

What ne'er Grows Old.
"Time—'s our earthly Laureate."
We have more than a dream of glory
Of the green of early days.

Old friends again come round us,
And kind, still the "tried and true,"
Who in grief to their hearts have bound us,
And fondling friendship new.

For brighter grows the glory,
When shadows flee away—
Through the cloud of "olden story"
Gleams the sun of "olden day."

There's a hope that brighter growth,
The stronger for earthly ill,
And a faith which a harvest soeth,
No wintry breath can chill.

Scenes of the War in Asiatic Turkey.
(From Journal of a Deputation to the East.)

The most Northern province of Asiatic Turkey includes the greater part of the ancient kingdom of Armenia, the Minni of the scriptures; its boundaries are the Caucasus on the north, the Kurd mountains to the south, the Bahrates on the west, which separates it from Asia Minor, and the Caspian Sea on the east; most of the country constitutes a high table-land, traversed by several chains of mountains, which unite with the Taurus and Caucasus. Ararat, the loftiest of all the ridges, rises in the centre. This famous mountain derives its name from the valley of Aras, the ancient Araxes, the district of country where it stands, about the junction of the Russian, Persian, and Turkish Empires, and to the north of Lake Van; it has two peaks, Alak Dagh and Agri Dagh, one of which is 17,910 feet above the sea; they are very bold cones, always covered with snow; the ascent was accomplished for the first time by Dr. Parrot, in 1820. A terrific earthquake shook the mountain in 1840, destroying considerable property and fifty lives. Local tradition assigns the resting of the Ark to Mount Joddy, 170 miles south-west, immediately above the plain of Mesopotamia. These chains of mountains are the highest of Central Asia, and slope down gradually to the south by a succession of table-lands to the plains of Mesopotamia and Persia; they supply the sources of several great rivers, including the Kur, the Aras, and the upper branches of the Euphrates. Tigris derives its sources chiefly from one of the lower ridges, and from the mountains of Kurd. There is much variety in the land and climate; in the high table-lands the soil is poor, but produces good pasturage, and the climate is very cold; while many of the valleys and plains are extremely fertile, and produce excellent cotton, rice, tobacco, grapes, and other fruits, as the climate is hot. The population is estimated at between 1,500,000 and 2,000,000, about one-seventh of whom are Armenians. Erzeroum, or Erzurum is now the capital of Armenia. It stands in a plain on the Karas or west branch of the Euphrates, and above 6000 feet above the sea; its population is estimated at 100,000, and the city is prosperous, carrying on an extensive trade with the surrounding countries; the climate is very cold, snow sometimes falling in August. The Armenians have, for some time, had a mission there. Erzeroum was the ancient Theodosiopolis. Trebizond, on the Black Sea, is the chief harbour of the province, and contains 50,000 inhabitants. Further north are large fortified towns named Khars, or Kars, adjacent to the frontiers of Russia and Persia. Bayazid, not far from the range of Ararat, is a fortified city, with a population of about 20,000, including the most warlike and learned of the Armenians (who possess a fine monastery)—and also a good many Kurds. The Armenians have succeeded in forming small Protestant congregations, and opening schools in several places in this district, such as Trebizond, Tehevirneh, Khanos, Arabkie. The Fishales of Kaisairiah, Sivas, and Marsh, formerly constituted Armenian Minor.

APPROPRIATION.
The following extract from a letter dated St. Petersburg, published in Le Nord, shows how Lord Raglan was appreciated by the Russians:
"Lord Raglan," says the letter, "has died. During the entire period of the command of this noble General, he succeeded in conciliating the esteem and respect, not only of those with whom his nation was allied, but also of the enemy to whom he was opposed. He was one of the last of the heroes of that glorious English army which, under the command of the Duke of Wellington, illustrated the English name on so many battle-fields, and of which the few remaining veterans bore on their breasts, till lately, the honourable tokens.

Lord Raglan was, on several occasions, distinguished by the late Emperor Nicholas, as also by the reigning Emperor. He will be personally regretted in Russia by all who had an opportunity of knowing and appreciating the nobleness of his sentiments and the uprightness of his character. As a subject, he performed his duty by obeying the command of his Sovereign, and as a soldier, by valiantly defending the honour of his flag; but even in the execution of his duty he preserved unblemished that of his country. He has fallen, like so many others, a victim to this disastrous war. Honoured by his memory, and respected by his grave, which will be as sacred on the soil of Russia as that of England; and whilst pointing to it, no Russian will refuse to say—Siste, viator, heroum cadens."

