A GLENGARRY MIRACLE

MR. JAMES SANDS' WONDERFUL RESTORATION TO HEALTH.

After Three Years of Paralysis, Insensibility and Feebleness, He Tells the Tale of His Recovery and Renewed Work in the World—His Story as Told a Free Press Reporter.

The town of Alexandria, some 55 miles south of the city of Ottawa, on the Canada Atlantic Railway, has been completely astonished, recently, at the marvellous experience of a young man, who, after having been bedridden for nearly twelve months, and his case pronounced incurable by Montreal and Alexandria doctors, is now restored to complete health and strength.

Mr. James Sands is a young teamster, well-known and extremely popular throughout the country-side, and his illness and wonderful recovery have been—indeed still are—the chief topics in the town and neighborhood. The story of his marvellous cure having reached Ottawa, a member of the Free Press staff journeyed to Alexandria and sought out Mr. Sands for the purpose of ascertaining the truth of the statements made regarding his recovery. Mr. Sands is a slimly built, but very-looking young man of about 32 years of age, and when met by the newspaper man the bloom of health was on his cheek and his whole frame showed signs of unimpaird vigor and vitality.

The newspaper man told Mr. Sands the object of his visit, and the latter expressed his willingness to give all the facts connected with his case.

"I was," said Mr. Sands, "a complete wreck, given up by the doctors, but now I am well and strong again, and gaining strength every day. I was born in Lancaster in 1860, and up to three years ago I was always healthy and strong, living in the open air and being well-known throughout the whole county of Glengarry. It was in the winter of 1888-89 that I first felt signs of incipient paralysis. I was then teamster for the sash and door factory here, and had been exposed to all kinds of weather. I then experienced violent twisting cramps in my right hand. I was in Cornwall that winter when the first stroke fell, and I remained there for three days before I knew anybody at all. A medical man was called in but could do nothing for me. After that I came home and appeared to get all right for a time, but after a few days the old trouble began again, my hand continuing the twitching and cramping that had preceded the stroke. Up to twelve months ago these twitching fits were the only symptoms I suffered from. Then in August, 1891, when I was in Huntingdon village I sustained a second stroke, and remained unconscious for about seven hours. A doctor attended and I recovered sufficiently to be brought home. After my return home the paralysis steadily gained on me, and I lost the use of my right arm and leg entirely; my right eye was distorted and my tongue partially paralyzed. I was prescribed for by an Alexandria physician, whose treatment I carefully followed, but it had no effect. I still got steadily worse, and about a month before Christmas last, I went to the English Hospital at Montreal. Prof. Stuart and all the doctors came around me, as mine was a curious case, and the professor treated me. All the doctors could give me no satisfaction, and did not appear to understand my case. I questioned some of them, but they told me it was a hopeless case. I remained in the hospital a month, without the least improvement, and was then brought home, and remained in my bed till May day. I had constant medical advice, but continued to grow worse and worse. My right arm withered and I grew so weak and useless that I could not turn myself in bed. Meantime I had tried all sorts of patent medicines without the least effect. In May I saw an advertisement of Dr. Williams' Pink Pills in the papers, and said I would try them as a last resort. I had heard of the wonderful cures worked by Pink Pills, and told my folks to get me some. I had not taken them long when I found myself improving, and this determined me to continue their use. My strength gradually returned, the muscles of my arm and leg became invigorated and stronger, and I was able to sit up. I still continued taking the Pills and gaining strength, until at last I was able to go about, and finally to return to my old place at the sash and door factory. I gave up the Pills for a while, and did not feel so well, so I again began their use. I now feel as well as ever, though perhaps not quite so strong as formerly. You can see my right arm, which was withered, is now all right, and Mr. Sands stretched out a muscular limb, which would have done credit to a blacksmith. In reply to the reporter Mr. Sands said he thought his trouble had been brought on through exposure to the weather. "I am completely satisfied," said he, "that it is to Dr. Williams' Pink Pills that I owe my wonderful restoration. Besides the medical treatment, I had tried electricity and patent medicines, both internal and external, but without the slightest avail. After beginning Pink Pills I began to mend, and they have made a new man of me."

to enrich the former and stimulate the latter. For all diseases depending upon a vitiated condition of the blood, or shattered nerves, they are an unfailing remedy. Such diseases as these speedily yield to their treatment. Eosomotor ataxia, partial paralysis, St. Vitus' dance, neuralgia, rheumatism, sciatica, nervous prostration, nervous headache, dyspepsia, chronic, erysipelas, scrofula, etc. They are a specific for the troubles peculiar to females, correcting irregularities, and restoring the functions, and in the case of men effect a radical cure in all cases arising from overwork, mental worry or excesses of any nature. In fact, it may be said of them "They come as a boon and a blessing to men, Restoring to health, life and vigor again."

