For Consumption And all diseases that lead to it; such as

COUGHS, NEGLECTED COLDS, BRONCHITIS. PAIN IN THE CHEST, AND ALL DISEASES OF THE LUNGS, ALLEN'S LUNG BALSAM IS THE GREAT MODERN REMED

TT IS WARRANTED to break up the most distressing Cough in a few hours time, if not of too long standing. IT IS WARRANTED to give entire satisfaction even in the most confirmed cases of Consumption! It is WARRANTED not to produce costiveness (which is the case with most remedies), or affect the head as it contains no Opium in any form. IT is WARRANTED to be perfectly harmless to the mos delicate child, although it is an active and powerful remedy for restoring the system. There is no real necessity for so many deaths by Consumption, when

only taken in time. PRICE \$1 PER BOTTLE. SOLD BY ALL DRUGGISTS.

April 22.

Allen's Lung Balsam will prevent it, it

obtained for Inventors, in the United in Washington, directly opposite the United States Patent Office, we are able greater promptness and despatch and less cost, than other patent attorneys, who are at a distance from Washington, and who have, therefore, to employ "associate attorneys." We make preliminary examinations and furnish opinions as to patentability, free of charge, and all who are interested in new inventions and Patents are invited to send for a copy of our "Guide for obtaining Patents," which is sent free to any address, and contains complete instructions how to obtain Patents, and other valuable matter. We refer to the German-American National Bank, Washington, D. C.; the Royal Swedish, Norwegian, and Danish Legations, at Washington: Hon. Jos. Casey, late Chief Justice, U. S. Court of Claims to the Officials of the U. S. Patent Office and to Senators and Members of Congres from every State. Address :

LOUIS BAGGER & CO., Solicitors of Patents and Attorneys-at-Law, LeDroit Building, Washington, D. C. May 1

with your name finely printed, sent for 25 cents. Agents wanted. 6 samples sent for three cent stamp. Address

SCIENCE.

How to UTILISE THE STRAW .-Straw is valuable, and many of our respondent writes as follows about the most successful farmers would be lost flowers of a well-known plant : I have to cut and steam straw. One method is to feed it to young

animals whose stomachs will hardly comply with the demands of their growing bodies, even when fed on the most nutritious food. If straw is not very good for a working team, as it does not conduce to the production of muscle, how will it make young stock grow? to working horses without injury. Straw fed only once a day to a working horse is an entirely different thing from straw morning, noon, and night. And it is the same with fattening animals. small quantities, and with some advantage. With miles cows it is different, and they may be fed a considerable quantity of straw, and not affect the flow of milk. The most important thing, and something that is usually neglected, is to keep the appetite of the stock always good. This is easily accomplished by judiciously feeding straw and hay together. I think a greater quantity of hay and straw can be fed together than of either alone. It surfeit of straw, and indeed of anything else. I know that some farmers think hours to the time of the sun's setting, and | that they must feed out their straw as soon as possible, and it is a good thing to have the straw disposed of before warm weather in spring. On the other hand, the feeder should carefully avoid

the best results may be obtained by rake tooth going entirely through the feeding either with straw. There are foot, a rusty darning-needle through the some kinds of straw only fit for bedding, foot, a bad bite by a sucking pigas buckwheat or barley straw and there | several instances of file shanks through are some kinds that may be sold at a the hands, and numberless cases of profit—that is, it will bring more in rusty nails, awls, etc., but we never market than it can possibly be worth on knew a failure of this treatment.—Scithe farm. Rye straw is usually in good | entific American. demand at the paper mills, and it is always in demand in cities and villages But aside from all these uses to which straw may be diverted, there is an enormous quantity left that can only be fed out or wasted. Any use to which straw may be put, which will not produce the greatest possible results, is most certainly a waste. If a farmer owning twenty cows can cut and steam his feed, and so utilize his straw in the best possible manner, then we ought to see all farmers owning that number of cows own also a steamer. It would be better to draw the straw off the farm and sell it, provided a market could be found, than to put it to the use many farmers do-that is, let it rot down in the stack .- Country Gentleman.