THE FOREIGN LEGION.
The Prussian Correspondence publishes the following details respecting the Foreign Legion: "The pay of England—M. de Stautgen—officer of the Brunswick army,

has undertaken to raise 10,000 men, including officers, at the rate of £10 per head. The men who enlist are to take an oath of fidelity to the Queen, are to engage to serve for the whole war and a year longer, and are to go wherever they may be required. At the expiration of their period of service, the non-commissioned officers and soldiers are to receive a year's pay, and to be conveyed either to their own country or to Canada, where land is to be ceded to them. The officer's pay is to be the same as that of officers in the English army, and their travelling expenses to the depot are to be paid; they are to receive three months' pay for their equipment, and an equal sum for travelling expenses on the dissolution of the Legion. No provision has been made for officers and soldiers who may become unfit for service, but they may receive pensions from the generosity of the Queen. The military laws of England have been translated into different languages for the use of the Legion. The 10,000 men are to be divided into two brigades, each consisting of four regiments of infantry, and one of light cavalry. The regiments are not to divide into battalions, but consist of ten companies of 100 men each, with a captain, a lieutenant, and an ensign. The uniform of the light infantry is black, and similar to that of the Brunswick troops. The infantry are to wear a tunic of dark green cloth, with a light green collar, dark trousers, and a black cap with a blue tassel. All the troops are to be armed with the Minié rifle. The arrangement of the haversack resembles that of the Prussian soldiers. The officers of all grades are without distinctive ornaments, and on service are distinguished by large swords turned at the point, and by cartridge-boxes supported by black hobs. When officers and soldiers are not on duty, they are to wear a jacket of dark colour."

THE CROPS.
Every where through the entire length and breadth of the Union, the crops have proved ample and good, almost beyond precedent. This fact not only secures the people against a dearth of food, but it guarantees a revival of all the depressed and paralyzed interests of industry and commerce. The agricultural class, which is by far the largest class of our population—the class on which the mercantile and manufacturing energies of the country principally depend for prosperity, have an abundant stock of products to dispose of, with an exhausted market to supply, and the natural effect of these two causes must be to place an immense amount of wealth in the hands of the farmers in all sections. The New York Courier estimates a product of seventy-five per cent. better of 1850—or one hundred and seventy millions in the aggregate. If we allow 3½ bushels of wheat per head, or one hundred millions of bushels for home consumption, we shall then have on hand for export or for future stock about seventy-five millions. The year 1855 has exhibited remarkably weather—no previous season has been more propitious. We must not lose sight, however, of the fact that the harvest in Europe is very flattering.

RIOT AND LOSS OF LIFE IN LOUISVILLE, KENTUCKY.
The election in Louisville, Kentucky, on the 6th inst., was attended by a sanguinary battle between the Know Nothings or Americans, and the Irish and Germans. The following seems to be the history of the terrible and disastrous affair. Some persons, said to be Irish or Germans, fired at a carriage containing two Americans, one of whom was wounded. A policeman and two citizens interfered, and they also were fired at and wounded. A crowd assembled, and the rioters, when the shots were fired, sacked the house whence the Germans fired, and beat two of the Germans found in it almost to death. Other houses were sacked, a brewery burned, a great number of foreigners beaten, and one Irishman shot, so that he died a few hours afterwards. An American having been shot from a street near the burning brewery, the Irishman who was said to have fired it was captured, beaten, and then killed by a shot. It was proposed to sack the Roman Catholic Cathedral, where it was said there were arms stored, but the Mayor persuaded the crowd to desist. There was no cessation, and the Americans were about putting up their cannon, which they had dragged about, but had not used, when there came rumours of more firing from Irish and German houses in another quarter. The first step was to hang an Irishman charged with shooting an American. Meanwhile, the firing upon the Americans continued, they attacked the Irish houses, and set them on fire. A number of the inmates were said to have been killed, and some burned to death. One woman was killed. The number burned is stated at from fifteen to twenty. This was the general result of Monday's work. Tuesday the city was in constant excitement, but no more blood was shed. An extra police force had been organized. The Roman Catholic Bishop disclaims all sympathy with or knowledge of the attacks upon Americans, and has given the keys of the cathedral to the Mayor.

