way in which this is accomplished is beautiful for its simplicity.

The organ has neither keyboard nor valves, but consists of a set of bellows worked by the pedals, a set of reeds, to which the bellows furnish the wind, and a simple arrangement of mechanism which carries the music paper over the reeds. This music paper is the most essential feature of the instrument, and constitutes the artistic part of the same. The notes are holes punched in the paper, the length of the holes corresponding with the length of the notes, and when holes of the proper length are punched at proper distances, the paper, while passing over the reeds, will shut the wind off from some of the reeds while it permits others to sound. The pedals perform the double duty of blowing the bellows and carrying the music paper over the reeds.

The sheets of music paper, which are very strong, are 18 inches wide, and from 40 to 100 feet in length. Music sheets of this kind do not cost much more than ordinary sheet music, the perforations being made rapidly by means of special machinery. During the performance the music paper is unrolled from one cylinder and rolled upon another. Sell at any or section

The recent Tea Meeting at Margaretville on the 4th inst. was a grand success. It realized \$403.98.

A melanholy occurrence took place on Thursday morning last. It appears that a young man named Thomas Lawrence Mr. Editor,-Please allow me to ac- employed in Egan's gun shop had been knowledge with thanks the receipt of skylarking with another young man, \$4.00 from Joseph H. Cook, Esq., of George Wells, a tinsmith, working next Milton. Q. C., for new meeting house, door. The two workshops opened into a common yard. Wells had been in the shop where Lawrence was working but had gone back and was dusting off some shelves when Lawrence came in TEA MERTING.—The ladies of the 1st | with a musket, and asked another work-Hammond Plains Baptist Church and man, Where is Wells? and being told congregation, intend holding a Tea Meet he put a cap on the gun and called out ing in the Baptist Meeting House on to Wells "Now, look out," and pulled the low price of 25 cents a bottle. Tuesday, Sept. 24th. The proceeds to the trigger. A loud report followed and Wells fell, having a bullet pass through his skull. Lawrence stood, struck with amazement at what had occurred, as he supposed the gun was empty, and he meant only to startle Wells with whom he was on the most intimate and friendly terms. Wells was a married man of about 24 years of age, Lawrence endowment of Acadia College, Caleb is single and about the same age. He was immediately taken to the Police Station to await the result of the Coroner's inquest. A jury was summoned on Saturday and commenced the investgation, but adjourned to meet again on Monday.

It appears that the gun by which the accident occurred was one of a lot purchased from the United States government after the war-what were used by the Confederate Army. They were being altered by Mr. Egan so as to make them lighter. Lawrence had been working on this one. He had heated the breech of it and sawed the back sight off, but must have neglected to have been September 19th.

DIPHTHERIA has for a long time been very prevalent and very fatal. Its fatality seems to be greatly owing to neglecting what is supposed to be an ordinary cold or sore throat until it has progressed to its last stages, and then when medical aid is procured it has often been found to be too late. From the fatality attending this disease every family should keep a suitable remedy on hand and use it on the first appearance of sore throat. A preparation called DIPHTHERINE has been placed before the public. It is the discovery of an English Physician and has been regarded where it is used to be an infallible remedy for that disease. To place it within the reach of all it is put up in bottles with full directions, and sold by Druggists and Dealers in medicines at
