AGRICULTURE.

Cherries.

Under the tree the farmer said. Smiling and shaking his wise old head: "Cherries are ripe! but then you know, There's the grass to cut and the corn to hoe; We can gather the cherries any day, But when the sun shines we must make our

To-night, when the chores have all been We'll muster the boys, for fruit and fun."

Up in a tree a robin said, Perking and cocking his saucy head: " Cherries are ripe! and so, to-day, We'il gather them while you make the hay For we are the boys with no corn to hoe, No cows to milk, and no grass to mow At night the farmer said : " Here's a trick ! Those rougish robins have had their pick.' -St. Nicholas.

TO FATTEN CHICKENS .- They must be put in a proper coop; and this, like most other poultry appurtances, need not be expensive. To fatten twelve fowls, a coop must be three feet long, eighteen inches high, and eighteen inches deep, made entirely of bars. No part of it solid-neither top side nor bottom. Discretion must be used according to the sizes of the chickens put up. They do not want room; indeed, the closer they are the better-providtime. Care must be taken to put up such as have been accustomed to be together, or they will fight. If one is chicken should not be put up.

The food should be ground oats, and may either be put in a trough or on a flat board running along the front of the coop. It may be mixed with water FOR THE LENGTH OF THE NIGHT. Sub- or milk; the latter is better. It should be well slaked, forming a pulp as loose as can as be, provided it does not run off the board. They must be well fed three or four times a day-the first time as soon after daybreak as possible or convenient and then at intervals of four hours. Each meal should be as much and no more than they can eat up clean. When they have done feeding, the board should be wiped, and some gravel may be spread. It causes them to feed and thrive.

After a fortnight of this treatment, you will have good fat fowls. If, however, there are but four to six to be fattened, they must not have so much room as though there were twelve. Nothing is easier than to allot them the proper space; it is only necessary to have two or three pieces of wood to pass between the bars, and form a partition. This may also serve when fowls are put up at different degrees of fatness. This requires attention, or fowls will not keep fat and healthy. As soon as the fowl is sufficiently fattened it must be killed, otherwise it will still get fat, but it will loose flesh. If fowls are intended for the market, of course they are or may be well fattened at once; but if for home consumption, it is better to put them up at such intervals as will suit the time when they are required for the table. When the time arrives for killing; whether they are meant for market or otherwise, they should be fasted, without food or water, for twelve or fifteen hours. This enables them to be kept some time after being killed, even in hot weather.— London Cottage Gardener.

VALUE OF THE EARTH-WORM.—The common earth-worm, though apt to be the most delicate child, although it is an despised and trodden on, really a useful creature in its way. Mr. Knapp describes it as the natural manurer of the soil, consuming on the surface the softer part of decayed vegetable matters, and conveying downwards the more woody fibres, which there molder and fertilize. They perforate the earth in all directions, thus rendering it permeable by air and water, both indispensable to vegetable life. According to Mr. Darwin's mode of expression, they give a kind of under tillage to the land, performing the same below ground that the spade does above for the garden, and the plow for arable soil. It is, in consequence, chiefly of the natural oper- a rocking-horse. "Dear me, exclaimed ations of worms that fields which have the aged but thoughtful minister, "how or cinders, become, in process of time, is motion enough, but no progress." covered by a finely-divided soil, fitted for the support of vegetation. This reinnumerable casts of which the initial and help to drive away troubles. soil consists. These are obviously produced by the digestive proceedings

"In this manner," says Mr. Darwin, Agents for the Christian Messenger. "a field manured with marl has been covered, in the course of 80 years, with a bed of earth averaging 13 inches in thickness."—Encyclopædia Britannica.

THE HOUSEHOLD.

TO BROIL A BEEFSTEAK so that it shall retain all the juices, have your rods hot; rub them with a little piece of fat cut from the steak. Be sure the drafts of your stove are open and the fire burning clear and bright; then put on the steak and turn every three seconds. Do not leave it but keep turning for twenty minutes. Broiling it in this way will take five minutes longer than to let it stand and cook, but you will be more than repaid for the trouble by the truly delicious meat you will have. Let the platter be warm on which you intend placing it, and put a piece of butter on the dish; put the salt and pepper on it and rub all together. When the steak is cooked place it in this butter and turn it over once or twice. Send to the table at once.-Housekeeper's Companion.

To DESTROY HOUSE FLIES .- " Archdeacon's Kitchen Cabinet" says that oil of pennyroyal is offensive to them; but as that is quite expensive it gives the of them :- Take one ounce of cobalt, pound it, and place it in plates mixed with spirit. The fumes will kill the quarrelsome, it is better to remove it flies if the room is kept closed. Afterat once; as, like other bad examples word, air the room. Another recipe is tablespoonful each of molasses and black pepper finely ground. Set it about in shallow plates, and the flies will be rapidly killed. One drachm of extract of quassia dissolved in a gill of water sweetened with half a gill of molasses will have the same effect, if set around in flat dishes, to which the flies have access. The quassia acts as a narcotic.

> FISH FRITTERS.—Take salt codfish, soak it over night. In the morning throw the water off the fish, put on fresh, and set it on the range until it comes to a boil. Do not let it boil, as that will harden it. Then pick it up very fine, season with pepper, mace, and perhaps a little salt. Make a batter of a pint of milk and three eggs, stir in the dish, and fry in small cakes. Any kind of cold fish makes nice frit-

FISH ROES .- Put the soft roes from a half-dozen fresh mackerel or shad into a paper case, with shred parsley, a little rasped bread, butter, salt and pepper. Bake them, and serve them with lemon juice squeezed over them.

