The Sydney Herald informs us that Petroleum Oil has recently been discovered at Hay River, Mabou, and is even said to be superior to the oil discovered at Lake Ainslie. At the latter place we are informed that an American company will immediately proceed to thoroughly test the oil-producing capabilities of the district. The sum of \$100,000 will be expended for that purpose, and from twenty to thirty steam engines will soon be on the ground. Should the wells prove productive in proportion to the expense of opening them, the benefit to the Island and even the whole Province would be incalculable.

The Chronicle says :- The Nictaux and Atlantic Railway Company have decided to proceed with the work on that railway. The representives of the company here proposed to deposit \$10,000 in the hands of responsible parties to secure payment of outstanding debts, and to proceed with the work on the Government's
