

AROUND TOWN.

Looks like Spring. But, there is one consolation; we have some Snowballs that will not melt.

The civic election was quite a surprise to some folks.

The only sewers we will have will be as we have always had—the womer, by hand and machine.

Our doctors would confer a great favor on the community if they could discover antidotes to the microbes of pride, selfishness and exclusiveness that have so long run rampant in our city.

Mr. H. Gaylor Wilshire, of Toronto, has our thanks for putting his excellent magazine on our exchange list, also Mr. G. Freeman, of New York city, for several reform papers and publications.

Progress of Dentistry.

A new artificial filling has recently been introduced into the dental profession. It is enamel, very hard, and a perfect imitation of the natural tooth. It can be had either in the pure white or a yellowish shade as may be desired. This new filling being unnoticeable in the tooth, and the filling operation being practically painless, is an ideal filling and liable to largely take the place of gold and silver. Dr. Steeves has been using this new enamel finish with perfect success.

NOTICE.

The photographic business of the late John Harvey will be continued under the management of Walter Lister, who has been associated in business with Mr. Harvey for the past seventeen years.

Address all communications Harvey's Studio.

Hams That
Are Hams!

We have just received 1000 lbs. of M. B. McNally's famous Hams. If you have never eaten a slice of McNally's Hams let us send one of these to your home. If you know McNally's Hams all we need to do is to tell you that we have them.

Choice Dairy Butter
