

**NINE THINGS TO REMEMBER.**

1. Remember that everything that is alive can feel. Sometimes there are too many insects and they have to be killed. When they must die, kill them as quickly and mercifully as you can.
2. Remember that cruelty grows like other sins, if not checked.
3. Remember that to take pleasure in seeing animals hurt or killed

**CUTICURA OINTMENT**

Purest of Emollients and Greatest of Skin Cures.

The Most Wonderful Curative of All Time

For Torturing, Disfiguring Skin Humours

And Purest and Sweetest of Toilet Emollients.

Cuticura Ointment is beyond question the most successful curative for torturing, disfiguring humours of the skin and scalp, including loss of hair, ever compounded, in proof of which a single anointing preceded by a hot bath with Cuticura Soap, and followed in the severer cases, by a dose of Cuticura Resolvent, is often sufficient to afford immediate relief in the most distressing forms of itching, burning and scaly humours, permit rest and sleep, and point to a speedy cure when all other remedies fail. It is especially so in the treatment of infants and children, cleansing, soothing and healing the most distressing of infantile humours, and preserving, purifying and beautifying the skin, scald and hair.

Cuticura Ointment possesses, at the same time, the charm of satisfying the simple wants of the toilet, in caring for the skin, scalp, hair, hands and feet, from infancy to age, far more effectually, agreeably and economically than the most expensive of toilet emollients. Its "Instant relief for skin-tortured babies," or "Sanative, antiseptic cleansing," or "One-night treatment of the hands or feet," or "Single treatment of the hair," or "Use after athletics," cycling, golf, tennis, riding, sparring, or any sport, each in connection with the use of Cuticura Soap, is sufficient evidence of this.

Cuticura Resolvent, liquid and in the form of Chocolate Coated Pills, Cuticura Ointment and Cuticura Soap are sold throughout the world. Depots: London, 27 Charterhouse Sq.; Paris, 5 Rue de la Paix; Australia, R. Towns & Co., Sydney; Boston, 137 Columbus Ave. Foster Drug & Chemical Corp., Sole Proprietors.  
Send for "The Cuticura Skin Book."

shows something terribly wrong in our nature.

4. Remember your pets—if you keep any—and see that they do not starve while you live in plenty.

5. Remember that cats and dogs want fresh water always where they can get at it.

6. Boys who drive donkeys or horses should remember that they must go slowly when they have loads to drag, and that the poor animals are made of flesh and should not be hurt. Angry words frighten and wear them out. Use the whip as little as possible, and encourage them with kind words.

7. When you feel inclined to throw stones at living creatures, stop and think: "How should I like to be bruised, and to get my bones broken 'just for fun?' The boy who hurts or teases small, weak animals, robs nests, or gives pain to gentle creatures is a coward.

8. Remember that the girl who wears feathers in her hat, taken from a bird killed on purpose, is doing a cruel thing.

9. Remember that every kind deed we do, and every kind word we say, make us better than we were before.—*Youth's Companion.*

**QUEER THINGS ABOUT FROGS.**

The frog's skin is so important as a breathing apparatus that the creature would die at once of suffocation if the pores were closed by a coat of sticky varnish, by dust, or in any other way. While we are speaking of his breathing, you will notice that his sides do not heave as ours do at each breath we take. A frog has no ribs, and cannot inhale and exhale as we do, but is obliged to swallow, his air in gulps, and if you will watch the little fellow's throat you will see it continually moving in and out as one gulp follows another. In order to swallow, his mouth must be closed; just try to swallow with your mouth wide open, and you will see what I mean. A frog, then, always breathes through his nose, and if you held his mouth wide open he would suffocate as surely as though you gave his skin a coat of varnish. Mr. Frog has an enormous mouth for his size, and if we were to put a finger inside of it we would find that he has a row of teeth in the upper jaw, and that his soft white tongue, unlike our own, is attached in front and is free behind. When he wishes to catch any insect he throws out the free end of the tongue, then draws it in so rapidly that it is difficult to see whether he has been successful or not. As the tongue is coated with a gummy fluid, the insect sticks to it and is carried back into the mouth, which closes upon it like the door of a tomb. Frogs, however, are not limited to one mode of feeding; they often leap open-mouthed upon larger prey, which includes, besides insects, small fish, mice, small ducklings, polliwogs, and tiny frogs.—*Woman's Home Companion.*

Severe colds are easily cured by the use of Bickle's Anti-Consumptive Syrup, a medicine of extraordinary penetrating and healing properties. It is acknowledged by those who have used it as being the best medicine sold for coughs, colds, inflammation of the lungs, and all affections of the throat and chest. Its agreeableness to the taste makes it a favorite with ladies and children.

