

## Liberal Promises Of 1916 Still Are Mere Promises

Platform Of 1917 Election Discarded When Party Went Into Power.

The Liberal party in New Brunswick is making many promises. Back in January, 1916, when they were preparing for an election, they adopted a platform and ran their campaign on it and went into power, but so far many of their promises made at that time have not been carried out.

Here are three planks from their platform of 1916, which were never implemented:

1. To reorganize the Crown Lands Department so that its administration shall be entirely severed from politics and administered on sound business principles, under systematic plans by a non-partisan commission specially appointed for that purpose, responsible to the Legislature and working in co-operation with the Dominion Commission of Conservation.

2. To take the highways out of politics, giving the expenditure of the money collected from the people and the control of labor, together with the Government appropriation, into the hands of supervisors, chosen by the people of each parish, to whom a detailed and audited account must be rendered every year at an annual meeting and duplicates thereof forwarded to the Department of Public Works, the work of the supervisors to be under the inspection of a competent provincial engineer. We also pledge ourselves to set aside the money collected from licenses upon automobiles and other motor vehicles, together with an equal appropriation from the revenues of the province each year, to pay the interest upon the bonds to provide for permanent roads, which shall be constructed as rapidly as possible.

These are just two of the promises that were never carried out. The Liberal party in New Brunswick is still making promises, which cannot be carried out but they hope to slide into power on that sort of canvass.

The people of New Brunswick want something that has been stable and that is the Tilley Government. Hold fast to that which is good.

### CHRISTIAN SCIENCE SERVICE

At First Church of Christ, Scientist, Saint John, N.B., corner of Germain and Queen Streets, the subject of the lesson-sermon next Sunday is: "Christian Science." Golden Text: Revelation 12: 10: "Now is come salvation, and strength, and the Kingdom of our God, and the power of His Christ."

Among the citations are the following: Acts 8: 5, 6: "And the people with one accord give heed unto those things which Phillip spake, hearing and seeing the miracles which he did. For unclean spirits, crying with loud voice, came out of many that were possessed with them: and many taken with palsies and that were lame, were healed." And from Science and Health with Key to the Scriptures by Mary Baker Eddy, 149: 31: "Today there is hardly a city, village, or hamlet in which are not to be found living witnesses and monuments to the virtue and power of Truth, as applied through this Christian system of healing disease."

"If we could have a little patience, we should escape much mortification: time takes away as much as it gives."—Madame de LeVigne.

## Naval Delegate

Here we see HERR VON RIBBENTROP, leader of the German naval delegation to London, leaving the British Foreign Office after one of the sessions of the first Anglo-German naval talks since the war.

## Nova Scotia Apple Crop Figures Have Been Given Out

2,241,713 Barrels Produced in Province Last Year.

Kentville.—Nova Scotia's total apple crop, tree run, last year was 2,241,713 barrels, of which 1,333,378 barrels were exported to overseas markets, and 314,634 barrels were shipped to Upper Canadian points via Truro and Digby, according to the official report of S. B. Marshall, Middleton, District Fruit Inspector for Nova Scotia, just released by the Fruit Branch of the Dominion Department of Agriculture. In addition to the above distribution, 21,150 barrels were sold in Saint John, and 20,544 barrels in Halifax. Home consumption is estimated at 100,000 barrels, making the total commercial yield of graded apples, 1,789,706 barrels.

By-product plants handled 437,012 barrels and cider mills 15,000 barrels. The grand total being 2,241,713 barrels. This makes the 1934 crop the second largest in Nova Scotia's history; the greatest being the previous year when the tree run yield reached 2,865,000 barrels. The only other year when these figures were approached was in 1929, when the yeald was 2,136,000 barrels.

In the overseas markets, Liverpool proved to be Nova Scotia's biggest customer. Approximately 400,000 barrels going to that port. London was second highest with 300,000 barrels, and Newcastle third with 130,000.

### THIS BEATS RADIUM

Radio-sodium, a new substance, produced by Professor E. O. Lawrence, of California, is said to have twice the strength of radium. Doctors both in Europe and America regard it with intense interest. For, although still in the experimental stage, there is real hope that it will soon be used as a substitute for radium in

# Vacation-Time Sale

## DRESSES of Distinction

Nothing will give you so much real Summer-time smartness for so little money as this glorious variety of styles.

