

CANADA'S IMPOSING WAR MEMORIAL AT VIMY TO BE UNVEILED

Some time in July the Prime Minister, W. L. MACKENZIE KING, and several Canadian officials, will journey to France to attend the unveiling of the gigantic war memorial at Vimy, erected in honor of the Canadians who lost their lives in France during the Great War. The memorial, shown above, was designed by Walter S. Allward, famous sculptor, and it dominates the countryside for many miles around. Inset is picture of the Prime Minister, while at the right is a scene from the Great War. Many Great War veterans are also planning on attending the function.

ASK YOUR DOCTOR FIRST, MOTHER

Before You Give Your Child an Unknown Remedy to Take

Every day, unthinkingly, mothers take the advice of unqualified persons — instead of their doctors' — on remedies for their children.

If they knew what the scientists know, they would never take this chance.

Doctors Say PHILLIPS' For Your Child

When it comes to the frequently-used "milk of magnesia," doctors, for over 50 years, have said "PHILLIPS' Milk of Magnesia — the safe remedy for your child."

Remember this — And Always Say "Phillips' Milk of Magnesia" When You Buy. Your child deserves it; for your own peace of mind, see that you get it — Genuine Phillips' Milk of Magnesia.

Also in Tablet Form:

Phillips' Milk of Magnesia Tablets are now on sale at all drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of Genuine Phillips' Milk of Magnesia.

PHILLIPS' Milk of Magnesia

MADE IN CANADA

Radio Body Spent \$1,394,923 During The Fiscal Year Wonders of Niagara Falls Greatly Multiplied By Ice

The expenditures of the Canadian Radio Commission totalled 1,394,923 during the fiscal year ending March 31, 1935, according to the report made to the House of Commons. The expenses included: Salaries, \$155,828; administration, \$70,790; operation of stations, \$62,931; new construction, \$74,688; technical apparatus, \$19,276; station network, \$245,699; for lease of lines, and \$322,942 for wire lines, and \$432,766 for programs.

It will be noted that for every dollar spent on program material it cost nearly \$3.00 to carry it. While \$432,766 was spent to provide programs it cost \$155,828 for salaries of officials and an additional \$70,790 for administration. This seems to be a top-heavy arrangement.

Thousands of Visitors View Odd, Ever Changing Formations—Old-Timers Recall the Past—In 1848 Frozen Dam Makes Falls Dry For Day.

King Winter established his throne at Niagara long weeks ago and has ruled with a tight, frozen grasp ever since.

The changes he has accomplished, and the weird, remarkable spectacle have commanded the attention and admiration of hundreds of thousands of visitors who have come from distant parts of the United States and Canada to view the ice formations about the great falls and in the gorge far down to Lake Ontario.

So fascinating has the spectacle been that old residents have enjoyed making comparisons be-

tween past and present. They point, for instance, to the strange fact that despite the cold weather the ice mounds at the base of the American Falls are not of great size. Especially is this true of that beneath Prospect Point, which some seasons grows into a huge mountain. The explanation lies in the fact that, as the American Falls have not been carrying their usual flow of water, there has not been the whirling spray cloud to swing about and build the mountain of whiteness, whose ambition some years

Attacks Premier

SIR AUSTEN CHAMBERLAIN, famous British statesman, who attacked Premier Baldwin during a debate in the House of Commons. He stated Mr. Baldwin should not be made head of the Committee for Imperial Defense, and drew attention to the Prime Minister's errors.

HUGE CONTRACT IS PLACED FOR SUPER-WAR 'PLANES

London.—The air ministry have placed a very large order with Vickers Aviation, Ltd., for a new type of super-warplane for the Royal Air Force, built on a secret principle so revolutionary that its full significance is not yet clear even to experts.

The machine, it is declared, could be riddled with bullets without collapsing. It is constructed of wafer-thin spars and tubes which can be stamped out by the presses of any big motor-car factory and easily assembled.

The form of construction is known as the Wallis Geodetic, after its inventor, Barnes Neville Wallis, designer of structures to Vickers, who has devoted five years of research in the higher mathematics to its perfection.

Foreign air powers, it is stated, would give a fortune for its secret.

**Seized by a BLACK MAGIC demon in the African jungle!**

TERRIFYING encounter with leader of baboon devil worshippers is revealed by LADY DOROTHY MILLS, the well-known British adventuress.

For many years, Lady Dorothy Mills, the Earl of Oxford's daughter, has visited remote corners of the earth where, oft-times, no white woman had ever been.

On one trip to Africa's jungle she had a horrible experience which she describes in detail in her startling article in THE AMERICAN WEEKLY NEXT SUNDAY . . . Don't miss it!

CANADIAN BLIZZARD GOES SOUTH

Snowbound Minnesota home

It is quite easy to imagine the surprised look which must have appeared on the face of the gentleman in the above picture when he first opened his front door after a recent blizzard. Half-an-hour's strenuous digging enabled him to make a new entrance, and although the snow was not labeled "Made in Canada" he is positive it was. This house is near Duluth, Minn.
