vant; and when told what a friend ers should be made up in part of teachhe went about from village to village condemned by critics, who preferred with medicine to heal the sick, and the the outsideness of the London Univermessage of salvation to save the lost. sity as its great merit. The fact is that In the beginning of April, 1875, Mr. this question of the advantage of affili-Haegert began work in Kierboni; and ating colleges in some mode or other is on the 15th of May, God gave him the still open. Great names can be cited first signal of success. At that time on either side, and the question is he wrote to me thus :- "I have always discussed with regard to some blessed news. A mahajun, whose local interests that will control largely name is Bolai, has found peace in the decision that may be reached. So Christ. He has been reading a Bible far as the Baptists of these Provinces he got from Cornelius for years, and is are concerned, the case was closed at well acquainted with it. Two years the Convention. They are satisfied with ago he refused to pay the customary that decision. Nothing will be gained tribute to the village idol, on account of by reopening the discussion. We are which his life was threatened, and the united in the proposal to maintain people said they would burn his house Acadia in an independent position. down. He had to apply to the Com- Push on the Endowment. missioner for protection, and by degrees hostilities ceased. About fourteen days ago he received light and salvation; and last Sunday I sold in his house sixteen Gospels to people who came to see me. In less than seven days I sold in all about forty Gospels."

Also, four other Santhals gave their hearts to Jesus-three from Telia and one from the village of Simla. Yesterday I had a long talk with them, and, on asking one of them if he thought that his sins were forgiven, he exclaimed, 'My sins are forgiven. I am so happy all day and all night that I cannot tell you."

On the 12th of July he writes :-"Saturday last I sent a small tent to Telia, and on Sunday morning went there to baptize the candidates who had given evidence of faith in Christ. On arrival I found that one of them had been bound, and taken off by the head man to another village, to keep him from being baptized; but I went there and got him released, and we all went to Telia, where service was conducted, after which six men and five women professed their faith in Christ by baptism. May God keep them for his name's sake, and make them fruitful! They are the first who dared to do right. Their troubles are begun already. One has lost his ricefield which he had cultivated for ten years; another's wife has left him, and the third's wife is going to forsake him; but God is with them, and all will be

And so it has proved. Several who drew back have again came forward, and have found peace in believing. Opposition is in a large measure giving way; and Mr. Haegert is oheered by addition after addition to the little flock which the Good Shepherd is gathering in from among the Santhals of this long-neglected district; and we may hope shortly to see whole villages coming over to the Christian faith.

My colleague, Mr. Jones, and my self were greatly delighted with what we saw of Gospel work among these people during our visit to Keiraboni in November last. It was quite evident that our devoted brother Haegert is doing a good and a great work, and we most cordially commend him and his labour of love to the sympathy and support of all who are interested in the spread of truth among the poor simpleminded sons and daughters of Santhal-

For the Christian Messenger. An Appropriate Answer.

Mr. Editor .-

It is generally known that people in advanced age in many instances become very forgetful, especially of things done or said recently. Such persons, however, sometimes make remarks, or interesting instance of this kind came the circle of his acquaintance, who was been for many years decidedly pious was anxious to attend religious meetings, and to hear the gospel preached. One of her grand-daughters remarked to Charlemagne and earlier. to her, "Grandma, it is of no use for you to go to meeting; for you can not remember anything that you hear." The old lady replied, "If I don't remember what I ate for my dinner yesternay, don't I want my dinner to-day?" Yours truly,

C. TEPPER.

LETTER FROM PROF. D. M. WELTON. LEIPZIG, March 3, 1877. Dear Editor .-

Though I have so long delayed the fulfilment of my promise to send you an occasional letter, I beg to assure you that I have not forgotten it. On leaving Nova Scotia I hoped to be able to write you quite frequently, giving you such of my impressions of men and things on this side of the Atlantic as might be of some interest to your readers. But soon, though reluctantly, was I obliged to abandon the idea; and the reason may be given in three words,-Want of time. After reaching Leipzig it became at once apparent that I could not act as foreign correspondent for any provincial paper without hereby interfering with the work Tower which marks the spot where which I had come specially to do; I' resolved therefore, at least for the time being, to attend to the latter and let the other go.

Halifax, N. S., March 28th, 1877.

THE PUBLIC SCHOOLS OF NEW BRUNSWICK.

We have before us the Annual Report of the Common, Superior, Grammar and Training and Model Schools in New Brunswick for 1876, by the Chief Superintendent of Education.

Part 1, is the general Report and gives a Summary view of the Schools for the year ended April 30, 1876, and shews the number of pupils attending the Schools in the several counties.

The number of Schools, teachers, and assistants, and pupils, for the Summer Term, ended 31st Oct., 1876, is as follows:

1. The number of Schools was 1,274 -increase 100; Teachers and Assistants 1,320—increase 103; Pupils 52,020—increase 3,584.

2. The proportion of the population of the Province attending the Schools during the Term was 1 in 5.49 of the population-increase 1 in 79.74 of the population.

3. The number of different pupils attending the Schools during the year, ended 31st October, 1875, was 64,689increase 2,340. The proportion of the population of the Province attending the Schools during some portion of the year was 1 in 4.41-increase 1 in 122.12 of the population.