East India Carpets.
A FEW PIECES White and colored, 1 yard wide, and 1½ yard wide, at 1s. 6d. the square yard, by J. D. NASH.
June 9

J. Dawson & Son, Booksellers, PICTON, N.S.
PUBLISH THE FOLLOWING:—
1. THE HARMONICON; a collection of Sacred Music, 272 pages—5s. This work will be found much better suited to congregational singing as practised in these provinces, than most of the American music books.

Friend of the Canadian!
HOLLOWAY'S PILLS.
EXTRAORDINARY CURE OF ASTHMA!
OF AN OLD LADY SEVENTY FIVE YEARS OF AGE.
Copy of a Letter from Mr. Thomas Weston, (Book Store), Toronto, dated 9th October, 1854.
To Professor Holloway,
Sir—Gratitude compels me to make known to you the extraordinary benefit an aged parent has derived from the use of your Pills. My mother was afflicted for upwards of four and twenty years with asthma and spitting of blood. It was quite agony to see her suffer and hear her cough; I have often declared that I would give all I possessed to have cured her; but although I paid a large sum for medicine and advice it was all to no purpose. About three months ago, I thought perhaps your Pills might benefit her, at all events I resolved to give them a trial, which I did; the result was marvellous; by slow degrees my mother became better, and after persevering with your remedies for five weeks, she was perfectly cured, and now enjoys the best of health, although seventy five years old.
I remain, Sir, your obliged,
(Signed) THOMAS WESTON.
REMARKABLE CURE OF DROPSY!!
AFTER BEING TAPPED THREE TIMES.
Copy of a Letter from Anthony Smith, Esq., Halifax, Nova Scotia, dated the 25th August, 1854.
To Professor Holloway,
Sir—I desire to add my testimony to the value of your Pills, in cases of dropsy. For many months I suffered the greatest torture with this distressing complaint; was tapped three times, and finally given up by the doctors; having become in appearance as a skeleton, and with no more strength in me than a child just born. It was then I thought of trying your Pills, and immediately sent for a quantity, and commenced using them. The result I can only credit even now, although true it is. After a few days' use, I felt much better, and by persevering with them at the expiration of two months, I was completely cured. I have since enjoyed the best of health.
I am, Sir, yours sincerely,
(Signed) ANTHONY SMITH.
ASTONISHING CURE OF GENERAL DEBILITY AND LIVER COMPLAINT!!
Copy of a Letter from Wm Reeves, of Charlottetown, Prince Edward's Island, dated 17th Nov. 1854.
To Professor Holloway,
Sir—I am happy to say that your Pills have restored me to health after suffering for nine years from the most intense general debility and dropsy of the liver and bowels, which had endangered for the whole of that time, I tried many medicines, but they were of no good to me, until I had recourse to your Pills, by taking which, and following the printed directions for seven weeks I was cured, after every other means failed to the astonishment of my neighbours and friends. I shall ever feel grateful to you for this astonishing restoration to health, and will recommend your Pills to all sufferers, feeling it my duty to do so.
I remain, Sir, your humble servant,
(Signed) WILLIAM REEVES.
These celebrated Pills are wonderfully efficacious in the following complaints:—
Aging, Jaundice, King's Evil,
Asthma, Fevers of all kinds, Sore Throats,
Bilious Complaints, Stomach and Bowel Disorders, Stone and Gravel,
Flatulency, Gout, Syphilis,
Skin Diseases, Head-ache, Rheumatism,
Bowel Complaints, Indigestion, Tic Douloureux,
Colic, Inflammation, Tumours,
Constipation of the Bowels, Liver Complaints, Ulcers,
Consumption, Lumbago, Venereal Affections,
Debility, Piles, Worms of all kinds,
Dropsy, Rheumatism, Weakness from whatever cause, &c. &c.
Female Irregularities, Scrophulous, or
Sold at the Establishments of Professor Holloway, 244, Strand, (near Temple Bar), London, and 80, Maiden Lane, New York; also by all respectable Druggists and Dealers in Medicines throughout the civilized world, and all over the Canada, at the following prices:—1s 3d; 3s 3d; and 5s, sterling each Box.
There is a considerable saving by taking the large sizes.
N.B.—Directions for the guidance of patients in every disorder are affixed to each Box.

Public Buildings, Stores and Dwellings fitted up in the most modern style. Old work bronzed and relacquered.
Orders for description of BRASS RAILS made to order. Brass Castings of every description.
Orders from the country attended to with despatch. JAMES HUNTER.
Apr. 24—6m.

