The bars were closed ; a drink in benign in spirit.

The Insolvent Laws.

On Tuesday the Colby bill to amend the insolvency law was discussed. The chief objections to the law of 1875, are the many temptations to speculative bankruptcy it offers, and the extravagance and mismanagement of official assignees in the administration of estates. The amended bill proposed to retain all the really effective parts of the

do when such supplies are ended? law, but it provided for the abolishment of WOOD CRAFT. - The schooner "Mary the official assignees, and the appointment of custodians who should have no power to wind Pickard." the advance of the river wood fleet up an estate, until the appointment of the arrived from St. John on Wednesday, and permanent assignees, who should have re- moored off the wharf of D. Important Invention.

eous King of Kings and possessor of bound-A process has been invented of making steel from Cleveland iron. In the beginning of last month, the process was tested the increasing, are imbued with a love of science has yet developed," did not dream that it Middleston works of Messrs. Bolckow, Vauwould develop at a bound to tigerish ferocity. ghan & Co., the leading iron masters of the north of England and the Cleveland district, The King of Burmah is little over twenty. in the presence of a number of practical men and he has been barely four months on the who considered that the experiments made were thoroughly successful. The cost of propensity for gambling. How else account has a good forehead, clear, steady eyes, and production is said to be about \$3 per ton less for the intense interest taken in the great a firm but pleasant mouth. His chin is full, than from Bessemer pig iron. Seven years ago the iron rail trade of the north of Engand produced 3000,000 tons annually, which has now departed, but there is a firm belief in Cleveland, that with the new process an equally large trade in steel rails and in many other articles would be created. By the time that sections of the Pacific Railway are ready for the laying, the cost of steel rails we suppose will not exceed iron and the price given by McKenzie for that celebrated lot

A correspondent of the Edinburgh Scots.

"Messrs. Bolckow have undoubtedly placed hemselves in the position of being able to make steel from Cleveland iron, without any cost beyond that attendant upon the convern of the richest hematite ores. The pro

ess they have adopted is so simple that it

now appears almost incredible that the dis-

covery was not made earlier. An ordinary

Bessemer converter is lined in a material

made of magnesium limestone. Exactly the

same process is adopted with regard to blowing the converter as in the case of hematite
