apples, which fruit, he maintains, is an article of food easily digested.

SCIENCE.

The art of putting aspheltum on stone walls, and a coat of plaster over it, to answer for the usual lath and plaster, has been successfully introduced in New Haven, Conn. The plastering adheres well. It prevents the dampness that is usual on outside wall plastering and makes the fire risk less, for the asphaltum cannot be burned, as claimed, while the furring to which laths are nailed furnishes excellent combustible material. The cost, it is asserted, is less than that of lath and plaster.

The bakers and pastry cooks of Paris have been forbidden to burn in their overs wood which has been painted or impregnated with any metalic salt, as it is believed that the articles of food may be rendered deleterious through the agency of the same.

ZING WHITEWASH Mix oxide of zinc with common size and apply to the ceiling with a brush. Then apply a 12,000 pounds of grapes. This is prowash of clorid of zine, which will form a shining surface, a revendo field a dalw

To improve rusty, black, rinse the fabric, whatever it is, in warm water with blueing-about a teaspoonful to a in a postman's bag?" She said three: pint; iron while damp.

AGRICULTURE.

HOW TO MAKE A WELL.-First, of course, the well must be so constructed that it cannot act as a drain for the neighboring soil. This can be done by making the wall above low-water mark, of some material impervious to water, or by omitting this part of the wall altogether. The first can be accom plished by having the wall from a point two or three feet from the bottom made of brick, with a coating of hydraulic cement on its exterior, or of hydraulic well-tubing, with the joinings well protected with cement. In either case the earth should be thoroughly packed around the wall, and a slight embankment should be made around the orifice, to prevent the inflow of surface or storm-water.

In such a well the draining surface is so reduced and placed at such a distance below the surface of the ground that in the great majority of instances the introduction of foreign matter becomes impossible, except in so far as there is a chance that substances will prevent this, the well should be kept covered when not in use. In most cases, however, it is better to omit the upper part of the well altogether. After the excavation is completed, the wall can be built in the usual manner for a distance of two or three feet, more or less, as circumstances may demand. The service-pipe can then be placed in position and the well arched over. The remainder of the excavation can then be filled with earth, well packed as it is thrown in, and the pipe carried to any convenient point. It will be necessary to place above the arch several layers of stones, successively smaller, to prevent the falling of earth into the space below.

The workmen will probably suggest a layer of turf or straw, to accomplish this object; but the presence of either of these substances will cause the water to be unpleasant for a considerable time and will prove the cause of much annoyance.

Thee is a prevalent notion that a well should be ventilated, for the purpose of allowing noxious gases to escape; and that water is better for being exposed to the air. I hardly need state that the only noxious gases in a well (i. e., gases which render the water unwholesome) are the products of the decomposition of organic matter which has found its way into the well in ways which water as it flows into its subterranean passages is more perfectly aerated than it can be in any other way. - Dr. J. W-PINKHAM, in "Scribner's Monthly."

WINTER OATS .- A Tennessee correspondent writes :-- Winter oats is a more highly concenterated food than spring oats from the fact that it has much longer time to grow and perfect itself. The grain is heavier, and the husk or shell of the grain much thinner than that grown in the northern part of New York and Canada. Winter oats is not, as some have supposed, a hardy variety of Northern oats, that stands the winters It is distinct as winter wheat or It has been grown as a winter crop for over thirty years, in the mountains of Tennessee where the past winter was so cold that large vineyards and old peach orchards were destroyed by the frost, the thermometer frequently standing below zero. This oat is supposed to have originated from an Irish oat brought to East Tennessee by way on a basis of its merit alone—unaidthe early settlers, and by being grown from year to year, among the wheat, some of it withstood the winter, and, on principles of selection, the fittest has survived, till at length it has become as hardy as any winter crop. Taking this crop in all its qualities, it is one of great value to the farmers. As a fall pasture to him, an estimate cannot be placed on it. It must be sown early to insure success, so as to give abundance of time to grow a good, stout root before cold weather. August and September is not too early to sow it.

A mammoth bunch of grapes from the great grape vine of Santa Barbara, (a cutting of the monster to the Centennial,) was on exhibition in a fruit store in San Francisco. This cluster weighed 125 pounds, was 6 feet in circumference and 3 feet long. The vine from which this was cut, is sixteen years old, and produce annually, 10,000 to bably the largest bunch of grapes ever grown in this country .- Trade Journal

BY THE DIAMOND RHEUMATIC CURE. Effectually curing hundreds of our Nova Scotia citizens from that terrible malady

RHEUMATISM This statement is substantially a FACT based upon evidence in the possession of the agent, in the shape of numerous testimonials from past sufferers, in the walks of life, and particularly from some of our most respectable and trustworthy fanilies.

DIMONAD RHEUMATIC CURE. In its history, this invaluable Medicine occupies the most honourable position possible for any remedy to attain. A few years since it was known only to the friends and neighbors and patients of the proprietors, and always sought for by them whenever troubled with Rheuma-tism, and in this way came to the notice of physicians generally, and through their favorable expression, and its acknow ledged value as a Rheumatic Remedy, the demand for it became so frequent and urgent as to oblige its proprietors to increase their facilities for its manufacture. Its reputation rapidly extended, and soon orders, letters of enquiry, letters of thanks, and certificates of praise were daily received from all sections of the United States and Canada; and in this ded by "tricks of the trade" or special efforts—it has risen to its present envious position. Wherever introduced it has reposition. Wherever introduced it has received the most flattering preference in the treatment of all rheumatic complaints. In this we are really grateful and happy not alone because our medicine finds ready sale, and is consequently profitable to us, do we say this, but because we open a new field in medical science, and cure at once what the best medical practitioners have for ages found so difficult even to relieve. We fill a place heretofore unoc cupied. We relieve the suffering and minister to God's poor; we restore the laminister to God's poor; we restore the la-boring to the use of his injured limbs, and save him scores of times its cost in doc-tor's bills; we carry contentment and gladness into the home of the afflicted,

and consequently are remembered by millions of grateful souls.

The proprietor of this medicine has walked the aisles of the Hospitals of London, Eng., for the past twenty years, making rheumatism a speciality, and the prescription from which this remedy is all he ever used in the treatment of this disease.

This medicine is for sale at all the drug-gists throughout Canada. If it happens that your druggist has not got it in stock, ask him to send for it to FORSYTH & CO., Halifax.

The

A sta

searching cathartic medicine that can be employed: cleansing the stomach and bowels, and even the blood. In small doses of one pill a day, they stimulate the digestive organs and promote vigorous health.

AYER'S PILLS have been known for more than a quarter of a century, and have obtained a world-wide reputation for their virtues. They correct diseased action in the several assimilative organs of the body, and are so composed that obstructions within their range can rarely withstand or evade them. Not only do they cure the every-day complaints of everybody, but also formidable and dangerous diseases that have baffled the best of human skill. While they produce powerful effects, they are, at the same time, the safest and best physic for children. By their aperient action they gripe much less than the common purgatives, and never give pain when the bowels are not inflamed. They reach the vital fountains of the blood, and strengthen the system by freeing from the elements of weakness.

Adapted to all ages and conditions in all climates, containing neither calomel nor any deleterious drug, these Pills may be taken with safety by anybody. Their sugar-coating preserves them ever fresh, and makes them pleasant to take; while being purely vegetable, no harm can arise from their use in any quantity.
