## CHRISTIAN MESSENGER.

obtained for Inventors, in the United States, Canada, and Europe, at reduced rates. With our principal Office located

in Washington, directly opposite the United States Patent Office, we are able

to attend to all Patent Business with

greater promptness and despatch and less cost, than other patent attorneys, who are at a distance from Washington, and

who have, therefore, to employ "associate attorneys." We make preliminary exami-nations and furnish opinions as to paten-tability, free of charge, and all who are

dust.

BONE MEAL FOR POULTRY .- Poultry fanciers generally, and farmers in particular, do not seem to p ace the stress on feeding bone meal or. crushed or cracked bone to their poultry that they should. This may be due to the fact that the merit of bone, in different forms, is not known or appreciated.

TO PREVENT SPROUTING .- The Prairie Farmer says to kill trees so that they will not sprout, cut the tree down, bore a long auger hole into the stump, and fill it with coal oil, or spirits of ammonia.

A PROFITABLE FERTILIZER.-An English correspondent reports profita: le experience with soot aud lime, and gives in The Garden this in favor of horse-hoof parings an bones :- "Hoise-hoof parings make a most excellent manure for potting pines, vines, pelargoniums, etc., and one can easily make arrangements with the nearest blacksmith to save them. Bones are most valuable in a garden; they decompose but slowly, keep the ground open, in Japan is caused by faults occaand are invaluable in vine border making. The champion bunch of grapes shown at Edinburgh some years ago, weighing over 26 pounds, did the clever gardener who grew it great credit; but it should also the trees. be known that there were heap: of bones in the border. Some geese bones were put into the bottom of two vases on the terrace wall, two to be in connection with the earth. good plants of Tom Thumb pelarat the end of September they measured seventeen feet six inches in circumference. So much for bones and

SOAP SUDS IN THE ORCHARD.-My wife read the account given by some one about pouring wash water and is a fair prospect of the Suez Canal soap suds around cherry trees, so she commenced in the spring, and ships may pass through it at night, every wash day she poured the wash instead of coming to anchor as at water around a half dozen young present. There is some prospect cherry trees that we have growing also of the lighting of the Suez Dock in our yard, also throwing slops by electricity for the Peninsular and around them, and the result has been | Oriental Company. the most vigorous growth and luxurious foliage that I have ever seen.

plenty of water.

quired in herding, when outside pasturage is accessible and preferred. And finally, a handsome income on the investment can be had without the sale of animals themselves.

and fencing, and less labor is re-

A skeptical heaver once said to a Baptist minister : "How do you reconcile the teachings of the Bible with the latest conclusions of science :" " I haven't seen this morning's papers," naively replied the

minister ; " what are the latest conclusions of modern science ?"

A 50-acre pasture in West Worthington, Mass., contains a large le ge of emery, an inexhaustible a pea.

quarry of slate, a rich vein of iron ore, and enormous boulders of fine quartz, or more mineralogical wealth that any other tract of equal size in the State.

A boat to be propelled by electric motive power is the latest novelty Parisian inventors are working at.

A CURIOUS CAUSE OF FAULTS IN TELEGRAPHIC LINES .- One of the greatest obstacles to telegraphers sioned by spiders.

The trees along the lines are filled with these insects which spin their webs between the earth, the wires, the posts, the insulators and

When these webs become wet with dew they constitute a good conductor, and the lines are found The only method of obviating goniums were planted in them, and this inconvenience is by employing brooms of bamboo to brush away the webs. But as the spiders are more active than the workmen employed in this work, the difficulty is not the less serious.

Never buy a chicken with yellow legs, if you want a tender one.

Suet paste is exceedingly wholesome, if it is well boiled.

In mincing suet, use a little flour to prevent the softer portions from adhering together.

Herring contains as much nourishment as salmon.

As herrings contain a great deal of carbon, or heat producing power, they should be freely used in winter.

When using hard water to boil your green vegetables, add a piece of washing soda (not baking soda) half the size of

In baking fish, brush them over with an egg. It forms a nice coating and prevents the juice from exuding while baking.

Always boil vegetables with the cover off. When closed up, the fine color is destroyed.

After vegetables are cooked, do not let them remain in the boiling water ; but drain thoroughly and keep hot by setting the covered dish on top of a saucepan of boiling water.

If an artery is cut, compress above the wound; it a vine is cut compress below.

During the Franco-Prussian war, the question of vaccination and re-vaccination was thoroughly tested. In the German army, re-vaccintaion was practiced. There was not a single death from small-pox. In the French army it was not practised, and two hundred deaths ensued.

VARIETIES.

When Tom returned from a funeral his mother asked what the minister's

remedy for Influenza, with Cough, Cold, &c., I have much pleasure in testifying to its beneficial results as compared with any remedy ever previously used. Unlike most Cough remedies, it neither nauseates nor weakens, but pleasantly invigorates the general health.
