Royal Baking Powder

Imparts Healthfulness the Food

Royal Baking Powder possesses peculiar qualities not found in other leavening agents, which arise from the superior fitness, purity and healthfulness of its ingredients.

Royal Baking Powder leavens the food perfectly by its own inherent power without changing or impairing any of the elements of the flour.

Thus the hot-breads, hot-rolls and muffins, and the delicious hot griddle-cakes raised by the Royal Baking Powder are wholesome and digestible, and may be eaten without distress, even by persons of delicate digestion.

> Alum baking powders are low priced, as alum costs but wo cents a pound; but alum is a corrosive poison and it renders the baking powder dangerous to use in food.

The Eastport, Me., sardine factories are commencing work. Herring are coming in and packes and employes are busy.

Thursday, William Smith of Calais C .. 41 East 25th Street, New York. swam from this city to Campobello, a distance of more than two miles. The waters of the bay are very cold, and this feat has long been considered impossible by expert swimmers.

After a long period of imprisonment, / which he endured more like a ferecous beast than a human beirg, Ger imo, one of the most bloodthirs y Indians that ever figured in history, has some stark mad.
