Some time ago I sent you a letter testifying to the value of your wonderful K D C to my wife. She is still enjoying good health, with no signs of her old trouble. Try it sufferers K D C Pills are splendid for the liver and bowels.

LITERARY NOTES.

'The Influence of the Western World on China' is the title of a timely article in the September Century. One can learn much about the Boxers from 'The Revolution in China and Its Causes.' Professor Sterrett's account, with photographic illustrations, of his visits to the cave-dwellers of Turkey in Asia, some of whose habitations date back nearly four thousand years, is interesting. Mr. Morley brings us to the period of the military dictatorship in his life of Cromwell, and Sir Walter Besant's illustrated paper on East London is taken up with 'The Thames from Wapping to Blackwall.' 'In Lighter Vein' contains some amusing English signs from shops in Japan, contributed by the President of the Society of Christian Endeavor.

If one should ask for a clear and concise statement of what 16 to 1 means, and its probable effect, if enacted into a statute, upon the trade welfare of the United States, one need only turn to Mr. George E. Roberts' article in the September Forum on the 'Kansas City Financial Resolution.' Mr. Roberts is the Director of the United States Mint and may be expected to know whereof he speaks. He shows that the proposition that America should have a fractional system of her own manufacture and for her own sole use is folly. He shows that the gold standard is so, as has been claimed by the silver men, an appreciating one, but that the supply of gold possesses a regularity and a reliability which it did not have in times past, and that the emergency which called for silver coinage in times past does not now exist.