These Pills are manufactured by the Dr. Williams' Medicine Company, Brockville, Ont., and Schenectady, N. Y., and are sold in boxes (never in loose form by the dozen or hundred) and the public are cautioned against numerous imitations sold in this shape) at 50 cents a box, or six boxes for \$2.50, and may be had of all druggists or direct by mail from Dr. Williams' Medicine Company, from either address. The price at which these pills are sold make a course of treatment comparatively inexpensive as compared with other remedies or medical treatment.

JINGLES OF HUMOR.

A Little Nonsense Gathered for Leisure Reading.

'My rich uncle has got the airship' said a young Gayboy. 'He is going up next week. I am his heir' and I think their will be money in the heirship.'

Salad Days. First Lobster—Well, what are you going to do now?
Second Lobster—Get dressed for dinner.

The worm that feeds on steel has been discovered by a Belgian scientist. He is probably a cousin of the ice microbe.

Mrs. Trotter—Oh Henry, throw away that cigar. It is something awful. (After a pause.) Do you know that Mrs. Barlow saves money for her husband by buying his cigars?

Trotter (grimly)—I thought as much; this is a cigar that Barlow gave me

It is said that Ward McAllister spent a great deal of time deliberating whether to call his book 'Society as I Found it,' or 'Society as I Founded It.'

Willie—I can't come out, Dolph. Ma says I must stay in all the afternoon.

Dolph—Why don't you sit in the chair that squeaks and wiggles. She will send you out quick enough, then.

Willie (scared)—Now we've milked the cow, what'll we do? Pop'll be awful mad.

Jimmie (equal to the occasion)—We'll drive her down to the pond and fill her up with water.

It is sometimes easier for a man to complete a round of pleasure than it is for him to make things square afterwards.

In early days the schoolmaster 'boarded around' himself, but he shingled the boys.

'My son,' said Rev. Stiggins, don't let me hear you say poverty.'

'Why, father?'

'Because, my boy, poverty is a curse.'

Husband—So they evidently think that Father O'Neil has some real metal in him.

Wife—Oh, what have they done!

Husband—Made a canon of him.

Grains of Wisdom.

God's side of every question is the side the devil doesn't want us to take.

The water of life is free, but it costs something for the pitcher.

The man who will not be honest with God is not worthy of trust anywhere.

It never takes the devil very long to find a job that will suit the man who isn't busy.

The devil never has much trouble with people who get rich in a hurry.

Pastoral visitation ought to mean something more than eating chicken and talking politics.

A mule would rather hear himself bray than listen to a brass band with two base drums in it.—Ram's Horn.

For Female Weakness

Mr. T. Steadman, Robaillon writes:—"My daughter had been attended by four physicians for female weakness, without avail. A course of your Dr. Williams' Pink Pills cured her." Of all dealers or by mail at 50c a box or 6 boxes for \$2.50. Dr. Williams' Med. Co., Brockville, Ont., and Schenectady, N. Y.

Fashionable Fancies.

Yellow and violet are rival colors. Gray crape plastron and ruffles upon black gowns indicate half mourning.

Around the coil of back hair is worn a hoop of twisted tortoise shell.

Silk linings of a contrasting color are the rule for evening wrap.

The popularity of the long Suede glove wanes not. Those in wood color are especially desirable.

Linen driving-coats are long, double-breasted, have at least three pockets, are fastened by large smoked pearl buttons, and the fullness at the waist lined in the back is confined by a belt.

It is predicted that the autumn street gown will be short of even length all round. The sweeper is no longer de rigueur.

Young ladies don large straw hats adorned with white feathers, lace and satin ribbon and ward off the wind with deep veils of white net.

The smoker who has not yet tried the "Myrtle Navy" tobacco has a new pleasure before him in the use of "the weed." An investment of twenty-five cents will furnish him with the means of giving it a fair test. Let us advise him to make the experiment; he will find the tobacco to be all that its thousands of friends claim for it, and they are far from stingy in their praise.