This shews a very satisfactory state of the Schools and indicates that progress has been made in education, notdotage, well worthy of attention. An through a hundred vistas; as it were withstanding all the difficulties and commerical depression of the past few

The Superintendent gives a comparative statement or summing up of the advancement made during the past

"The general results now presented are vital ones. By them every school system must be approved or condemned. By these tests it is clearly demonstrated that the outcome of the educational activity of the past five years is the establishment of the great outlines of an enduring and efficient School System. With much pains and labour the Province has been divided into School Districts. Twelve hundred and seventy four Schools have been set in operation The number of School-houses owned by Trustee-Corporations has increased 111. 93 per cent., the School-rooms belong ing to them, 158.71 per cent., and 66 per cent. of the Houses previously owned have been enlarged or extensive ly repaired. School Furniture of the most approved patterns has been in troduced into one-half of the Schools now existing in the Province. School Playgrounds have very generally been procured, and a considerable proportion of them have already been suitably enclosed, while School Premises have been improved in a marked degree. The Value of School-houses, grounds and furniture owned by the Trustees has been increased from \$125.723 to \$777. 735, or 83.83 per cent.; nearly two thirds of the expenditure for which had been discharged on December 31st 1876, and of the balance but 35.86 per cent. rests upon the School Districts out side the seven Districts which embrace the Cities and Incorporated Towns. In surance to the amount of \$222.550 has been secured on School Houses and Furniture. A uniform and superior series of Text-Books has been provided, eleven of which have been prepared at the instance and under the supervision of the Board of Education, while the selection or adaptation of others has received especial care; and the series is now in universal use in the Schools. A good beginning has been made by way of introducing necessary School Apparatus. The enrolled attendance of pupils has been increased 53-69 per cent., and the per centage of average daily attendance has not only been preserved but carried upward over the five years to a degree equal to 3.14 for each Winter Term, and 1.21 for each Summer Term."

"The Normal School has been strengthened and conducted with all the energy practicable within its straitened accommodation; and a new commodious building of brick and stone has been provided, at a cost of \$50,000, in order to secure a permanent supply of trained Teachers."

"The remuneration of Teachers has been made certain, and has been raised to an amount tolerably commensurate with the duties of their office; and an educational periodical has been instituted by the Department."

The Statistical Tables and the Inspectors and Trustees Reports give the fullest information on all matters in the educational work of the province.

The Superintendent's Report fills...... 53 pages. The Statistical Tables...... 40

And the Appendices & Reports 71

Making a pamphlet of.... 164 pages.

The Belgrade correspondent of the Times says the Princess of Servia is "one of the most beautiful women on the face of the earth."

THE SCHOOLS OF NOVA SCOTIA.

Since writing the foregoing on the New Brunswick Schools we have received a copy of the Annual Report of the Schools in Nova Scotia for the year ending Oct. 31, 1876. According to the returns here shewn of the number of pupils in attendance for the past ten years there has been a gradual increase since 1871; whereas in 1870 the number was larger than in the past year, 1876. Here are the number of pupils registered during each of these

1870......94,496 | 1874......93,510 1871......92,858 | 1875......94,029 1872......91,637 | 1876......94,162 1873......93,759

Several of the Inspectors express the opinion that a law passed making attendance at school compulsory would be beneficial. The Superintendent is of a different opinion, and thinks that it would lead to litigation and other serious evils. Nevertheless, he thinks a truant law for Halifax city should be adopted as the attendance is far below. what it ought to be.

In reference to the examination of Teachers we are informed that in the past year:

"There were 1761 candidates for all grades examined at the several stations. Of this number 17 were applicants for Grade A or the Academic Grade: 146 for Grade B; 722 for Grade C; 692 for D; and 184 for Grade E. The number of applicants for 1876 exceeded the preceding year by 359. Of the 1761 who presented themselves as candidates for license to teach, 991 succeeded in obtaining some grade, while 770 failed in making an average, entitling them to any class whatever.

This is a large proportion to have failed in obtaining the lowest grade. It is questionable if there should be any grade E. The Superintendent, however, suggests that "probably onehalf of all our E teachers were examined for a C, but failing in some branch essential to that class, came down to an E. Such teachers are quite competent to take charge of a large number of our schools, and, when employed, make excellent instructors. Teachers of this grade, moreover, are disposed to accept schools in poor, remote sections, as there they can command time and quietness for reviewing and preparing for another and more successful examination. In this way many a poor and remote section gets a teacher really capable of taking the pupils of a much higher school."

In respect to the Colleges Mr. Hunt says : "The wisdom of the Act for establishing the Halifax University remains to be seen, but its advocates are sanguine, and from the vigorous efforts already/put forth by its friends success seems certain. There are encouraging reasons for hoping that very soon all the Colleges will adjust themselves to the new order of things and college work proceed with its accustomed success." The table of College Statistics shewing the number

-qed ,ampitan ila de		OHOV	VS:	(10)	93	N. O
and Cashie " miline	na)-	Dr.	and	18	2.0	gir
Colleges, 1 and 1	When founded.	Total No. Matriculated.	Total No. of Graduates.	No. of Professor	Tutors.	Total Students.
King's. Dalhousie, Arts Faculty. Acadia, St. Francis Xavier's. Mount Allison. St. Mary's.	1788 1820 1835 1855 1862 1840	493 213 392	270 71 159 16 48	5 6 7 2 6 4	i	28 52 57 8 33 33

It is a pity that the Tables with the College Statistics were not completed by giving the totals of the Statistics of the previous year.

Mr. H. recommends the following amendments to the law:-" The extension of the time in which graduates of Colleges may, on an examination in professional work only, receive a Head Master's license; the payment from the County Fund of the Commissioners who actually attend the business meetings of the Board; and the establishment of an Academy at Sydney, C. B., similar to those in Yarmouth and Pictou.

The Superintendent thinks "On the whole we can say with entire confidence that notwithstanding all drawbacks and discouragements, the public schools of the Province were never as prosperous as at the present time."