**SIN FINDING OUT.**

Man is often baffled in tracing human crimes, but God has an automatic apparatus that always finds its way to the guilty. It is said that a French gentleman having been frequently robbed by his own servants, at length by the advice of a detective, placed a lot of gold coins as a bait in their way, and covered them with a chemical substance which would afterwards leave a stain upon the hands of the thief. Soon afterwards he called the household together with the detective, and after all had denied, the officer insisted that they should show their hands. Sure enough the guilty tint had already begun to appear upon the fingers of one of the pages; and seeing with horror the telltale traces of his crimes—which even he had not noticed before—he confessed the whole series and begged for mercy.

**CHOLERA INFANTUM.**

Cholera infantum is one of the most dreaded diseases of infancy. It is prevalent during the heat of summer in spite of all the care mothers may take to guard against it, and it sometimes progresses so quickly that death occurs in a few hours no matter what care is given the child. The first thing to do is to stop feeding the child and give him plenty of fresh air and pure water to drink. Give Baby's Own Tablets to carry off the poison in the system. Do not under any circumstances give a medicine to check the diarrhoea, except under the advice of a doctor. By using Baby's Own Tablets the cause of the diarrhoea will be removed, and the disease will thus be checked in a natural manner. Proof that the Tablets cure this too often fatal trouble is given by Mrs. Herbert Burnham, Smith's Falls, Ont., who says: "When my eldest child was six weeks old he had an attack of cholera infantum and was at death's door. My doctor advised me to try Baby's Own Tablets and in twenty-four hours baby was better; the vomiting and purging ceased and he regained strength rapidly."

Keep the Tablets in the house—prompt use may save your little one's life. Sold by medicine dealers or sent postpaid at 25 cents a box by writing to Dr. Williams' Medicine Co., Brockville, Ont.

**A GOOD THING TO WRITE.**

"What shall I write on my slate?" said Harry to himself. He could not write very well, but he sat and wrote, "A Good Boy." Then he took it and showed it to his mother.

"That is a good thing to write," she said. "I hope you will write it on your life as well as on your slate."

"How can I write it on my life, mother?" said Harry.

"By being a good boy every day and hour of your life. Then you will write it on your face, too, for the face of a good boy always tells its own sweet story. It looks bright and happy."—*Olive Plant's.*

Five minutes spent in the companionship of Christ every morning—ay, two minutes, if it is face to face and heart to heart—will change the whole day and make every thought and feeling different.—*Durmond.*

**IF YOU CATCH COLD.**

Many things may happen when you catch cold, but the thing that usually happens first is a cough. An inflammation starts up in the bronchial tubes or in the throat and the discharge of mucus from the head constantly poisons this. Then the very contraction of the throat muscles in the act of coughing help to irritate so that the more you cough the more you have to cough. It is, of course, beyond question that in many cases the irritation started in this way results in lung troubles that are called by serious names. It is in this irritated bronchial tube that the germ of consumption finds lodgement and breeds.

Great numbers of people disregard cough at first and pay the penalty of neglect. Cough never did any one any good. It should be dispensed, with promptly. Adamson's Botanic Cough Balsam is a well known remedy, and it is the surest cough cure known to-day. It does not deceive by drugging the throat. It soothes the irritated parts and heals them, then the cough stops of its own accord. The action of this medicine is so simple that it seems like nature's own provision for curing a cough. Every druggist has it. 25 cents. Be sure and get the genuine, which has "F. W. Kinsman & Co." blown in the bottle.