Classical, Mathematical and Philosophical Department OF THE THEOLOGICAL SEMINARY IN CONNECTION WITH THE PRESBYTERIAN CHURCH OF NOVA SCOTIA.
Greek, Logic, Moral Philosophy, and Chemistry, REV. PROFESSOR REEVES.
Latin, Mathematics, Algebra & Nat'l Philosophy, PROFESSOR McCULLOCH.

THE Committee of Superintendence having secured the services of Mr. THOMAS McCULLOCH as second Professor, and having received the sanction of the Board, and the assent of his friends and the public the following outline of the course of instruction which it affords:—
First Year—Logic, Greek, Latin, & Mathematics.
Second Year—Moral Philosophy, Greek, Latin, and Mathematics.
Third Year—Natural Philosophy, Greek, &c. &c.
Fourth Year—Chemistry, Greek, &c. &c.
The Logic course embraces an analysis of the intellectual powers and their mode of operation, giving particular prominence to the nature and different kinds of evidence, and of prejudices, to the different modes of reasoning, and to fallacies;—Aesthetics—Universal Grammar—Composition, and Elocution.
The Natural Philosophy Class, the following subjects are discussed:—The origin of Action and the nature of Power; the freedom of Will; the Mechanical, Animal, and Rational principles of Action; the nature and standard of Virtue; the existence of the Deity; the immortality of the Soul; Duty, as indicated by the light of nature; Man in a state of nature; the origin and progress of the Arts and Sciences; Law; Government, and Political Economy.
The course in Natural Philosophy consists of Matter, its properties, and contingent; Motion, its laws; Acoustics; Mechanics; Hydrodynamics; Pneumatics; Heat; Optics; Magnetism and Electricity, including Galvanism, Electro-Galvanism, Magneto-Electricity, and Thermo-Electricity.
The course in Chemistry embraces an analysis of the intellectual powers and their mode of operation, giving particular prominence to the nature and different kinds of evidence, and of prejudices, to the different modes of reasoning, and to fallacies;—Aesthetics—Universal Grammar—Composition, and Elocution.
The course in Natural Philosophy consists of Matter, its properties, and contingent; Motion, its laws; Acoustics; Mechanics; Hydrodynamics; Pneumatics; Heat; Optics; Magnetism and Electricity, including Galvanism, Electro-Galvanism, Magneto-Electricity, and Thermo-Electricity.

Revelenta Arabica Food.
OF all discoveries, none has conferred greater benefit upon mankind than that made by Du Barry some years back. We allude to a plant grown upon that gentleman's estates in America, called Du Barry's Revelenta Arabica. Its superiority over Pills and other medicines in subduing disease and keeping off the enemy is manifested in a marked degree in the metropolitan, where the public health has latterly acquired a tone it never attained before; thus, besides a great falling off in disease, there is a decrease in deaths of from 10 to 15 per cent. Testimonials from parties of unquestionable respectability, have attested that it supersedes medicine of every description in the effectual removal of indigestion (dyspepsia), constipation, and diarrhoea, nervousness, biliousness, liver complaint, flatulency, distension, palpitation of the heart, nervous headache, dizziness, noises in the head and ears, pains in almost every part of the body, chronic inflammation and ulceration of the stomach, angina pectoris, erysipelas, eruption of the skin, indigestion, consumption, dropsy, rheumatism, gout, hoarse voice, nausea and sickness during pregnancy, &c. &c.
It is, moreover, admitted by those who have used it to be the best food for infants and invalids generally, as it never turns acid on the weakest stomach, but imparts a healthy and lively blush to the cheeks, and restores the faculty of digestion and muscular and nervous energy to the most enfeebled. For the benefit of our readers a synopsis of a few of 50,000 testimonials received by Mr. Du Barry upon the invaluable efficacy of his Revelenta Arabica Food. Case No. 75.—from the Right Hon. the Lord Sturtevant, Dec. 1854. "I have derived much benefit from Du Barry's Health-Restoring Food.—Since art de Desires, Dromana, Cappocquin, county of Waterford." Case No. 180.—"25 years' nervousness, constipation, indigestion, and debility, from which I had suffered great misery, and which no medicine could remove or relieve. I have been effectually cured by Du Barry's Health-Restoring Food in a very short time." Case No. 174.—"I have derived much benefit from Du Barry's Health-Restoring Food.—Since art de Desires, Dromana, Cappocquin, county of Waterford." Case No. 180.—"25 years' nervousness, constipation, indigestion, and debility, from which I had suffered great misery, and which no medicine could remove or relieve.