AGRICULTURE

Notes and Suggestions of Practical Utility

FOR THE FARM, FIELD, GARDEN AND DAIRY.

Cleanings of Interest for Our Country Readers.

Only the best really pays.
All fowls like a quiet nest.
Onions are good for poultry.
Always read instructive books.
Sheep should never be worried.
Don't let your millet get too ripe.
Feeding racks should be movable.
A variety of stock prevents waste.
Vines make nice home decorations.
The progressive farmer takes the paper.
Look well to saving seed for next year.
Hilling up is good only in wet weather.
A good pasture saves grain feed for hogs.
Profit is in growth rather than in fattening.
Give us women in the dairy for cleanliness.
Too many people cut hay instead of grass.
There is no gain in close-cropping pastures.
The strength of the fence is its weakest place.
Hot as well as wet days are hard on sheep.
Have your chickens roost in the hen-house.
Buttermilk is said to cure scratches on horses.
If you would have the best, breed from the best.
Shallow, not deep, culture is the order of the day.
Grow no shoots or limbs where not needed.
There is health and happiness in a good garden.
Fatten old animals on grass rather than on grain.
The cleanest and best oiled machine runs lightest.
Every farmer should know something of chemistry.
A heavy crop of buckwheat makes a good mulch.
Cooked foods are generally best for young chicks.
Confinement is less taxing in winter than in summer.
Borax is good in the water in which hands are washed.
Study the individual characteristics of your animals.
Robbing future generations is an unpardonable sin.
Make your skimmed milk into curd for your poultry.
Trees will grow where you can't grow anything else.
Save all the little conveniences you can for next year.
Without a variety of stock there is more or less waste.
Vegetarian animals are longer lived than carnivorous ones.
Cultivate as soon as the soil begins to bake after a rain.
Four feet is long enough for blackberry and raspberry canes.
No matter how hard your work pushes you, keep ahead of it.
Watch each individual animal and vary the food accordingly.
All animals are benefited by contact with the clean earth.
Cutting oats in the bundle saves waste when they are fed.
A little ploughed ground is good for the hens to scratch in.
Feed to young animals that which will most promote growth.
Look to the money as well as the nutritive value of the food.
The interest in an article should be proportioned to its length.
The wrong breed, wrong feed and poor shelter will ensure failure.
Whole wheat cleaned in a sweet mill makes a very complete food.
Buckwheat kills weeds, shades the ground and aids nitrification.
The success of the creamery instead of the patrons is first considered.
Business, as well as capital, accumulates in the hands of fewer and fewer.
Nature is quite flexible, but she insists on the observance of her laws.
High prices make poor stock unprofitable, as it costs as much as good.
Use air-slaked lime freely about your poultry house and your stables.
Animals lay on fat faster in cool weather than when it is either hot or cold.
Don't content yourself with being an imitator; the monkey can do that.
Put on your farm rather than take off important elements of fertilization.
If we have debts for the future to pay, we must leave an equivalent of assets.
There is in the poultry business what you get out of it, and no more—for you.
Plants do not need irrigation every day. Once a week is often enough for a swim.
When you do a thing have some sort of an understanding of what you do for.

In dry seasons and on dry land level culture of hoe crops gives the best results.
A liberal education may be obtained by devoting spare moments to useful reading.
It is pleasant to have a surplus of choice garden seeds to share with your neighbors.
Dry earth is good for the bottom of a hen house, but they need dry dust to wallow in.

It is best to wash or thoroughly wipe fruit before eating it. Disease germs may collect on its surface.
A stack made with a top roof-shaped can be easily covered by boards lapping over each other and fastened by wires.
Water fowls do well on water, yet they need more substantial food than water to make them do well on water.
The "book farmer" knows more than is in the books, but "the other fellow" does not know as much as he thinks he does.

THE PIG PEN.

A Pig Pen Costing Over \$3,000.

Probably the most expensive pig pen ever made was recently completed at the "Harmonist" Community, at Economy, Pa. A local paper there describes it: "The cost of the pen or nursery, up to date, is \$3,000. It is constructed not only on sanitary principles, but with special regard to comfort of each and every porker which finds a place within its walls. It is heated by two large stoves, and the entire pen is covered with a glass roof with proper ventilators. The eating room is separated from the rest of the pen, and everything is kept scrupulously clean by two attendants, whose sole duty is to take care of the pigs, and look after the heating and ventilating of the building. At present the pen contains 300 as fine young porkers as can be seen anywhere. They seem to thrive in their well kept home, and appear to realize their superiority over newcomers, which they eye with disdain."

