# More Cheerful View Of Trade Taken In April

Women's Apparel and Men's Clothing Taking Lead.

Reports on business conditions for the first half of April in Canada are making more pleasant comparisons with those of a year ago than was the case in March. Retailers have taken a more cheerful view of the possible proportions of spring trade, following the stronger demand which developed during the week, as the result of somewhat warmer and clearer weather. The increase has been particularly encouraging in women's apparel, with men's clothing following a close second. There was a better movement of shoes during the week, while groceries went into consumption on a fairly liberal scale. Although merchandise distribution in many country districts during March failed to equal the 1934 showing, because of cold and stromy weather, there has been a more rapid movement thus far in the current month. Volume, however, continues above last year's in most branches. Plans have been completed to reopen mine workings long dormant, due to the sharp advance in the price of silver. The farm outlook is becoming more encouraging, and the opinion of well-informed agriculturists is that general food prices will move upward before fall, according to despatches to Dun and Bradstreet, Inc., from ume of Canada's construction inbranch offices located in the chief dustry climbed steadily upward commercial and industrial centres during the first quarter of this of the Dominion.

While a number of influences have loomed on the Canadian business horizon in recent weeks that might be expected to exert a deterrent effect on the growth of confidence, it is notable that a more cheerful sentiment has been developing in the United States. The fact is worth observing because any betterment in activity in the United States is bound to exert a favorable effect on the trend in Canada. If it is sufficiently important it may even more than offset such unsettling elements as the uncertain Federal political outlook, the prospect of an unknown degree of state regulation of private business, various further increases in corporation taxation, both Federal and Provincial, and the damage to the bond market resulting from the repudiation of Hydro contracts by the Ontario Government and the activities of Mayor. McGeer. It may also be noted that the prominence given to these things has served to obscure somewhat the quite considerable but less spectacular improvement that has been taking place in the position of the farmer and his ability to exchange his produce for larger quantities of the output of industry. Another cheering development has been the recent strength in metal prices.

It is rather curious that just at the time when Canadian business is beginning to be concerned over the prospects of Government action interfering with natural recovery forces, the United States is beginning to show some signs of shaking off this very hampering influence which has been its bugbear since the Roosevelt administration began launching its series of economic experiments. There is still plenty to worry about in the Washington picture but many observers are taking heart at the growing force of opposition to drastic stimulants of an artificial nature and the activities of radical economic reformers. Actual business statistics are showing resistance to the slight recessionary trend that set in early in the year and the private capital markets have at last shown a revival of activity, although so far it has been confined to refunding operations and there has been no significant increase in new capital investment.

ship Beth issued a challenge which was accepted, and they met in a ten round bout in old Queen Square rink. This was conceded to have been one of the best bouts staged in Saint John for some time and was declared a draw. About a year later McLeod won the championship by defeating Littlejohn in the second round of a scheduled ten round bout.

Beth then went to sea with his father, the late Captain McLeod, and did not return home for over a year. The lure of the ring, however, was still there and he was matched with Jack Watts, of The Connolly-Harrigan Bout London, Eng. He was in great condition after his sea voyage and disposed of his opponent in the heading for the barn and he first round. That same week he boxed Littlejohn in Sydney and home they could hear the roars of the oncoming racers, but they beston. This bout was staged in the old Victoria rink and Sullivan, Joe Gans, was awarded the decision. A short time later Beth went to South Carolina and on Eddie Connolly's first big fight. his arrival in Georgetown was two-fisted fighters in the game. laria fever which practically put an end to his boxing career.
