SIR JAMES WATSON SAYS

Catarrh is the commonest of all disorders, and not one person in ten thousand passes the winter without having a Catarrhal attack of some sort. It is dangerous owing to its tendency to develop consumption. Can be cured and completely eradicated from the system, if proper methods are employed. Being generally established in remote parts of the nasal passages, bronchial tubes and lungs, to cure it, a remedy must be employed that can be carried direct to these parts.

Catarrhazone goes wherever the air breathed will go, and is sure to reach the trouble. It is inhaled into every air cell of the lungs, the throat nasal passages and bronchial tubes. It kills the germs, heals the membranes and cures the disease. Doctors recommend it as the most successful remedy. Catarrhazone never fails; never harms always cures permanently. Price \$1.00; small size 25 cents. Druggists or N. C. Polson & Co., Kingston, Ont.

OTHER PROVINCES.

LITERARY NOTES

Henry van Dyke is never so happy as when depicting the life of the wilds of Canada. He has chosen this picturesque background for a delightful new story "A Year of Nobility," to appear in McClure's Magazine for August in which he lays bare the heart of a French Canadian guide, who has an experience with "a smooth prospector of unclaimed estates to France."

'Cuba's Industrial Possibilities' are set forth in an illustrated article contributed to the Review of Reviews for August by Mr. Albert G. Robinson, a newspaper correspondent who has passed much time in Cuba and has familiarized himself with the agricultural and mineral resources of the island.

The Living Age for August 3, is rich in good reading. It opens with part first of an article on the American spirit by Brunetiere, of the Revue des Deux Monde. It is an article that ought to be read in Canada. Its aim is to glorify the French "race and religion." The poetical selections are exceptionally good. The Readings from new books, in the appendix include Bismarck's Love Letters.—The Living Age is published every Saturday by the Living Age Co. Boston. Price \$6 00 a year.

In the August Canadian Magazine there is a paper on the Birthplace of Napoleon, and the relics and mementoes of him stored in Ajaccio, Corsica. A history of "G. J. in Canada," shows that the game was played in Montreal as early as 1824. There are short stories in addition to the two serials. There are some criticisms of our militia camps, and some observations on the progress of the Maritime Provinces.

The August Forum opens with an article "The Failure of the Two Party System." It points out the advantages of the system of groups, which is characteristic of German politics. "The Uses of Speculation" clears up some of the popular misapprehensions of the operations of the Stock Exchange.

CUBA'S AGRICULTURAL RESOURCES.

The island of Cuba is a gigantic farm of 28,000,000 acres of marvelously fertile soil. Thirteen million acres remain as virgin forest. Her present population is a little above one and a half millions.

There is little doubt that Cuba, along the line of her particular agricultural advantages, can provide a comfortable and reasonably profitable living for a population of 10,000,000 of moderately industrious citizens.—From "Cuba's Industrial Possibilities," by Albert G. Robinson, in the Review of Reviews for August.

MISJUDGED.

One does not care if he be misjudged by one who is notoriously uncharitable, or lied about by one destitute of veracity or character. But to be misjudged by brethren, and to be slandered by professed disciples—these are the bitterest of all things in Christian experience.—The Interior.