Prof. W. W. Cooke finds that pigs do better on slightly soured milk, containing only lactic acid, than they do on sweet milk. He says the probable reason is found in the fact that when milk sours, the milk sugar is broken up into lactic acid, but this change takes place without any loss of solid matter. One particle of milk sugar merely absorbs some water and splits up into two particles of lactic acid. Recent experiments in Germany seem to show conclusively that lactic acid, in common with several other vegetable acids, is digestive and has a real feeding value. Therefore the lactic acid being in the same quantity as the milk sugar, it is fair to presume that its feeding value would not be much reduced. If milk is allowed to stand for several days, this lactic acid breaks up into butyric acid and carbonic acid gas, the latter passing off and becoming certainly a dead loss. It could not be said from our experiments that skim-milk could be kept indefinitely and still not lose in feeding value, but it seems probable that there is no loss in feeding value in the first change of souring and lobbering. As to why the sour skim-milk should have done better than the sweet skim-milk we cannot tell, unless the answer is found in the greater relish with which it was eaten, or unless it is a fact that the acid during the hot weather helps by keeping the digestion of the pigs in a little better condition.

6TH HALF-YEARLY COMPETITION.

The Most Interesting Contest Ever Offered by the Canadian Agriculturist.

One Thousand Dollars in Cash, a pair of handsome Shetland Ponies, Carriage and Harness, and over two thousand other valuable prizes for the Agriculturist's brightest readers! Who will have them? According to the usual custom from some years past the publishers of THE AGRICULTURIST now offer their Sixth Half-yearly Literary Competition. This grand competition will, no doubt, be the most gigantic and successful of any ever presented to the people of the United States and Canada.

One Thousand Dollars in cash will be paid to the person sending in the largest list of English words constructed from letters in the words "The Canadian Agriculturist."

Five Hundred Dollars in cash will be given to the second largest list.

Over one thousand additional prizes awarded in order of merit: One Grand Piano; \$300 organ; \$400 piano; Dinner Sets; Ladies' Gold Watches; Silk Dress Patterns; Portiere Curtains; Silver Tea Services; Tennyson's Poems, bound in cloth; Dickens' in 12 volumes, bound in cloth, etc.

As there are more than 1,000 prizes, any one who takes the trouble to prepare an ordinary good list will not fail to receive a valuable prize. This is the biggest thing in the competition line that we have ever placed before the public, and all who do not take part will miss an opportunity of a life time.

Rules.—1. A letter cannot be used oftener than it appears in the words "The Canadian Agriculturist." For instance the word "egg" could not be used, as there is but one "g" in the three words. 2. Words having more than one meaning but spelled the same can be used but once. 3. Names of places and persons barred. 4. Errors will not invalidate a list—the wrong words will simply not be counted.

Each list must contain one dollar to pay for six months' subscription to "The Agriculturist." If two or more tie, the largest list which bears the earliest postmark will take the first prize, and the others will receive prizes in order of merit. United States money and stamps taken at par.

The object in offering these magnificent prizes is to introduce our popular magazine into new homes, in every part of the American continent.

Every competitor enclosing 30 cents in Lamps extra, will receive free, by mail, post-paid, one to "The Canadian Agriculturist's" Elegant Souvenir Spoons of Canada.

Prizes awarded to persons residing in the United States will be shipped from our New York office free of duty. All money letters should be registered.

Our Former Competition.—We have given away \$25,000 in prizes during the last two years, and have thousands of letters from prize-winners in every state in the union and every part of Canada and Newfoundland. Lord Kilcourse A. D. C. to the Governor General of Canada, writes: "I shall recommend my friends to enter your competitions," M. M. Bruden, Vancouver, B. C., "received \$1,000 in gold" and we hold his receipt for same. A few of the prize winners: Miss J. Robinson, Toronto, \$1,500; J. J. Brandon, Fenelon Falls, Ont., \$1,500; David Harrison, Syracuse, N. Y., \$500; H. Beavis, St. Louis, Mo., \$300; Jas. Baptie, West Duluth, Minn., \$500; Miss Georgina Robertson, Oak St., Brooklyn, \$1,000; Fred H. Hills, 359 State St., Bridgeport, Conn., and thousands of others.

Address all communications to THE AGRICULTURIST, Peterborough, Ontario.