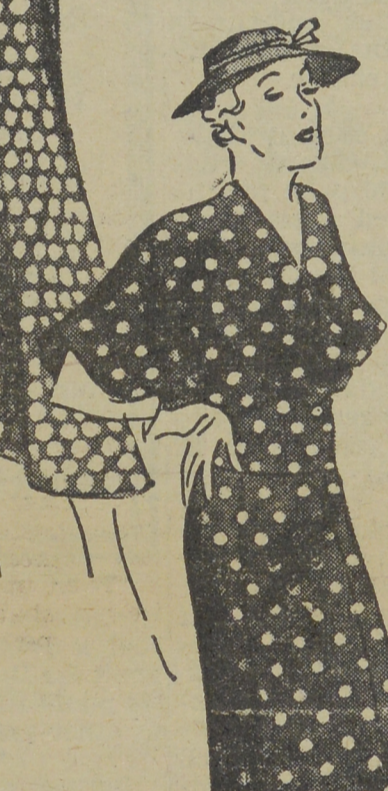

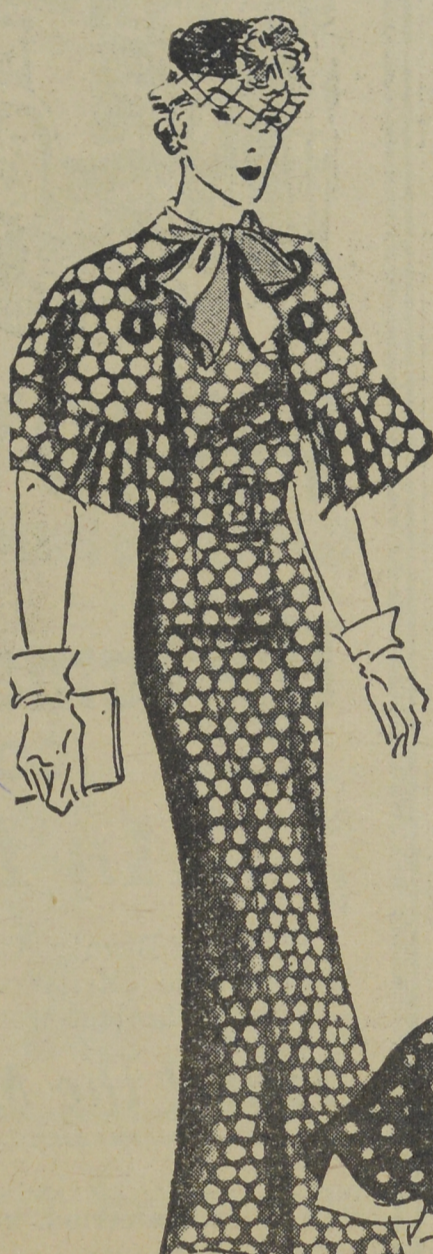

**\$1.95 to \$3.50**

Tub Prints, Seersuckers, Dotted Voiles, Fancy Swiss Muslins.

**\$5.55 to \$15.75**

Wash Crepes (Pastel shades), Printed Silk Chiffons, Printed Silks (some with jackets), Sportex Crepes (made exclusively for Scovil Bros.) Sizes—14 to 44.

WOMEN'S SHOP—THIRD FLOOR

WOMEN'S HAIR-DRESSING PARLOR  
THIRD FLOOR  
Phone 3-3281

## Men's Bathing Suits and Trunks

An outstanding buy in all-wool Bathing Suits and Trunks. Snug fitting, well made. Black, Navy, Maroon.

SPECIAL

**\$1.49**

FURNISHINGS DEPT.—STREET FLOOR

Hundreds of extra special values, to complete your vacation needs, on sale throughout the entire store.

**SCOVIL BROS. LTD**  
OAK HALL = King St

## SWEATERS

Men's all-wool, V-neck style Coat Sweaters, in a variety of Heather shades. Ideal for the camp and knock about wear. Regular \$2.25 value.

**\$1.59**

## COMBINATIONS

Men's Balbriggan Combination. Short sleeves and ankle length leg, natural color.

Special **89¢**

our hospitals. It "decays" rapidly, losing half its potency in 12 hours. This would allow it to be administered either in capsule form or as an injection, whereas radium, if left in the body, might easily cause fatal results. Consequently, radio-sodium ought to prove the more effective healer. It is made by bombarding ordinary sodium with heavy hydrogen, the latter being a product of "heavy" water, the discovery of which last year was hailed as an outstanding scientific achievement.

**GRADE A STUDENTS GAIN**  
Boulder, Colo.—Forty students of the University of Colorado made a straight "A" average during the winter quarter as compared with 36 for the fall quarter, according to figures released by the university.