VARIETIES.

The danger of having a long beard was illustrated in one of the Oswego mills a day or two ago. A workman, whose length of beard is or rather was his pride, was at work over a shaft, round and round in a twinkling. Another workman thrust a heavy stick inman's neck would inevitably have been

JOSH BILLINGS' APHORISMS.—The great fight iz fust for bread, then buton the butter. The great secret ov popularity iz to make every one satissatisfied with yu. The unhappiness of this life seems principally to konsist in gitting everything we kan and wanting everything we hain't got. I hav finally cum to the konklusion that the best epitaph enny man kan hav, for all pratikal purposes, is a good bank account. Paupers suffer less than mizers do—the man who don't know whar he iz going to get his next dinner suffers less than boring to the use of his injured limbs, and the dest our medicine finds ready sale, and is consequently profitable to us, do we say this, but because we open a new field in medical science, and cure at once what the best medical practition-fers have for ages found so difficult even to relieve. We fill a place heretofore unoc cupied. We relieve the suffering and minister to God's poor; we restore the laboring to the use of his injured limbs, and everything we hain't got. I hav finally going to get his next dinner suffers less than the one who is anxious to kno how much it is a going to kost him.

Entering the house of one of his congregation, Rowland Hill saw a child on been overspread with lime, burnt marl, remarkably like some Christians. There

The man or woman who has nothing sult, though usually attributed by far- to do is most miserable. It is hard to mers to the "working down" of these be over worked, but to have no employmaterials, is really due to the action ment is supreme wretchedness. Do of earthworms, as may be seen in the something. Work will relieve sorrow,

A householder, in filling up this of the worms, which take into their schedule at the last census, under the inestintal canal a large quantity of the soil | column, " Were born," described one in which they feed and burrow, and then of his children as born " in the parlor," reject in the form of the so-called casts. | and the other "up stairs."

Hundreds Cured daily in Nova Scotia

BY THE

DIAMOND RHEUMATIC CURE. Effectually curing hundreds of our Nova Scotia citizens from that terrible malady

RHEUMATISM This statement is substantially a FACT based upon evidence in the possession of the agent, in the shape of numerous tes-timonials from past sufferers, in the walks of life, and particularly from some of our most respectable and trustworthy fanilies.

DIMONAD RHEUMATIC CURE.
In its history, this invaluable Medicine occupies the most honourable position possible for any remedy to attain. A few years since it was known only to the which caught his beard and wound it round and round in a twinkling. An. friends and neighbors and patients of the proprietors, and always sought for by them whenever troubled with Rheumatism, and in this way came to the notice of physicians generally, and through their to the cogs, stopping the shaft, else the favorable expression, and its acknow ledged value as a Rheumatic Remedy, the demand for it became so frequent and ur-gent as to oblige its proprietors to in-crease their facilities for its manufacture. Its reputation rapidly extended, and soon orders, letters of enquiry, letters of thanks, and certificates of praise were ter on the bread, and then sugar daily received from all sections of the United States and Canada; and in this way on a basis of its merit alone—unaid-ded by "tricks of the trade" or special effied with himself first, and afterwards forts-it has risen to its present envious position. Wherever introduced it has received the most flattering preference in the treatment of all rheumatic complaints, of stamp. Send for \$3.00 outfit. In this we are really grateful and happy not alone because our medicine finds boring to the use of his injured limbs, and save him scores of times its cost in doctor's bills; we carry contentment and gladness into the home of the afflicted, and consequently are remembered by millions of grateful souls.

The proprietor of this medicine has walked the aisles of the Hospitals of London, Eng., for the past twenty years, making rheumatism a speciality, and the prescription from which this remedy is all he ever used in the treatment of this

Cures Bandrun in a short time. Agents wanted. Immense profits. For terms, &c., address, with 3 cent stamp,

Ayer's Sarsaparilla

For Scrofula, and all scrofulous diseases, Ervsipelas, Rose, or St. Anthony's Fire, Eruptions and Eruptive diseases of the skin, Ulcerations of the Liver, Stomach, Kidneys, Lungs, Pimples, Pustules, Boils, Blotches, Tumors, Tetter, Salt Rheum, Scald Head, Ringworm, Ulcers,

Sores, Rheumatism, Neuralgia, Pain in the Bones, Side and Head, Weakness, Sterility, Leucorrhœa, arising from internal ulceration, and Uterine disease, Syphilitic and Mercurial diseases, Dropsy, Dyspepsia, Emaciation, General Debility, and for Purifying the

This Sarsaparilla is a combination of vegetable alteratives — Stillingia, Mandrake, Yellow Dock — with the Iodides of Potassium and Iron, and is the most efficacious medicine yet known for the diseases it is intended to cure.

Its ingredients are so skilfully combined, that the full alterative effect of each is assured, and while it is so mild as to be harmless even to children, it is still so effectual as to purge out from the system those impurities and corruptions which develop into loathsome disease.

The reputation it enjoys is derived

from its cures, and the confidence which prominent physicians all over the country repose in it, prove their experience of its usefulness.

Certificates attesting its virtues have accumulated, and are constantly being received, and as many of these cases are publicly known, they furnish convincing evidence of the superiority of this Sarsaparilla over every other alterative medicine. So generally is its superiority to any other medicine known, that we need do no more than to assure the public that the best qualities it has ever possessed are strictly maintained.