THE DURABILITY OF SUBMARINE TELEGRAPH CABLE .- The expedition sent out to raise the submarine cable of 1866, like the one sent to raise that of 1865, failed to accomplish its mission. In the middle of last year, a new attempt was made, followed by more success, for two faults, one on the coast of Newfoundland and the other on the coast of Ireland, were then repaired: In consequence of this the Anglo-American Company and Telegraph Construction Company fitted out, at their joint expense, two vessels, which put to sea on the 25th of last May, for the purpose of finding and repairing States, Canada, and Europe, at reduced the cable of 1866. The expedition has rates. With our principal Office located just returned to London It reports having succeeded in grappling and raisto attend to all Patent Business with ing the cable to the surface of the water fifteen different times, but the outer wires were so weakened by oxidation case. The engineer in charge of the expedition therefore deemed the work of repair as entirely impracticable, and decided to return home. The unanimous opinion of electricians, says L'Electricite, is that the two first cables are defunct, and that ten years may be fixed as the average period that any cable will last which is not better protected against the corrosive action of the ocean. Fortunately the new cables are, as well known, better provided for in this respect. Sc. American.

> Spikenard root, sliced and bruised, and then steeped in a teapot containing equal parts of water and spirits, and the vapor inhaled, when sufficiently cooled, will relieve the soreness and hoarseness of the throat and lungs, when, arising from a cough or cold.

HEALTH HINTS.

REMEDY FOR CONSUMPTION .- A corwere it not for the quantity of straw discovered a remedy for consumption. they have to feed out during the winter It has cured a number of cases after months. And these farmers do not al- they have commenced bleeding at the ways use steamers and straw cutters. lungs and hectic flush was already on It may be true that the best way to feed | the cheek. After trying this remedy straw is to cut and steam it, yet few to my own satisfaction, I have thought farmers who are able, take the trouble | philanthropy required that I should let it be known to the world. It is common mullein steeped strongly and sweetened with coffee sugar, and drank freely. Young or old plants are good dried in the shade and kept in clean bags. The medicine must be continued from three to six months, according to the nature of the disease. It is very good for the blood vessels also. It strengthens and A small quantity of straw might be fed | builds up the system instead of taking away the strength. It makes good blood and takes inflammation away from the lungs. It is the wish of the writer that every periodical in the United States, Canada and Europe have known straw to be fed to these in | should publish this recipe for the benefit of the human family. Lay this by and keep it in the house ready for use .-Rural New Yorker.

A NEW CURE FOR WOUNDS .- As soon as a wound is inflicted, get a little stick-a knife or file-handle will doand commence to tap gently on the wound. Do not stop for the hurt, but continue until it bleeds freely and becomes perfectly numb. When this point is reached, you are safe-all that is necessary is to protect it from dirt. Do not stop short of bleeding and numbness, and do not on any account close the opening with plaster. Nothing more than a little simple cerate on a clean cloth is necessary. We have used and seen this used on all kinds of simple punctures for years, and never knew a single instance of a wound becoming inflamed or sore after this treat-If there are roots or grain to be fed, ment. Among other cases: A coal

> Cough syrup. - One ounce of thoroughwort one ounce flaxseed; simmer together in one quart of water until the strength is entirely extracted; strain carefully; and add one pint of best molasses and half pound loaf sugar; simmer them carefully together, and when cold bottle tight. A few doses of one teaspoonful at a time will alleviate the most distressing cough of the lungs subdues any tendency to consumption, breaks up entirely the whooping-cough, asthma, bronchitis, and all affliction of the lungs and throat. It is simple, safe and effective.

Nose BLEED .- If the use of cold water will not stop the bleeding, place powdered alum in the nose and leave it there until the wounded vein is healed.

VARIETIES.

There is a story current that a member of a fashionable congregation lately called at a music shop and enquired: " Have you the notes of a piece called the "Song of Solomon? Our pastor referred to it yesterday morning as an exquisite gem, and my wife would like to learn to play it."

At one of the schools in Cornwall, England, the inspector asked the children if they could quote any text of scripture which forbade a man having two wives. One of the children sagely quoted in reply the text, "No man can serve two masters."

A celebrated oculist offered to operate on a Parisian blind begger's eyes, "I'll guarantee to restore your sight." that it broke and was lost again in each | "What," exclaimed the beggar, "restore my sight and so ruin my business! A pretty notion!"

> "Why," said a lover to his mistress, New Ross-James Lantz. "are you like that hinge?" " Can't even guess." "Because you are something to a door" (adore). She cut his acquaintance immediately, which, we surmise considerably un-hinged him.

A trader in Boston being asked the character of one given to poetry, described him as " one of those men who have soarings after the indefinite, and divings after the unfathomable, but who never pay cash."

A nobleman who is in the habit of speaking to soldiers in an affable manner was much amused when a Guardsman said to him, in a hearty way, " I like you, my lord. There's nothing of the gentleman about you.

WOODILL'S GERMAN Baking Powder,

Manufactured by FRED. B. WOODILL,
